From the Alaska FSA State Executive Director

I hope you had a Merry Christmas filled with love, laughter, and joy, surrounded by friends, family and those you hold dear. Did you eat your favorite foods and cherish long held traditions? I hope it was delicious.

Can you believe that we are just days away from 2023? As one year ends and another begins, I like to take time to both reflect and plan ahead. If you were to make a list of the significant events of your life from 2022, what would it include? And if you were to make another list of outcomes or accomplishments for 2023, what are you planning for? In both farming and in life, it pays to get a little organized. What's not working? What would you like more of? A year from now when you're looking back on 2023, what do you hope is on your "noteworthy" list? Cheers to making it happen.

Reminders:

- Acreage Reporting deadline for Honey, January 2, 2023.
- New Years Day, State and County FSA Offices closed, January 2, 2023.

- Birthday of Dr. Martin Luther King, Jr. Observed, State and County FSA Offices closed, January 16, 2023.
- The FSCSC application period for 2022 ends on January 31, 2023.

Amy Pettit State Executive Director Alaska Farm Service Agency

USDA Reminds Alaska Producers to File Crop Acreage Reports

Agricultural producers in Alaska who have not yet completed their <u>crop acreage reports</u> after planting should make an appointment with their U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) service center before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

The following acreage reporting dates are applicable in Alaska:

January 2, 2023 Honey May 31, 2023 Nursery

July 15, 2023 All other spring planted crops, CRP, Perennial Forage Value-loss crops and controlled environment crops

(except Nursery)

December 15, 2023 Fall-Seeded Small Grains

To file a crop acreage report, producers need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If crops are covered by the Noninsured Crop Disaster Assistance Program, acreage reports should be submitted by the applicable state, county, or crop-specific reporting deadline or 15 calendar days before grazing or harvesting of the crop begins.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to because of a natural disaster.

Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA's Risk Management Agency.

FSA offers continuous certification for perennial forage. This means after perennial forage is reported once and the producer elects continuous certification, the certification remains in effect until a change is made. Check with FSA at the local USDA Service Center for more information on continuous certification.

New Option to View, Print and Label Maps on Farmers.gov

Producers with an eAuth account linked to their USDA customer record can now access their FSA farm records, maps and common land units by logging into farmers.gov. A new feature will allow producers to export field boundaries as shapefiles and import and view other shapefiles, such as precision agriculture boundaries. This will allow producers to view, print and label their own maps for acreage reporting purposes.

Producers who have authority to act on behalf of another customer as a grantee via form FSA-211 Power of Attorney, Business Partner Signature Authority, along with other signature types, or as a member of a business can now access information in the farmers.gov portal.

Producers can learn how to use the farmers.gov Farm Records Mapping functionality with this fact sheet and these video tutorials.

More Information

For questions, please contact the Northern County FSA office at 907-895-4242 ext 150 and the Southern County FSA Office at 907-761-7773.

USDA Announces Assistance for On-Farm Food Safety Expenses for Specialty Crop Growers

New Program Part of Broader Effort to Transform Food System, Create Jobs

Agriculture Secretary Tom Vilsack announced that the U.S. Department of Agriculture (USDA) plans to provide up to \$200 million in assistance for specialty crop producers who incur eligible on-farm food safety program expenses to obtain or renew a food safety certification in calendar years 2022 or 2023. USDA's new Food Safety Certification for Specialty Crops (FSCSC) program will help to offset costs for specialty crop producers to comply with regulatory requirements and market-driven food safety certification requirements, which is part of USDA's broader effort to transform the food system to create a more level playing field for small and medium producers and a more balanced, equitable economy for everyone working in food and agriculture.

Specialty crop operations can apply for assistance for eligible expenses related to a 2022 food safety certificate issued on or after June 21, 2022, beginning June 27, 2022. USDA is delivering FSCSC to provide critical assistance for specialty crop operations, with an emphasis on equity in program delivery while building on lessons learned from the COVID-19 pandemic and supply chain disruptions. Vilsack made the announcement from Hollis, N.H., where he toured a local, family-owned farm and highlighted USDA's efforts to help reduce costs for farmers and support local economies by providing significant funding to cut regulatory costs and increase market opportunities for farmers in New Hampshire and across the nation.

Program Details

FSCSC will assist specialty crop operations that incurred eligible on-farm food safety certification and related expenses related to obtaining or renewing a food safety certification in calendar years 2022 and 2023. For each year, FSCSC covers a percentage of the specialty crop operation's cost of obtaining or renewing their certification, as well as a portion of their related expenses.

To be eligible for FSCSC, the applicant must be a specialty crop operation; meet the definition of a small business or very small business; and have paid eligible expenses related to the 2022 (issued on or after June 21, 2022) or 2023 certification.

Specialty crop operations may receive assistance for the following costs:

- Developing a food safety plan for first-time food safety certification.
- Maintaining or updating an existing food safety plan.
- Food safety certification.
- Certification upload fees.
- Microbiological testing for products, soil amendments and water.
- Training

FSCSC payments are calculated separately for each category of eligible costs. A higher payment rate has been set for socially disadvantaged, limited resource, beginning and veteran farmers and ranchers. Details about the payment rates and limitations can be found at farmers.gov/food-safety.

Applying for Assistance

The FSCSC application period for 2022 ends on January 31, 2023, and the application period for 2023 will be announced at a later date. Interested specialty crop producers can apply by completing the FSA-888, Food Safety Certification for Specialty Crops Program (FSCSC) application. The application, along with other required documents, can be submitted to the FSA office at any USDA Service Center nationwide by mail, fax, hand delivery or via electronic means. Producers can visit farmers.gov/service-locator to find their local FSA office. Specialty crop producers can also call 877-508-8364 to speak directly with a USDA employee ready to assist.

Producers can visit <u>farmers.gov/food-safety</u> for additional program details, eligibility information and forms needed to apply.

USDA Encourages Producers to Consider NAP Risk Protection Coverage Before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx?utm_medium=email&utm_source=govdelivery.

The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the "buy-up" option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

For all coverage levels, the NAP service fee is the lesser of \$325 per crop or \$825 per producer per county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties.

For Alaska, 2023 Spring deadlines for crop year 2023 coverage:

The following crops in Alaska have a NAP application deadline of March 15, 2023:

Spring planted annual crops (vegetables)

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to http://offices.usda.gov.

For Alaska, 2023 Fall deadlines for crop year 2024 coverage:

The following crops in Alaska have a NAP application deadline of **September 01**, **2023**: **Floriculture (Peonies)**, **Aquaculture, Turf Grass**

The following crops in Alaska have a NAP application deadline of **September 30**, **2023**: **Perennial Grass Forage (Perennial Grasses intended use seed)**, **Honey**

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#. Producers can use the USDA Cost Estimator.

https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx?utm_medium=email&utm_source=govdelivery, to predict insurance premium costs.

USDA Previews Crop and Revenue Loss Assistance for Agricultural Producers

New Programs Will Provide Additional Pandemic and Natural Disaster Assistance for 2020 and 2021; Deadline Announced for Previous Emergency Relief

Agriculture Secretary Tom Vilsack today announced plans for additional emergency relief and pandemic assistance from the U.S. Department of Agriculture (USDA). USDA is preparing to roll out the Emergency Relief Program (ERP) Phase Two as well as the new Pandemic Assistance Revenue Program (PARP), which are two programs to help offset crop and revenue losses for producers. USDA is sharing early information to help producers gather documents and train front-line staff on the new approach.

ERP Phase Two will assist eligible agricultural producers who suffered eligible crop losses, measured through decreases in revenue, due to wildfires, hurricanes, floods, derechos, excessive heat, winter storms, freeze (including a polar vortex), smoke exposure, excessive moisture and qualifying droughts occurring in calendar years 2020 and 2021.

PARP will assist eligible producers of agricultural commodities who experienced revenue decreases in calendar year 2020 compared to 2018 or 2019 due to the COVID-19 pandemic. PARP will help address gaps in previous pandemic assistance, which was targeted at price loss or lack of market access, rather than overall revenue losses.

Emergency Relief Program Phase Two

ERP is authorized under the *Extending Government Funding and Delivering Emergency Assistance Act*, which includes \$10 billion in assistance to agricultural producers impacted by wildfires, droughts, hurricanes, winter storms and other eligible disasters experienced during calendar years 2020 and 2021.

Phase Two builds on ERP Phase One, which was <u>rolled out in May 2022</u> and has since paid more than \$7.1 billion to producers who incurred eligible crop losses that were covered by federal crop insurance or Non-insured Crop Disaster Assistance Program.

ERP Phase Two includes producers who suffered eligible losses but may not have received program benefits in Phase One. To be eligible for Phase Two, producers must have suffered a loss in allowable gross revenue as defined in forthcoming program regulations in 2020 or 2021 due to necessary expenses related to losses of eligible crops from a qualifying natural disaster event.

Eligible crops include both traditional insurable commodities and specialty crops that are produced in the United States as part of a farming operation and are intended to be commercially marketed. Like other emergency relief and pandemic assistance programs, USDA's Farm Service Agency (FSA) continues to look for ways to simplify the process for both staff and producers while reducing the paperwork burden. The design of ERP Phase Two is part of that effort.

In general, ERP Phase Two payments are expected to be based on the difference in certain farm revenue between a typical year of revenue as will be specified in program regulations for the producer and the disaster year. ERP Phase Two assistance is targeted to the remaining needs of producers impacted by qualifying natural disaster events, while avoiding windfalls or duplicative payments. Details will be available when the rule is published later this year.

Deadline for Emergency Relief Program Phase One

Producers who are eligible for assistance through ERP Phase One have until Friday, Dec. 16, 2022, to contact FSA at their local <u>USDA Service Center</u> to receive program benefits. Going forward, if any additional ERP Phase One prefilled applications are generated due to corrections or other circumstances, there will be a 30-day deadline from the date of notification for that particular application.

Pandemic Assistance Revenue Program

PARP is authorized and funded by the Consolidated Appropriations Act of 2021.

To be eligible for PARP, an agricultural producer must have been in the business of farming during at least part of the 2020 calendar year and had a certain threshold decrease in allowable gross revenue for the 2020 calendar year, as compared to 2018 or 2019. Exact details on the calculations and eligibility will be available when the forthcoming rule is published.

How Producers Can Prepare

ERP Phase Two and PARP will use revenue information that is readily available from most tax records. FSA encourages producers to have their tax documents from the past few years and supporting materials ready, as explained further below. Producers will need similar

documentation to what was needed for the Coronavirus Food Assistance Program (CFAP) Phase Two, where a producer could use 2018 or 2019 as the benchmark year relative to the disaster year.

In the coming weeks, USDA will provide additional information on how to apply for assistance through ERP Phase Two and PARP. In the meantime, producers are encouraged to begin gathering supporting documentation including:

- Schedule F (Form 1040); and
- Profit or Loss from Farming or similar tax documents for tax years 2018, 2019, 2020, 2021 and 2022 for ERP and for calendar years 2018, 2019 and 2020 for PARP.

Producers should also have, or be prepared to have, the following forms on file for both ERP and PARP program participation:

- Form AD-2047, Customer Data Worksheet (as applicable to the program participant);
- Form CCC-902, Farm Operating Plan for an individual or legal entity;
- Form CCC-901, Member Information for Legal Entities (if applicable); and
- Form AD-1026 Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms on file. However, those who are uncertain or want to confirm should contact FSA at their local USDA Service Center.

In addition to the forms listed above, underserved producers are encouraged to register their status with FSA, using Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, as certain existing permanent and ad-hoc disaster programs provide increased benefits or reduced fees and premiums.

Through proactive communications and outreach, USDA will keep producers and stakeholders informed as program eligibility, application and implementation details unfold.

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the *Farm Loan Discovery Tool* on <u>farmers.gov</u> to find information on USDA farm loans that may best fit their operations.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the "Start" button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The Farm Loan Discovery Tool is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the My Financial Information feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact the Northern County FSA office at 907-895-4242 ext 150 and the Southern County FSA Office at 907-761-7773 or visit farmers.gov.

Update Your Records

FSA is cleaning up our producer record database and needs your help. Please report any changes of address, zip code, phone number, email address or an incorrect name or business name on file to our office. You should also report changes in your farm operation, like the addition of a farm by lease or purchase. You should also report any changes to your operation in which you reorganize to form a Trust, LLC or other legal entity.

FSA and NRCS program participants are required to promptly report changes in their farming operation to the County Committee in writing and to update their *Farm Operating Plan* on form CCC-902.

To update your records, you can find contact information at farmers.gov/service-locator.

If you would need to request an accommodation to attend or participate in these meetings and/or events, please contact the Northern County FSA Service Center, at (907) 895-4242, ext. 150 or the Southern County FSA Service Center, at (907) 761-7773 to request accommodations (e.g., an interpreter, translator, seating arrangements, etc.) or materials in an alternative format (e.g., Braille, large print, audiotape – captioning, etc.). Dial 7-1-1 to access telecommunication relay services.
