

# Conservation Reserve Program

ANNUAL SUMMARY AND ENROLLMENT  
STATISTICS

FY 2010

This report provides statistics for land enrolled in the Conservation Reserve Program (CRP), including a summary of FY 2010 CRP related activities, FY 2010 CRP outlays by payment type, continuous CRP enrollment activity, outlay and sign-up history, CRP practice and payment provisions, and environmental benefits index (EBI) history. The tables are based on contract data developed and maintained in CRP data files by Farm Service Agency (FSA) service centers and are generally based on the physical location of the CRP contracted land. The FY 2010 ended September 30, 2010.

**Data from Nevada, and Rhode Island not reported because of confidentiality concerns. Data from these States are included in the totals.**

The report was prepared by Alex Barbarika, Natural Resources Analysis Group, Economic and Policy Analysis Staff (EPAS), Farm Service Agency (FSA), U.S. Department of Agriculture, with assistance from Skip Hyberg, Rich Iovanna, and Catherine Feather with EPAS/FSA. Assistance and support from the Conservation and Environmental Protection Division is greatly appreciated.

## ***CONTENTS***

Overview.....	1
Activities.....	2
Environmental Benefits of CRP.....	3
CRP Description and History.....	10
Acres Enrolled by Year and Signup.....	17
Number of Contracts by Year and Signup.....	18
Outlays by Payment Type and State.....	19
Enrollment by Signup Type and State.....	20
Enrollment by Conservation Practice.....	26
Enrollment by Erodibility Index.....	33
Expirations by Year.....	34
Results of 2009 Contract Extension.....	36
Results of 2006 Re-Enrollment and Extension (REX).....	37
Sign-up Periods and Eligibility Criteria.....	41
Conservation Practices and Payment Provisions.....	43
Environmental Benefits Index Factors and Points.....	45

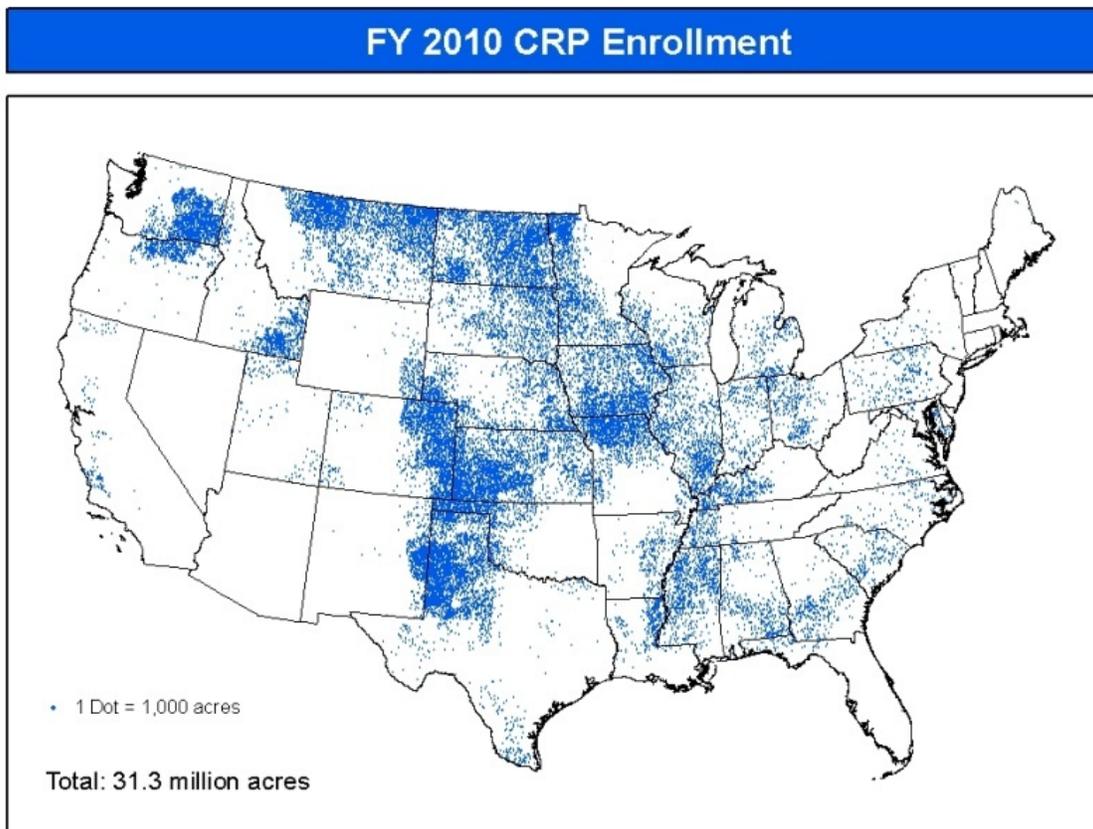

# **CONSERVATION RESERVE PROGRAM**

## **CONTRACTS IN EFFECT, SEPTEMBER 30, 2010**

<u>Sign-up Type</u>	<u>Contracts</u>	<u>Farms</u>	<u>Acres</u>	<u>Annual Rental Payments</u>	
b/				(\$Million)	(\$/Acre)
General	342,584	225,595	26,664,009	\$1,188	\$44.57
Continuous					
Non-CREP	320,160	191,008	3,205,013	\$297	\$92.56
CREP	68,624	45,203	1,197,175	\$155	\$129.63
<u>Farmable Wetland</u>	<u>13,274</u>	<u>10,492</u>	<u>232,048</u>	<u>\$26</u>	<u>\$114.61</u>
Total Continuous	<u>402,088</u>	<u>233,555</u> a/	<u>4,634,236</u>	<u>\$478</u>	<u>\$103.22</u>
Total	744,672	416,459 a/	31,298,245	\$1,667	\$53.25

a/ Number of farms not additive across sign-up types because a farm may participate in multiple sign-up types.

b/ Approximates payments which were paid October 2010 (FY 2011), before adjustments for haying/grazing, non-compliance, terminations, part-year contracts. Includes annual incentive and maintenance allowance, but not one-time up-front signing and practice incentive payments.

## CRP ACTIVITIES, FY 2010

October, 2009

- \$1.7 billion in CRP rental payments issued for lands enrolled as of September 30, 2009.

November 2009

- 100,000-acre South Dakota James River CREP agreement signed.

February 2010

- Increases allocations for SAFE (+150,000 acres), Duck Nesting (+50,000 acres), and Upland Bird Buffers (+100,000 acres).
- USDA announces MOU with Pheasants Forever to enhance conservation efforts.

May 2010

- USDA announces signup for Transitions Incentive Program.

July 2010

- USDA announces general signup 39 to begin on August 2, 2010.

August 2010

- USDA announces acceptance of 4.3 million acres under general signup 39.

### Conservation Reserve Program Outlays (\$1,000) 1/

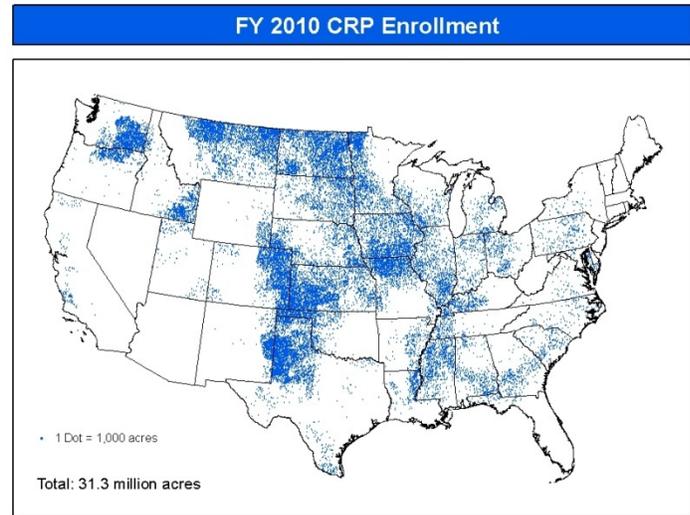

Payment	FY 2005	FY 2006	FY 2007	FY 2008	FY 2009	FY 2010
Annual Rental	\$1,630,585	\$1,666,462	\$1,727,408	\$1,785,767	\$1,720,631	\$1,709,079
Signing Incentive	\$25,304	\$32,577	\$18,366	\$25,164	\$25,828	\$70,181*
Practice Incentive	\$49,238	\$49,573	\$39,026	\$43,246	\$45,855	
Haying/Grazing Adj.	(\$11,316)	(\$8,545)	(\$9,542)	(\$12,147)	(\$12,504)	(\$9,518)
Wetland Restoration Incent.	\$1,289	\$1,105	\$1,030	\$932	\$517	*
Cost-Share	\$93,235	\$100,096	\$89,844	\$84,238	\$74,947	\$66,721
Total	\$1,788,334	\$1,841,268	\$1,866,131	\$1,927,200	\$1,855,274	\$1,836,614

\* Breakdown of incentive outlays no longer provided.

1/ Not including technical assistance. Some outlay totals may have been updated from previous Annual Summaries.

# *Environmental Benefits of the Conservation Reserve Program*

## **United States 2010**

<b>Fiscal Year</b>		<b>2006</b>	<b>2007</b>	<b>2008</b>	<b>2009</b>	<b>2010</b>
<b>Land enrolled</b>	million acres	36.0	36.8	34.6	33.8	31.3
<b>In Buffers</b>	million acres	1.84	1.90	2.00	2.01	2.02
<b>Wetlands</b>	million acres	2.01	2.06	1.98	1.98	2.05
<b>HEL</b>	million acres	25.2	25.5	23.6	22.8	20.5

### **Reductions (not leaving field or intercepted by buffers)**

<b>Sediment</b>	million tons	210	216	219	220	220
<b>Nitrogen</b>	million lbs	607	623	616	611	607
<b>Phosphorus</b>	million lbs	121	124	123	123	122

### **Greenhouse Gas Reduction ( CO2 equivalent/Year)**

<b>CO2 Sequestered</b>	million metric tons	51	50	48	47	44
<b>Energy and Fertilizer</b>	million metric tons	9	9	9	8	8
<b>Total</b>	million metric tons	60	60	57	55	52

### **CRP improves water quality.** Water quality benefits accrue in two ways:

- CRP reduces the nitrogen and phosphorus leaving a field in runoff and percolate. Using models developed by the Food and Agricultural Policy Research Institute (FAPRI), in FY 2010 an estimated 607 million pounds less nitrogen and 122 million pounds less phosphorus left fields due to CRP, 95 and 86 percent reductions, respectively.
- Grass filters and riparian buffers (partial field enrollments) intercept sediment, nutrients, and other contaminants before they enter waterways. Based on FAPRI's model, an estimated 356 million pounds of nitrogen and 72 million pounds of phosphorus were intercepted by CRP buffers, nationally in FY 2010.
- In 2010, grass and tree plantings reduced nitrate loss by 109 million pounds. Nitrate is a form of nitrogen that is biologically available to algae. Excess nitrate contributes to the formation of hypoxic zones in the Gulf of Mexico, Chesapeake Bay, and other waters.
- Wetlands restored and constructed by CRP improve water quality by converting nitrate / nitrogen into benign atmospheric nitrogen. In 2010, Iowa's 65 CREP constructed wetland projects on 1,808 acres reduced nitrate runoff by nearly 650,000 pounds.

**CRP enhances wildlife habitat.** The 31.3 million acres of grass, trees, and wetlands established by CRP benefit numerous wildlife species. Several independent studies have identified benefits to multiple bird populations including:

- **Prairie Pothole Ducks** – Researchers from the United States Fish and Wildlife Service estimated that the CRP contributed to a net increase of about 2 million additional ducks per year (30 percent increase in duck production) since 1992 in North Dakota, South Dakota, and Northeastern Montana. Populations fluctuate on a year-to-year basis due to differences in precipitation patterns.
- **Ringed-Neck Pheasants** – Western EcoSystems Technology, Inc. found that, in prime pheasant habitat, a 4 percent increase in CRP herbaceous vegetation was associated with a 22 percent increase in pheasant counts.
- **Sage Grouse** – The Washington Department of Natural Resources found that CRP enrollment was associated with halting a decline (25 percent between 1970 -1988) in sage grouse populations. The study found that a region without substantial CRP enrollment had continued sage grouse population decline.
- **Northern Bobwhite Quail** – Mississippi State University found that quail observations were positively related to CRP enrollment. The quail population response varies by cover and region.
- **Grassland Birds** – The CRP was identified as a ‘Reason for Hope’ for grassland birds in the 2009 ‘State of the Birds’ report, which documented serious declines in grassland birds. Researchers from the United States Fish and Wildlife Service, U.S. Geological Survey, and the University of Montana found that CRP had a large impact on grassland bird populations, including two birds designated as species of continental importance by Partners in Flight.

**CRP sequesters carbon.** CRP sequesters more carbon on private lands than any other federally administered program. In 2010, CRP resulted in the equivalent of a 52 million metric ton net reduction in carbon dioxide (CO<sub>2</sub>) from CO<sub>2</sub> sequestration, reduced fuel use, and nitrous oxide emissions avoided from not applying fertilizer. Carbon sequestration helps offset the release of greenhouse gases (GHG) into the atmosphere. GHG have been associated with anthropogenic climate change

**CRP protects and enhances soil productivity.** CRP conservation covers reduce erosion and protect soil productivity. By targeting fragile cropland and placing these lands into protective conservation covers, the CRP greatly reduces sheet, rill, and wind soil erosion. Each year since 2002, CRP reduced soil erosion by 325 million tons or more from pre-CRP levels. Since 1986, CRP has reduced more than 8 billion tons of soil erosion.

**CRP reduces downstream flood damage.** CRP lands reduce downstream flood damage by helping to reduce peak flows after storm events by holding and slowly releasing the storm water.

FSA is using CRP enrollment data, the USDA soils and natural resource inventories, and cooperative agreements with Federal, State, and other partners to refine these performance measures and to estimate the benefits from CRP. For more information see

<http://www.fsa.usda.gov/FSA/webapp?area=home&subject=ecpa&topic=nra>.

## **Nitrogen, Phosphorus, and Sediment Reduction Estimates**

Estimates are based on the results of the modeling done in support of a 2007 study of the water and air quality impacts of the CRP using the Environmental Policy Integrated Climate (EPIC) model and the Agricultural Policy Environmental eXtender (APEX) model 1/.

CRP contract data are sorted to identify acres in grass, trees, and buffers. For whole-field (grass and tree plantings), the models are used to estimate per-acre N, P, and sediment losses from CRP fields, as compared with the losses that would occur if those fields instead cropped, i.e., "with-" vs. "without-" CRP scenarios. The impact of CRP is estimated as the difference between these two scenarios. N and P impacts of CRP buffers are estimated based on the sediment, N, and P losses from the (state) average acres buffered by a typical buffer enrollment and trapping efficiency estimates from NRCS. The total impact on sediment, N, and P is the sum of the grass, tree, and buffer impacts.

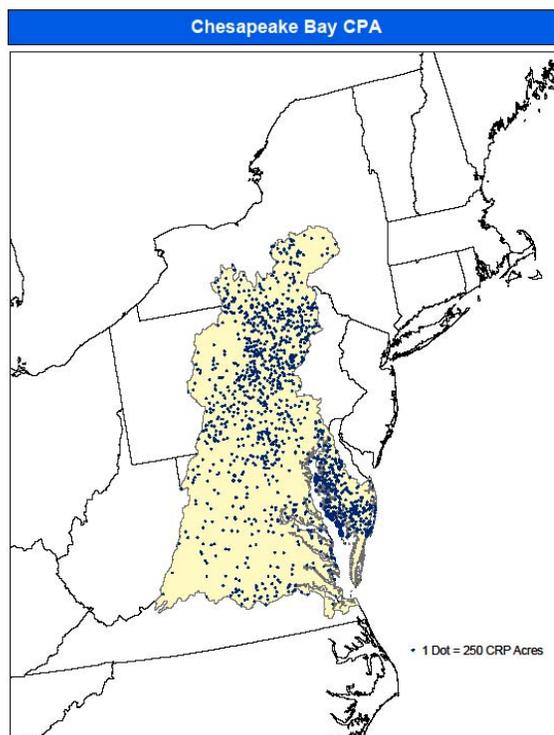

1/ Food, and Agricultural Policy Research Institute (FAPRI). [Estimating the Water Quality, Air Quality, and Soil Carbon Benefits of the Conservation Reserve Program](#). FAPRI -UMC Report #01-07. University of Missouri, Columbia, MO. January 2007.

## **Carbon Sequestration Estimates**

Estimates of total carbon sequestered are developed using CRP contract data. These data are sorted to identify CRP acres in grass, wetlands, and trees. For grasslands and wetlands, estimates of the carbon sequestered per acre are obtained from published reports, and estimates developed by the Agricultural Research Service and U.S. Geological Survey. These data are merged with CRP contract data to estimate total carbon sequestered by CRP grasslands and wetlands. Because the carbon sequestered by forestlands varies by tree species and the age of the stand, the CRP tree data are sorted by region and age. U.S. Forest Service estimates of carbon sequestered per acre by region, tree species, and age are merged with the corresponding data from CRP contract data. Total carbon sequestered is the sum of the grassland, wetland, and forestland estimates.

# *Environmental Benefits of the Conservation Reserve Program*

## Chesapeake Bay Basin 2010

<u>Fiscal Year</u>		2006	2007	2008	2009	2010
<b>Land Enrolled</b>	1,000 acres	314	322	316	303	302
<b>In Buffers</b>	1,000 acres	96	100	105	103	107
<b>In Wetlands</b>	1,000 acres	5	5	5	6	6
<b>Reductions (intercepted by buffers or not leaving field)</b>						
<b>Sediment</b>	million tons	11	11	11	11	11
<b>Nitrogen</b>	million lbs	26	27	27	27	27
<b>Phosphorus</b>	million lbs	7	7	7	7	7
<b>Carbon Sequestered</b>	million metric tons	0.5	0.5	0.5	0.5	0.5

### **CRP buffers intercept sediment, nitrogen, and phosphorus from farmed fields:**

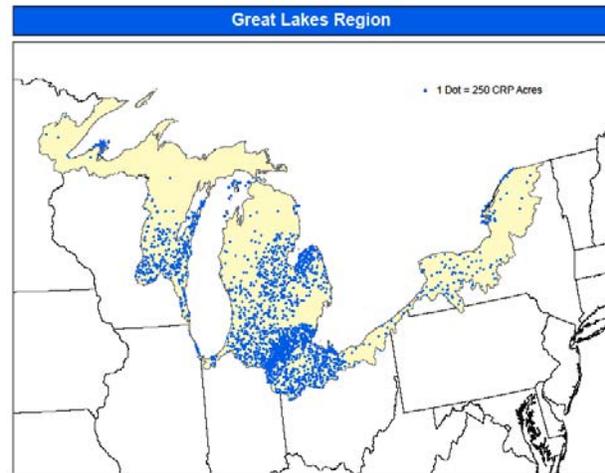

- In the Chesapeake Bay watershed, buffers intercepted 8 million tons of sediment, 16 million pounds of nitrogen, and 5 million pounds of phosphorus in 2010.

### **Fields enrolled in CRP reduce the amount of nitrogen, phosphorus, and sediment leaving fields in runoff and percolate:**

- CRP reduces the nitrogen, phosphorus, and sediment leaving a field in runoff and percolate. Ninety five percent less nitrogen and 86 percent less phosphorus is lost from CRP fields than fields that are not in CRP.

# Environmental Benefits of the Conservation Reserve Program

## Great Lakes Region 2010

		2006	2007	2008	2009	2010
<b>Land Enrolled</b>						
	1,000 acres	602	613	565	531	507
<b>In Buffers</b>						
	1,000 acres	100	104	106	103	106
<b>In Wetlands</b>						
	1,000 acres	28	31	32	34	33
<b>Reductions (intercepted by buffers or not leaving field)</b>						
<b>Sediment</b>	million tons	4	4	4	4	4
<b>Nitrogen</b>	million lbs	16	17	17	15	15
<b>Phosphorus</b>	million lbs	3	3	3	3	3
<b>Carbon Sequestered</b>	million metric tons	0.8	0.8	0.8	0.8	0.7

### CRP buffers intercept sediment, nitrogen, and phosphorus from farmed fields:

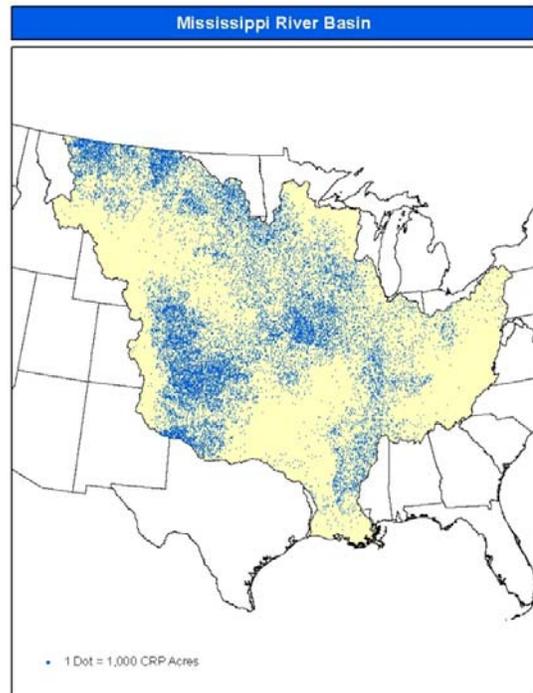

- In 2010, in the Great Lakes Region 106 thousand acres of CRP grass filters and riparian buffers intercepted 3 million tons of sediment, 10 million pounds of nitrogen, 3 million pounds of phosphorus, and other contaminants before they entered waterways.

### Fields enrolled in CRP reduce nitrogen, phosphorus, and sediment leaving fields in runoff and percolate:

- CRP reduces the nitrogen, phosphorus, and sediment leaving a field in runoff and percolate. 95 percent less nitrogen and 86 percent less phosphorus is lost from CRP fields. In 2010, grass and tree plantings reduced nitrate loss by 3 million pounds.

# *Environmental Benefits of the Conservation Reserve Program*

## Mississippi River Basin 2010

	<u>Fiscal Year</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>	<u>2010</u>
<b>Land Enrolled</b>	million acres	24.4	25.0	23.4	22.7	21.0
<b>In Buffers</b>	million acres	1.27	1.31	1.39	1.32	1.40
<b>In Wetland</b>	million acres	1.22	1.27	1.21	1.22	1.29
<b>HEL</b>	million acres	18.4	18.6	17.3	16.7	14.9
<b>Reductions (intercepted by buffers or not leaving field)</b>						
<b>Sediment</b>	million tons	170	175	175	164	159
<b>Nitrogen</b>	million lbs	442	454	430	431	431
<b>Phosphorus</b>	million lbs	90	93	89	89	89
<b>Carbon Sequestered</b>	million metric tons	32	30	30	29	28

### **CRP improves water quality.**

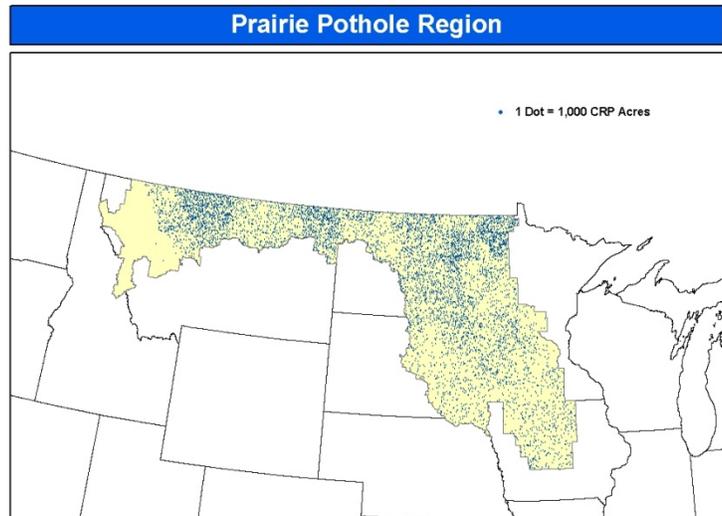

- In 2010, CRP grass filters and riparian buffers intercepted 113 million tons of sediment in the Mississippi River Basin, 269 million pounds of nitrogen, 54 million pounds of phosphorus, and other contaminants, before they entered waterways.
- In 2010, grass and tree plantings reduced nitrate loss by 60 million pounds. Nitrate is a form of nitrogen that is biologically available to algae, and excess nitrate contributes to the formation of the Gulf of Mexico hypoxic zone.
- Wetlands restored and constructed by CRP improve water quality by converting nitrate / nitrogen into benign atmospheric nitrogen through denitrification. In 2010, Iowa's 65 CREP constructed wetland projects on 1,808 acres reduced nitrate runoff by nearly 650,000 pounds.

### **CRP enhances wildlife habitat and reduces downstream flood damage**

- In prime ringed-neck-pheasant habitat, a 4 percent increase in CRP herbaceous vegetation was associated with a 22 percent increase in pheasant counts.
- CRP lands reduce downstream flood damage by helping to reduce peak flows after storm events by holding and slowly releasing the stormwater.

# Environmental Benefits of the Conservation Reserve Program

## Prairie Pothole Region 2010

		2006	2007	2008	2009	2010
<b>Land Enrolled</b>	million acres	8.4	8.5	7.7	7.4	7.2
<b>In Wetlands</b>	1,000 acres	1,645	1,661	1,567	1,558	1581
<b>In Buffers</b>	1,000 acres	309	314	316	321	321
<b>Reductions (intercepted by buffers or not leaving field)</b>						
<b>Sediment</b>	million tons	22	23	23	23	23
<b>Nitrogen</b>	million lbs	113	116	113	113	113
<b>Phosphorus</b>	million lbs	11	12	12	11	11
<b>Carbon Sequestered</b>	million metric tons	10	10	9	9	9

### CRP improves water quality.

- CRP buffers intercept sediment, nitrogen, and phosphorus from farmed fields in the Prairie Pothole Region. In 2010, 321 thousand acres of CRP grass filters and riparian buffers intercepted 20 million tons of sediment in the Prairie Pothole Region, 70 million pounds of nitrogen, and 10 million pounds of phosphorus.
- CRP reduces nitrogen, phosphorus, and sediment leaving fields. In 2010, grass and tree plantings reduced nitrate loss by 31 million pounds.

### CRP enhances wildlife habitat.

- The CRP was identified as a ‘Reason for Hope’ for grassland birds in the ‘*State of the Birds*’ report (FWS, 2009).
- CRP increased Prairie Pothole duck populations by an average of 2 million ducks per year between 1992 and 2004 (FWS).

### CRP can reduce downstream flood damage.

- CRP restores Prairie Pothole floodwater storage function – USGS estimated that CRP wetland catchments could store approximately 458,000 acre-feet of water annually.

### CRP Eligibility

Must have appropriate cropping history, or be marginal pasture in or near a riparian area of be subject to an expiring CRP contract.

AND

- For general signup, must be: highly erodible, located in a State or National conservation priority area, or under an expiring CRP contract.
- For continuous signup, must be suitable to serve as one of a number of conservation practices, such as a wetland restoration, filterstrip, riparian buffer, or field windbreak; or be eligible for CREP enrollment.

### Cropping History

Under the 2002 Farm Bill, must have been planted or considered planted to an agricultural commodity in 4 of the 6 years prior to 2002. Land coming out of CRP is considered planted (unless it is in trees), as is hay in rotation. Updated to 4 of 6 years prior to 2008 in the 2008 Farm Bill.

### Annual Rental payment:

- Based on soil-specific rental rates.
- Adjusted for each particular soil's productivity.
- Reflect rental rates for comparable land in dryland crop production.

### Signing Incentive payment (SIP):

- A one-time payment of \$100/acre when contract is approved.
- Applies to specified continuous signup practices (see Practice description table in the Appendix).

### Practice Incentive payment (PIP):

- A one-time payment made when practice installation is complete.
- Amount equal to 40 percent of total installation cost.
- Applies to specified continuous signup practices (see Practice description table in the Appendix).

### Haying/Grazing Adjustment:

- Reflects annual rental payment reductions (typically 25 percent) taken when participant hays or grazes CRP acreage.
- Participants allowed to hay or graze in response to emergency (drought) or when undertaking managed haying or grazing.

### Cost-Share payment:

- Amount equal to 50 percent of practice installation costs.

## CONSERVATION RESERVE PROGRAM

Under the Conservation Reserve Program (CRP), the U. S. Department of Agriculture (USDA) establishes contracts with agricultural producers to retire highly erodible and other environmentally sensitive cropland and pasture. During the 10- to 15-year CRP contract period, farmland is converted to grass, trees, wildlife cover, or other conservation uses providing environmental benefits, including surface water quality improvement, wildlife habitat creation, carbon sequestration, preservation of soil productivity, protection of groundwater quality, and reduction of offsite wind erosion damages. The program also assists farmers by providing a dependable source of income. The program was established by the Food Security Act of 1985, and was later amended by the Food, Agriculture, Conservation, and Trade Act of 1990, the Federal Agriculture Improvement and Reform Act of 1996, the Farm Security and Rural Investment Act of 2002, and the Food, Conservation, and Energy Act of 2008.

The CRP is administered by USDA's Farm Service Agency with technical assistance from USDA's Natural Resources Conservation Service and Forest Service, and from non-Federal technical service providers. Participants receive annual rental payments during the contract period and half the cost of establishing conservation covers. There are two primary ways for farmers and ranchers to participate in the CRP: general sign-up and continuous sign-up. Continuous sign-up includes the Conservation Reserve Enhancement Program (CREP) and the Farmable Wetlands Program.

### CRP LEGISLATIVE AND PROGRAMMATIC HISTORY

Title XII of the **Food Security Act of 1985** established the Conservation Reserve Program (CRP) to assist owners and operators in conserving and improving soil, water, and

wildlife resources on their farms and ranches by converting highly erodible and other environmentally sensitive cropland and marginal pasture to long-term resource conserving covers. In exchange for annual rental payments and cost-share assistance of up to 50 percent of cover establishment costs, agricultural landowners and operators agree to establish and maintain an approved permanent cover on enrolled acreage for 10 to 15 years. The 1985 Act directed the Department of Agriculture to enroll 40 to 45 million acres by 1990 with a primary goal of reducing soil erosion on highly erodible cropland. Secondary objectives included protecting the Nation's long-run capability to produce food and fiber, reducing sedimentation, improving water quality, fostering wildlife habitat, curbing production of surplus commodities, and providing income support for farmers. Enrollment is generally limited to 25 percent of the cropland within each county.

The **Food, Agriculture, Conservation, and Trade Act of 1990** extended CRP through 1995 and expanded types of land eligible for enrollment to include lands that could reduce on-site or off-site threats to water quality if removed from production. Following 1990 Act passage, USDA's Farm Service Agency adopted new rental payment caps based on soil-specific productivity-based rental rates, and developed an environmental benefits index (EBI) to rank offers.

The **Federal Agriculture Improvement and Reform Act of 1996** re-authorized CRP enrollment through 2002 and set a maximum enrollment of 36.4 million acres at any one time.

Following passage of the 1996 Act, FSA modified the Environmental Benefits Index (EBI) to explicitly include a wildlife benefits component, which was given equal weight with soil erosion and water quality benefits.

Also in 1996, **USDA initiated** enrollment of selected practices, such as filter strips and riparian buffers, on a continuous basis without competition. An annual incentive payment equal to 20 percent of the annual rental rate was provided for many of these practices. In 1997, FSA created the Conservation Reserve Enhancement Program (CREP), further advancing CRP's environmental targeting. CREP authorizes State-Federal conservation partnerships that address specific State and nationally significant water quality, soil erosion, and wildlife habitat concerns related to agriculture. CREP enrollment is held on a continuous basis; enrollment may include both general and continuous sign-up practices, and additional financial incentives are generally provided. An up-front signing payment and a practice incentive payment were established in 2000 to further enhance continuous enrollment, including CREP. Descriptions of practices and corresponding payment provisions are provided in the Appendix.

The **FY 2001 Agriculture Appropriations Act** established the Farmable Wetland Program (FWP), which provided for non-competitive enrollment under continuous sign-up provisions and incentives for up to 500,000 acres of small non-flood plain wetlands and adjacent uplands in 6 States (Nebraska, Iowa, Minnesota, North Dakota, South Dakota, and Montana). Enrollment was limited to 100,000 acres per State.

The **Farm Security and Rural Investment Act of 2002** extended CRP enrollment authority through 2007 and increased the enrollment cap by 2.8 million acres to 39.2 million acres. Basic cropland eligibility is re-defined to be land that has been cropped or considered cropped in at least 4 of the 6 years preceding enactment. Previously, basic cropland eligibility required cropping in at least 2 of the 5 years preceding sign-up.

In addition, the 2002 Act permitted non-emergency (managed) harvesting of forage (subject to the requirement that environmental benefits be maintained or enhanced) and required equal consideration be given for soil

erosion, water quality, and wildlife. Practices eligible under marginal pasture criteria, which have no cropping history requirement, are expanded to permit appropriate vegetative covers, rather than requiring the land be planted only to trees.

Other changes included extending eligibility to field remnants made infeasible for farming where buffer practices are enrolled; cropland where enrollment would provide water conservation benefits; and land subject to expiring CRP contracts. The 2002 Act also expanded FWP from the original six States to all States and raised the enrollment cap to 1,000,000 acres, while keeping the 100,000 acre State maximum. While maximum wetland size was increased to 10 acres, only 5 acres are eligible to receive rental payments.

**Re-enrollment and extension of 2007- to 2010-expiring contracts (REX).** To ensure that CRP's benefits continue without interruption, FSA in 2006 offered holders of contracts set to expire between 2007 and 2010 (28 million acres) the opportunity to re-enroll or extend their contracts. FSA divided expiring contracts into five equal-size categories (quintiles) based on environmental benefits index (EBI) scores of the land under contract. FSA offered the quintile with the highest EBI scores new 10 or 15-year contracts. The 2<sup>nd</sup> highest quintile were offered 5-year contract extensions, the 3<sup>rd</sup> highest were offered 4-year extensions, and so forth. This action preserved farmers' ability to protect America's most sensitive agricultural lands. Holders of approximately 82% of expiring contract acres were approved for re-enrollment or extension. Updated tables detailing REX results as of February, 2008 are provided in the Appendix.

The **Emergency Supplemental Appropriations Act of 2006** established the Emergency Forestry Conservation Reserve Program (EFCRP). Provides assistance to timberland damaged by the Gulf Coast Hurricanes of 2005 (mainly Katrina and Rita). Acreage enrolled does not count against the CRP enrollment cap.

The **Food, Conservation, and Energy Act of 2008** extended Conservation Reserve Program (CRP) enrollment authority through September 30, 2012 and requires that enrollment be reduced to no more than 32 million acres beginning October 1, 2009. Created the Transitions Incentive Program to encourage the sale or lease of expiring CRP lands to beginning or socially disadvantaged farmers.

Other changes include: (1) expansion of Farmable Wetland Pilot Program eligibility criteria; (2) provision of 50-percent cost-share for tree thinning activities; (3) implementation of new payment limitation applicability and new adjusted gross income based eligibility criteria, (4) updated eligibility to require cropping history in at least 4 of 6 years during 2002 to 2007, and (5) provided additional authority to waive county cropland enrollment limit.

**General Sign-up.** Landowners and operators with eligible lands compete nationally for acceptance based on an environmental benefits index (EBI) during specified enrollment periods. Producers may submit offers below soil-specific maximum rental rates to increase their EBI ranking.

**Continuous Sign-up**

- **Non-CREP.** Landowners and operators with eligible lands may enroll certain high priority conservation practices, such as filter strips and riparian buffers, at any time during the year without competition. In addition to annual soil rental payment and cost-share assistance, many practices are eligible for additional annual and one-time up-front financial incentives.
- **Conservation Reserve Enhancement Program (CREP).** Under federal-state cooperative conservation efforts, landowners and operators implement projects designed to address specific environmental objectives through targeted CRP enrollments. Sign-up is held on a continuous non-competitive basis and additional financial incentives are generally provided.
- **Farmable Wetland Program (FWP).** Landowners and operators enroll and restore small cropped wetlands and other lands on a continuous sign-up basis. Lands are also eligible for additional annual and one-time up-front financial incentives. Includes new practices added by the 2008 Farm Bill.

## CONSERVATION RESERVE PROGRAM ENROLLMENT AND OUTLAY HISTORY

Fiscal Year	Cumulative Enrollment 1/	Rental Payments 2/	Cost-Share Payments 3/	Incentive Payments 4/	Total Financial	Tech. Asst. Outlays 5/	Total Outlays
	(Million Acres)	(Million Dollars)

1/ Acres under contract at end of fiscal year.

2/ Rental payments in a fiscal year apply to acres under contract in the previous fiscal year. Includes miscellaneous adjustments and adjustments for haying/grazing usage.

3/ Cost-share payments are made after cover establishment work is done. For contracts beginning in a given year, payments can occur over several years.

4/ Signing and Practice Incentive payments for continuous sign-up enrollment.

5/ Technical assistance outlays are generally paid to Natural Resources Conservation Service and Forest Service in the year sign-ups are held. About 90-95 percent of outlays have gone to NRCS and about 5-10 percent to FS.

1/ Contracts in effect September 30, 2010.

2/ Includes both introduced and native grasses and legumes.

3/ Includes both softwood and hardwood trees.

4/ Includes both flood-plain and non-floodplain wetlands enrolled prior to 2003.

**Note:**

Cost-share data are estimates (not actuals), and represent 50% of the authorized installation costs. CP10, CP11, and CP12 are not eligible for cost-share, except under certain circumstances.

20	General	January 18 - February 11, 2000	G, K, M-O, Q
21	Continuous	October 1, 1999 - April 6, 2000	L, P
22	Continuous	April 7 - September 30, 2000	L, P
23	Continuous	October 1, 2000 - September 30, 2001	L, P
24	Continuous	October 1, 2001 - September 30, 2002	L, P, R
25	Continuous	October 1, 2002 - May 5, 2003	L, P, R
26	General	May 5, 2003 - June 13, 2003	K, N, Q, W
27	Continuous	May 6, 2003 - September 30, 2003	L, P, R
28	Continuous	October 1, 2003 - September 30, 2004	L, P, R, S
29	General	August 30, 2004 - September 24, 2004	K, N, Q, W
30	Continuous	October 1, 2004 - September 30, 2005	L, P, R, S, T, U
31	Continuous	October 1, 2005- September 30, 2006	L, P, R, S, T, U
32	REX 2/	April 2006, June 2006	Expiring Contracts
33	General	March 22, 2006 - April 28, 2006	K, N, Q, W
35	Continuous	October 1, 2006- September 30, 2007	L, P, R, S, T, U
36	Continuous	October 1, 2007- September 30, 2008	L, P, R, S, T, U
37	Continuous	October 1, 2008 - September 30, 2009	L, P, R, S, T, U, V
38	Continuous	October 1, 2009 - September 30, 2010	L, P, R, S, T, U, V
39	General	August 2, 2010 - August 27, 2010	K, N, Q, W

1/ See attached eligibility criteria description.

2/ Re-enrollments under new contracts only.

Eligibility Criteria:

- A Land capability classes 6 - 8
- B Land capability classes 2 - 5 with predicted average annual erosion rate greater than 3T
- C Land capability classes 2 - 5 with predicted average annual erosion rate greater than 2T and with gully erosion
- D Land with EI  $\geq$  8 and predicted average annual erosion rate greater than T
- E Land for filter strips alongside wetlands, streams, or other water bodies
- F Land for tree planting-eligible when 1/3 of field meets criteria A or Class 2-5 soil with predicted average annual erosion rate greater than 2T
- G Land having evidence of scour erosion caused by out-of-bank water flows
- H Wetland as follows:
  - cropped wetland of at least 6 acres
  - a field of which 1/3 or more is cropped wetland
  - a field of 6 to 9 acres on which wetlands are present
- I Land in designated national conservation priority areas
  - Chesapeake Bay Region
  - Great Lakes Region
  - Long Island Sound RegionLand in designated State water quality priority areas
  - Public wellhead protection area established by EPA
  - Hydrologic Unit Areas approved by the Secretary
  - Land located in areas designated as Clean Water Act "319" priority areas
- J Lands to be established in specified eligible practices, including filter strips, riparian buffers, windbreaks, grass waterways, and salt tolerant grasses  
Wetland eligibility suspended
- K Land with an EI  $\geq$  8, regardless of the predicted annual erosion rate relative to T
- L Eligible for continuous sign-up beginning with sign-up 14:
  - Land identified as suitable for field windbreaks, grass waterways, shallow water areas for wildlife, contour grass strips, shelterbelts, living snow fences, salt tolerant vegetation, filter strips, or riparian buffers
  - Marginal pasture land suitable for riparian buffers devoted to trees.
  - Land within a wellhead protection area established by EPA
- M Land classified as highly erodible land (HEL) according to conservation compliance provisions.
- N Land in designated national conservation priority areas:
  - Chesapeake Bay Region
  - Great Lakes Region
  - Long Island Sound Region
  - Prairie Pothole RegionLand in designated State water, air, or wildlife quality priority areas
- O Wetlands, including associated acreage, expiring Water Bank lands, and land serving as buffers for non-cropped wetlands
- P Land suitable for cross wind trap strips
- Q Land in the Loblolly Pine national conservation priority area
- R Wetland and buffer acreage according to Farmable Wetland Program provisions
- S Restoration of flood plain wetland, including bottomland hardwood tree plantings
- T Establishment of upland bird habitat buffers
- U Restoration of non-flood plain wetland and playa lakes
- V Constructed wetlands, aquaculture ponds, and flooded prairie wetlands
- W Land under CRP contracts that expire during the year of the signup.

## CRP Practices and Payment Provisions 1/

Practice		Sign-up Type 2/	Annual Rental Pmt. 3/	Signing Incentive Pmt. 4/	Practice Incentive Pmt. 4/
CP1	Introduced grasses and legumes - new seedings	General	SRR	No	No
CP2	Native grasses - new seedings	General	SRR	No	No
CP3	New softwood trees (not longleaf pine)	General	SRR	No	No
CP3A	New hardwood trees	General	SRR	No	No
CP3A	New longleaf pines (see also CP36)	General	SRR	No	No

CP40	Aquaculture Wetlands	Continuous	SRR+10%	Yes	Yes
CP41	Flooded Prairie Wetlands	Continuous	SRR+10%	Yes	Yes
--	Wellhead protection areas	Continuous	SRR+10%	Yes	Yes

- 1/ Practices enrolled under CREP may be eligible for additional incentives.
- 2/ General sign-up practices may be enrolled under certain CREP agreements and may be eligible for additional financial incentives.
- 3/ Soil rental rates (SRR) are soil-specific maximum rental payment rates for predominant soils (up to 3) for the land offered. Beginning with general sign-up 16, producers offering land for general sign-up enrollment requesting rental payments below the maximum receive higher EBI scores. Participants in continuous sign-up receive the maximum allowable rate. Annual incentives of 20% and 10% of annual rental rate are provided as indicated. Practices enrolled under CREP may be eligible for additional incentives.
- 4/ Signing incentive payments (SIP) implemented in June 2000 are one-time up-front bonus payments of \$100 per acre.
- 5/ Practice incentive payments (PIP) implemented in June 2000 equal 40-percent of practice installation cost.
- 6/ For marginal pasture, a county-specific flat rate is used instead of the SRR.
- 7/ Incentives approved March 2008.

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, 1400 Independence Ave., SW, Washington, D.C. 20250-9410 or call (800) 795-3272 (voice) or (202)-720-6382 (TDD). USDA is an equal opportunity provider and employer.
