USDA Offers Wildfire Recovery Assistance

USDA's Farm Service Agency (FSA) offers disaster assistance and low-interest loan programs to assist agricultural producers in their recovery efforts following wildfires or other qualifying natural disasters.

Available programs and loans include:

- **Non-Insured Crop Disaster Assistance Program (NAP)** - provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters including excessive wind and qualifying drought (includes native grass for grazing). Eligible producers must have purchased NAP coverage for 2019 crops. A notice of loss must be filed the earlier of 15 days of the occurrence of the disaster or when losses become apparent or 15 days of the final harvest date.

To find contact information for your local office go to:
www.fsa.usda.gov/az

- **Livestock Indemnity Program (LIP)** - offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather. Eligible losses may include those determined by FSA to have been caused by wildfires, hurricanes, floods, blizzards, tropical storms, tornados, lightning, extreme heat, and extreme cold. Producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent.
- **Tree Assistance Program (TAP)** – provides assistance to eligible orchardists and nursery tree growers for qualifying tree, shrub and vine losses due to natural disasters including excessive wind and qualifying drought.
- **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP)** - provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs. ELAP covers physically damaged or destroyed livestock feed that was purchased or mechanically harvested forage or feedstuffs intended for use as feed for the producer's eligible livestock. In order to be considered eligible, harvested forage must be baled; forage that is only cut, raked or windrowed is not eligible. ELAP also covers up to 180 lost grazing days in instances when a producer has been forced to remove livestock from a grazing pasture due to wildfire and for beekeepers, ELAP covers beehive losses (the physical structure) in instances where the hive has been destroyed by a natural disaster including flooding, high winds and tornadoes. Producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent. For honeybee losses, producers must notify FSA within 15 calendar days of when a loss occurs or from when the loss is apparent.
- **Emergency Conservation Program (ECP)** - provides emergency funding for farmers and ranchers to rehabilitate land severely damaged by natural disasters; includes fence loss.

For more information on these programs, visit www.fsa.usda.gov/disaster or contact your local FSA office.

Producers are Encouraged to Report Prevented Planting and Failed Acres

USDA Farm Service Agency (FSA) reminds producers to report prevented planting and failed acres in order to establish or retain FSA program eligibility for some programs.

Producers should report crop acreage they intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form *CCC-576, Notice of Loss*, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

Contact your local FSA office for a list of final planting dates by crop.

If a producer is unable to report the prevented planting acreage within the 15 calendar days following the final planting date, a late-filed report can be submitted. Late-filed reports will only be accepted if FSA conducts a farm visit to assess the eligible disaster condition that prevented the crop from being planted. A measurement service fee will be charged.

Additionally, producers with failed acres should also use form *CCC-576, Notice of Loss*, to report failed acres.

Producers of hand-harvested crops and certain perishables must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a *CCC-576*, email, fax or phone. Producers who notify the County Office by any method other than by filing the *CCC-576* are still required to file a *CCC-576, Notice of Loss*, within the required 15 calendar days.

For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), producers must file a *Notice of Loss* within 15 days of the occurrence of the disaster or when losses become apparent. Producers must timely file a *Notice of Loss* for failed acres on all crops including grasses.

USDA Announces Loan Maturity for Marketing Assistance Loans Now Extended to 12 Months

Agricultural producers now have more time to repay Marketing Assistance Loans (MAL) as part of the U.S. Department of Agriculture's implementation of the Coronavirus Aid, Relief, and Economic Security (CARES) Act of 2020. The loans now mature at 12 months rather than nine, and this flexibility is available for most commodities.

Effective immediately, producers of eligible commodities now have up to 12 months to repay their commodity loans. The maturity extension applies to nonrecourse loans for crop years 2018, 2019 and 2020. Eligible open loans must in good standing with a maturity date of March 31, 2020, or later or new crop year (2019 or 2020) loans requested by September 30, 2020. All new loans requested by September 30, 2020, will have a maturity date 12 months following the date of approval.

The maturity extension for current, active loans will be automatically extended an additional 3 months. Loans that matured March 31 have already been automatically extended by USDA's Farm

Service Agency (FSA). Producers who prefer a nine-month loan will need to contact their local FSA county office. Loans requested after September 30, 2020, will have a term of nine months.

Eligible commodities include barley, chickpeas (small and large), corn, cotton (upland and extra-long staple), dry peas, grain sorghum, honey, lentils, mohair, oats, peanuts, rice (long and medium grain), soybeans, unshorn pelts, wheat, wool (graded and nongraded); and other oilseeds, including canola, crambe, flaxseed, mustard seed, rapeseed, safflower, sunflower seed, and sesame seed. Seed cotton and sugar are not eligible.

About MALs

Placing commodities under loan provides producers interim financing to meet cash flow needs without having to sell their commodities when market prices are low and allows producers to store production for more orderly marketing of commodities throughout the year.

These loans are considered nonrecourse because the commodity is pledged as loan collateral, and producers have the option of delivering the pledged collateral to the Commodity Credit Corporation (CCC) for repayment of the outstanding loan at maturity.

MAL Repayment

Under the new maturity provisions, producers can still repay the loan as they would have before the extension:

- repay the MAL on or before the maturity date;
- upon maturity by delivering or forfeiting the commodity to CCC as loan repayment; or
- after maturity and before CCC acquires the farm-stored commodity by repaying the outstanding MAL principle and interest.

Marketing Loan Gains

A Marketing Loan Gain occurs when a MAL is repaid at less than the loan principal. If market gain is applicable during the now-extended loan period, producers can receive a gain on the repayment made before the loan matures.

For more information on MALs, contact the nearest FSA county office. USDA Service Centers, including FSA county offices, are open for business by phone appointment only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service, or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

Supervised Credit

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation's goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA's staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit fsa.usda.gov.

Communication is Key in Lending

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be a success. A part of ensuring this success is providing guidance and counsel from the loan application process through the borrower's graduation to commercial lending institutions. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation;
- Any significant changes to family income or expenses;
- The development of problem situations;
- Any losses or proposed significant changes in security

In addition, if a farm loan borrower cannot make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, visit fsa.usda.gov.
