County Committee Election Results

County committee elections are over, the ballots are counted and the results are in...

Northern County: Robert Green of Delta Junction was elected to represent LAA 3 and Julia Murgage of Delta Junction will serve as the first alternate.

Southern County: Christine Ford of Kodiak was elected to represent LAA 1 and Paulette Selkirk of Kodiak will serve as the first alternate.

Elected county committee members serve a three-year term and are responsible for making decisions on FSA disaster, conservation, commodity, and price support programs, as well as other important federal farm program issues.

County committee members are a valuable asset because they are comprised of local producers who participate in FSA programs themselves and have a direct connection to farmers and ranchers in the community. All recently elected county committee members and alternates will take office on January 1, 2016, and join the existing committee.

For more information about county committees and the election process, please contact your local FSA Office or visit www.fsa.usda.gov.

Please contact your local FSA Office for questions specific to your operation or county.

USDA Commits \$2.5 Million to Expand New Farmer Education

Training Will also Help Returning Service Members, Underserved, and Urban Producers

U.S. Department of Agriculture (USDA has announced that \$2.5 million in grants is now available for projects to educate new and underserved farmers about more than 20 Farm Service Agency (FSA) programs that can provide financial, disaster or technical assistance to the agricultural community.

The grants will be awarded to nonprofits and public higher education institutions that develop proposals to improve farmer education on topics such as financial training, value-added production, recordkeeping, property inheritance, and crop production practices.

USDA will conduct four evaluation periods to review applications, with the deadlines of Nov. 20, 2015, Jan. 22, 2015, Mar. 18, 2016, and May 27, 2016. Awards between \$20,000 and \$100,000 per applicant will be available. To learn more about the funding solicitation and the related Farm Service Agency programs, details can be found at www.grants.gov with the reference number USDA-FSA-CA-2015-001. For nonprofits and public institutions of higher education that are considering participation, an online informational session will be conducted on Sept. 28, 2015. Additional information is posted on the Web at www.fsa.usda.gov/outreach.

New USDA Commitments to Help Build Up Next Generation of Farmers and Ranchers

The U.S. Department of Agriculture today announced a commitment by the U.S. Department of Agriculture (USDA) to prioritize \$5.6 billion over the next two years within USDA programs and services that serve new and beginning farmers and ranchers. Deputy Secretary Harden also announced a new, tailored web tool designed to connect burgeoning farm entrepreneurs with programs and resources available to help them get started.

The new web tool is available at www.usda.gov/newfarmers. The site was designed based on feedback from new and beginning farmers and ranchers around the country, who cited unfamiliarity with programs and resources as a challenge to starting and expanding their operations. The site features advice and guidance on everything a new farm business owner needs to know, from writing a business plan, to obtaining a loan to grow their business, to filing taxes as a new small business owner. By answering a series of questions about their operation, farmers can use the site's Discovery Tool to build a personalized set of recommendations of USDA programs and services that may meet their needs.

Using the new web tool and other outreach activities, and operating within its existing resources, USDA has set a new goal of increasing beginning farmer and rancher participation by an additional 6.6 percent across key USDA programs, which were established or strengthened by the 2014 Farm Bill, for a total investment value of approximately \$5.6 billion. Programs were targeted for expanded outreach and commitment based on their impact on expanding opportunity for new and beginning farmers and ranchers, including starting or expanding an operation, developing new markets, supporting more effective farming and conservation practices, and having access to relevant training and education

opportunities. USDA will provide quarterly updates on its progress towards meeting its goal. A full explanation of the investment targets, benchmarks and outcomes is available at: [BFR-Commitment-Factsheet](#).

As the average age of the American farmer now exceeds 58 years, and data shows that almost 10 percent of farmland in the continental United States will change hands in the next five years, we have no time to lose in getting more new farmers and ranchers established. Equally important is encouraging young people to pursue careers in industries that support American agriculture. According to [an employment outlook report](#) released by USDA's National Institute of Food and Agriculture (NIFA) and Purdue University, one of the best fields for new college graduates is agriculture. Nearly 60,000 high-skilled agriculture job openings are expected annually in the United States for the next five years, yet only 35,000 graduates with a bachelor's degree or higher in agriculture related fields are expected to be available to fill them. The report also shows that women make up more than half of the food, agriculture, renewable natural resources, and environment higher education graduates in the United States. USDA recently released a [series of fact sheets](#) showcasing the impact of women in agriculture nationwide.

Today's announcement builds on USDA's ongoing work to engage its resources to inspire a strong next generation of farmers and ranchers by improving access to land and capital; building market opportunities; extending conservation opportunities; offering appropriate risk management tools; and increasing outreach and technical support. To learn more about USDA's efforts, visit the [Beginning Farmers and Ranchers Results Page](#).

USDA Encourages Producers to Consider Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for the Noninsured Crop Disaster Assistance Program (NAP). The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection."

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at www.fsa.usda.gov/nap that allows producers to determine whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

Breaking New Ground

Agricultural producers are reminded to consult with FSA and NRCS before breaking out new ground for production purposes as doing so without prior authorization may put a producer's federal farm program benefits in jeopardy. This is especially true for land that must meet Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions.

Producers with HEL determined soils are required to apply tillage, crop residue and rotational requirements as specified in their conservation plan.

Producers should notify FSA as a first point of contact prior to conducting land clearing or drainage type projects to ensure the proposed actions meet compliance criteria such as clearing any trees to create new cropland, then these areas will need to be reviewed to ensure such work will not risk your eligibility for benefits.

Landowners and operators complete the form AD-1026 - Highly Erodible Land Conservation (HEL) and Wetland Conservation (WC) Certification to identify the proposed action and allow FSA to determine whether a referral to Natural Resources Conservation Service (NRCS) for further review is necessary.

Youth Loan

The Farm Service Agency makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is \$5000.

Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

Stop by the county office for help preparing and processing the application forms.

Farmers to Receive Documentation of USDA Services

Local Offices Issue Receipts for Services Provided

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

As part of FSA's mission to provide enhanced customer service, producers who visit FSA will receive documentation of services requested and provided. From December through June, FSA issued more than 327,000 electronic receipts.

The 2014 Farm Bill requires a receipt to be issued for any agricultural program assistance requested from FSA, the National Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity.

In some cases, a form or document – such as a completed and signed program enrollment form –serve as the customer receipt instead of a printed or electronic receipt. A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

To learn more about FSA, visit www.fsa.usda.gov or to find your local USDA office, visit <http://offices.usda.gov>.

Save Time Make an Appointment with FSA

To insure maximum use of your time and to insure that you are afforded our full attention to your important business needs, please call our office ahead of your visit to set an appointment and to discuss any records or documentation that you may need to have with you when you arrive for your appointment. For local FSA Service Center contact information, please visit: <http://offices.sc.egov.usda.gov/locator/app>.
