### Sonny Perdue Sworn in as 31st U.S. Secretary of Agriculture

Sonny Perdue was sworn in as the 31st U.S. Secretary of Agriculture by fellow Georgian and Associate Justice of the U.S. Supreme Court Clarence Thomas in a brief ceremony on April 25 at the Supreme Court building.

Perdue grew up on a dairy and diversified row crop farm in Bonaire, Georgia. Being uniquely qualified as a former farmer, agribusiness man, veterinarian, state legislator and governor of Georgia, he has experienced the agriculture industry from every possible perspective throughout his life.

As secretary, Perdue says he will champion the concerns of farmers, ranchers, foresters and producers, and will work tirelessly to solve the issues facing our farm families.

Perdue's policies as U.S. Secretary of Agriculture will be guided by four principles which will inform his decisions. First, he will maximize the ability of the men and women of America's agriculture

and agribusiness sector to create jobs, to produce and sell the foods and fiber that feed and clothe the world, and to reap the earned reward of their labor. Second, he will prioritize customer service every day for American taxpayers and consumers. Third, as Americans expect a safe and secure food supply, USDA will continue to serve in the critical role of ensuring the food we put on the table to feed our families meets the strict safety standards we've established. And fourth, Perdue will always remember that America's agricultural bounty comes directly from the land.

For more information about Secretary Perdue, visit [www.usda.gov](http://www.usda.gov).

## Census of Agriculture Countdown Begins for America's Farmers and Ranchers

America's farmers and ranchers will soon have the opportunity to strongly represent agriculture in their communities and industry by taking part in the 2017 Census of Agriculture. Conducted every five years by the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS), the census, to be mailed at the end of this year, is a complete count of all U.S. farms, ranches, and those who operate them.

The Census of Agriculture highlights land use and ownership, operator characteristics, production practices, income and expenditures, and other topics. The 2012 Census of Agriculture revealed that over three million farmers operated more than two million farms, spanning over 914 million acres. This was a four percent decrease in the number of U.S. farms from the previous census in 2007. However, agriculture sales, income, and expenses increased between 2007 and 2012. This telling information and thousands of other agriculture statistics are a direct result of responses to the Census of Agriculture.

Producers who are new to farming or did not receive a Census of Agriculture in 2012 still have time to sign up to receive the 2017 Census of Agriculture report form by visiting [www.agcensus.usda.gov](http://www.agcensus.usda.gov) and clicking on the 'Make Sure You Are Counted' button through June. NASS defines a farm as any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year (2017).

## **USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators**

*Options Help More Beginning, Small and Urban Producers Gain Access to Credit*

The U.S. Department of Agriculture (USDA) announced the availability of a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to \$100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

A new category of lenders will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to \$50,000 of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to \$100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

More information about the available types of FSA farm loans can be found at [www.fsa.usda.gov/farmloans](http://www.fsa.usda.gov/farmloans) or by contacting your local FSA office.

## **USDA Financial Assistance Available to Help Organic Farmers Create Conservation Buffers**

USDA is assisting organic farmers with the cost of establishing up to 20,000 acres of new conservation buffers and other practices on and near farms that produce organic crops.

The financial assistance is available from the USDA Conservation Reserve Program (CRP), a federally funded voluntary program that contracts with agricultural producers so that environmentally sensitive land is not farmed or ranched, but instead used for conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”) to control soil erosion, improve water quality and develop wildlife habitat. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

For conservation buffers, funds are available for establishing shrubs and trees, or supporting pollinating species, and can be planted in blocks or strips. Interested organic producers can offer eligible land for enrollment in this initiative at any time.

Other USDA FSA programs that assist organic farmers include:

- The Noninsured Crop Disaster Assistance Program that provides financial assistance for 55 to 100 percent of the average market price for organic crop losses between 50 to 65 percent of expected production due to a natural disaster.
- Marketing assistance loans that provide interim financing to help producers meet cash flow needs without having to sell crops during harvest when market prices are low, and

deficiency payments to producers who forgo the loan in return for a payment on the eligible commodity.

- A variety of loans for operating expenses, ownership or guarantees with outside lenders, including streamlined microloans that have a lower amount of paperwork.
- Farm Storage Facility Loans for that provide low-interest financing to build or upgrade storage facilities for organic commodities, including cold storage, grain bins, bulk tanks and drying and handling equipment.
- Services such as mapping farm and field boundaries and reporting organic acreage that can be provided to a farm's organic certifier or crop insurance agent.

Visit [www.fsa.usda.gov/organic](http://www.fsa.usda.gov/organic) to learn more about how FSA can help organic farmers. For an interactive tour of CRP success stories, visit [www.fsa.usda.gov/CRPis30](http://www.fsa.usda.gov/CRPis30) or follow #CRPis30 on Twitter. To learn more about FSA programs visit a local FSA office or [www.fsa.usda.gov](http://www.fsa.usda.gov). To find your local FSA office, visit <http://offices.usda.gov>.

## Direct Loans

FSA offers direct farm ownership and direct farm operating Loans to producers who want to establish, maintain or strengthen their farm or ranch. FSA loan officers process, approve and service direct loans.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for both direct farm ownership and operating loans is \$300,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

## **Nominations Open for the 2017 County Committee Elections**

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) encourages all farmers, ranchers, and FSA program participants to take part in the County Committee election nomination process. Each county will be sending GovDelivery messages to highlight the areas in Connecticut that will be holding elections this year.

FSA's county committees are a critical component of the day-to-day operations of FSA and allow grassroots input and local administration of federal farm programs.

Committees are comprised of locally elected agricultural producers responsible for the fair and equitable administration of FSA farm programs in their counties. Committee members are accountable to the Secretary of Agriculture. If elected, members become part of a local decision making and farm program delivery process.

A county committee is composed of three to 11 elected members from local administrative areas (LAA). Each member serves a three-year term. One-third of the seats on these committees are open for election each year. County committees may have one or more appointed advisors to further represent the local interests of underserved farmers and ranchers. Underserved producers are beginning, women and other minority farmers and ranchers and land owners and/or operators who have limited resources. Other minority groups including Native American and Alaska Natives; persons under the poverty level, and persons that have disabilities are also considered underserved.

All nomination forms for the 2017 election must be postmarked or received in the local USDA service center by Aug. 1, 2017. For more information on FSA county committee elections and appointments, refer to the FSA fact sheet: Eligibility to Vote and Hold Office as a COC Member available online at: [www.fsa.usda.gov/elections](http://www.fsa.usda.gov/elections).
