Sharon Kinnison

**Program Specialist:**  
Ryan Hunt, Carla Hill and  
Dianna Kazee

Please contact your local FSA Office for questions specific to your operation or county.

### FSA Announces New Yield Data for Safety Net Calculations

Farmers can Update Yield History through Feb. 27, 2015

The U.S. Department of Agriculture Farm Service Agency (FSA) offers farmers new information to update program payment yields that will help them better select protections offered by the Agricultural Risk Coverage (ARC) and Price Loss Coverage (PLC) programs. The new programs, established by the 2014 Farm Bill, are cornerstones of the commodity farm safety, offering farmers protection when market forces cause substantial drops in crop prices and revenues.

The Farm Bill provides landowners with the option of updating their farm program payment yields and this is the first time that many producers have been able to update yields since 1986. FSA has worked with the Risk Management Agency (RMA) to make available certified yield data that producers can use to better calculate how the new safety net programs can offer the best protection against market swings.

Producers can check with their local FSA county office to see if data is available for them. This data belongs to the producer and only the producer associated with the crop insurance records will

be provided this service. Updating yield history or reallocating base acres can occur until Feb. 27, 2015.

FSA also issued a reminder that from Nov. 17, 2014, to March 31, 2015, producers will make a one-time election of either ARC or PLC for the 2014 through 2018 crop years. For more information, producers are encouraged to make an appointment to go into their local FSA county office. To find a local FSA county office, visit [offices.usda.gov](http://offices.usda.gov). Additional information on the new programs is available at [www.fsa.usda.gov/arc-plc](http://www.fsa.usda.gov/arc-plc).

## **USDA Provides Greater Protection for Fruit, Vegetable and Other Specialty Crop Growers**

Free Basic Coverage Plans and Premium Discounts Available for New, Underserved and Limited Income Farmers

Greater protection is now available from the Noninsured Crop Disaster Assistance Program for crops that historically have been ineligible for federal crop insurance. The new options, created by the 2014 Farm Bill, provide greater coverage for losses when natural disasters affect specialty crops such as vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, and energy crops.

Previously, the program offered coverage at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Producers can now choose higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price.

The expanded protection will be especially helpful to beginning and socially disadvantaged producers, as well as farmers with limited resources, who will receive fee waivers and premium reductions for expanded coverage. More crops are now eligible for the program, including expanded aquaculture production practices, and sweet and biomass sorghum. For the first time, a range of crops used to produce bioenergy will be eligible as well.

To help producers learn more about the Noninsured Crop Disaster Assistance Program and how it can help them, USDA, in partnership with Michigan State University and the University of Illinois, created an online resource. The Web tool, available at [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap), allows producers to determine whether their crops are eligible for coverage. It also gives them an opportunity to explore a variety of options and levels to determine the best protection level for their operation.

If the application deadline for an eligible crop has already passed, producers will have until Jan. 14, 2015, to choose expanded

coverage through the Noninsured Crop Disaster Assistance Program. To learn more, visit the Farm Service Agency (FSA) website at [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) or contact your local FSA office at [offices.usda.gov](http://offices.usda.gov). The Farm Service Agency (FSA), which administers the program, also wants to hear from producers and other interested stakeholders who may have suggestions or recommendations on the program. Written comments will be accepted until Feb. 13, 2015 and can be submitted through [www.regulations.gov](http://www.regulations.gov).

## **USDA Disaster Assistance to Help Thousands of Honeybee, Livestock and Farm-Raised Fish Producers**

2014 Farm Bill Program Offers Producers in Over 40 States Relief for 2012 and 2013 Losses

Nearly 2,500 applicants will receive disaster assistance through the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP) for losses suffered from Oct. 1, 2011, through Sept. 30, 2013.

The program, re-authorized by the 2014 Farm Bill, provides disaster relief to livestock, honeybee, and farm-raised fish producers not covered by other agricultural disaster assistance programs. Eligible losses may include excessive heat or winds, flooding, blizzards, hail, wildfires, lightning strikes, volcanic eruptions, and diseases, or in the case of honeybees, losses due to colony collapse disorder. Beekeepers, most of whom suffered honeybee colony losses, represent more than half of ELAP recipients.

The Farm Bill caps ELAP disaster funding at \$20 million per federal fiscal year. To accommodate the number of requests, which exceeded funds available for each of the affected years, payments will be reduced to ensure that all eligible applicants receive a prorated share of assistance.

The following ELAP Fact Sheets (by topic) are available online:

- ELAP for Farm-Raised Fish Fact Sheet
- ELAP for Livestock Fact Sheet
- ELAP for Honeybees Fact Sheet

To view these and other FSA program fact sheets, visit the FSA fact sheet web page at [www.fsa.usda.gov/factsheets](http://www.fsa.usda.gov/factsheets).

For local FSA Service Center contact information, please visit: [offices.usda.gov](http://offices.usda.gov).

## **Important ARC/PLC Program Deadlines Approaching**

Producers are reminded that the deadline to update yield history and/or reallocate base acres is Feb. 27, 2015. Farm owners and producers can choose between the new 2014 Farm Bill established programs, Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) through March 31, 2015. The new programs, designed to help producers better manage risk, usher in one of the most significant reforms to U.S. farm programs in decades.

USDA helped create online tools to assist in the decision process, allowing farm owners and producers to enter information about their operation and see projections that show what ARC and/or PLC will mean for them under possible future scenarios. Farm owners and producers can access the online resources, available at [www.fsa.usda.gov/arc-plc](http://www.fsa.usda.gov/arc-plc), from the convenience of their home computer or mobile device at any time.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity.

Dates associated with ARC and PLC that farm owners and producers need to know:

- Now through Feb. 27, 2015: Farm owners may visit their local Farm Service Agency office to update yield history and/or reallocate base acres.
- Now through March 31, 2015: Producers make a one-time election between ARC and PLC for the 2014 through 2018 crop years.
- Mid-April 2015 through summer 2015: Producers sign contracts for 2014 and 2015 crop years.
- October 2015: Payments issued for 2014 crop year, if needed.

To learn more about which safety net options are most appropriate for specific farming operations, farmers can use new Web tools at [www.fsa.usda.gov/arc-plc](http://www.fsa.usda.gov/arc-plc), which can be accessed from the convenience of a home computer or a mobile device at any time. To learn more about upcoming educational meetings, farmers can contact their local Farm Service Agency county office at <http://offices.sc.egov.usda.gov/locator/app>.

## Microloan Cap Grows to \$50,000

Farm Service Agency (FSA) reminds farmers and ranchers that the FSA borrowing limit for microloans increased from \$35,000 to \$50,000, effective Nov. 7. Microloans offer borrowers simplified lending with less paperwork.

The microloan change allows beginning, small and mid-sized farmers to access an additional \$15,000 in loans using a simplified application process with up to seven years to repay. Microloans are part of USDA's continued commitment to [small and midsized farming operations](#).

To complement the microloan program additional changes to FSA eligibility requirements will enhance beginning farmers and ranchers access to land, a key barrier to entry level producers. FSA policies related to farm experience have changed so that other types of skills may be considered to meet the direct farming experience required for farm ownership loan eligibility. Operation or management of non-farm businesses, leadership positions while serving in the military or advanced education in an agricultural field will now count towards the experience applicants need to show when applying for farm ownership loans. **Important Note:** Microloans cannot be used to purchase real estate.

Since 2010, FSA has made a record amount of farm loans — more than 165,000 loans totaling nearly \$23 billion. More than 50 percent of USDA's farm loans now go to beginning farmers. In addition, FSA has increased its lending to socially-disadvantaged producers by nearly 50 percent since 2010.

Please review the FSA [Microloan Program Fact Sheet](#) for program application, eligibility and related information.

---

## **Beginning Farmer Loans**

FSA assists beginning farmers to finance agricultural enterprises. Under these designated farm loan programs, FSA can provide financing to eligible applicants through either direct or guaranteed loans. FSA defines a beginning farmer as a person who:

Has operated a farm for not more than 10 years

Will materially and substantially participate in the operation of the farm

Agrees to participate in a loan assessment, borrower training and financial management program sponsored by FSA

Does not own a farm in excess of 30 percent of the county's average size farm.

Additional program information, loan applications, and other materials are available at your local USDA Service Center. You may also visit [www.fsa.usda.gov](http://www.fsa.usda.gov)
