USDA Issues First Coronavirus Food Assistance Program Payments

U.S. Secretary of Agriculture Sonny Perdue today announced the USDA Farm Service Agency (FSA) has already approved more than \$545 million in payments to producers who have applied for the Coronavirus Food Assistance Program. FSA began taking applications May 26, and the agency has received over 86,000 applications for this important relief program.

In the first six days of the application period, FSA has already made payments to more than 35,000 producers. Out of the gate, the top five states for CFAP payments are Illinois, Kansas, Wisconsin, Nebraska, and South Dakota. USDA has released data on application progress and program payments and will release further updates each Monday at 2:00pm ET. The report can be viewed at farmers.gov/cfap.

FSA will accept applications through August 28, 2020. Through CFAP, USDA is making available \$16 billion in financial assistance

Please contact your local FSA Office for questions specific to your operation or county.

to producers of agricultural commodities who have suffered a five-percent-or-greater price decline due to COVID-19 and face additional significant marketing costs as a result of lower demand, surplus production, and disruptions to shipping patterns and the orderly marketing of commodities.

In order to do this, producers will receive 80 percent of their maximum total payment upon approval of the application. The remaining portion of the payment, not to exceed the payment limit, will be paid at a later date nationwide, as funds remain available.

Getting Help from FSA

New customers seeking one-on-one support with the CFAP application process can call 877-508-8364 to speak directly with a USDA employee ready to offer general assistance. This is a recommended first step before a producer engages the team at the FSA county office at their local USDA Service Center.

Producers can download the CFAP application and other eligibility forms from farmers.gov/cfap. Also, on that webpage, producers can find a payment calculator to help producers identify sales and inventory records needed to apply and calculate potential payments. Producers self-certify their records when applying for CFAP and that documentation is not submitted with the application. However, producers may be asked for their documentation to support the certification of eligible commodities, so producers should retain the information used to complete their application.

Those who use the online calculator tool will be able to print a pre-filled CFAP application, sign it, and submit it to your local FSA office either electronically or via hand delivery through an office drop box. Please contact your local office to determine the preferred delivery method for your local office. Team members at FSA county offices will be able to answer detailed questions and help producers apply quickly and efficiently through phone and online tools. Find contact information for your local office at farmers.gov/cfap.

Policy Clarifications

FSA has been working with stakeholder groups to provide further clarification to producers on the CFAP program. For example, the agency has published a matrix of common marketing contracts that impact eligibility for non-specialty crops and has provided a table that crosswalks common livestock terms to CFAP cattle categories. Updated information can be found in the frequently asked questions section of the CFAP website.

More Information

To find the latest information on CFAP, visit farmers.gov/CFAP or call 877-508-8364.

FSA Implements Set-Aside Loan Provision for Customers Impacted by COVID-19

Set-Aside Delays Loan Payments for Borrowers

USDA's Farm Service Agency (FSA) will broaden the use of the Disaster Set-Aside (DSA) loan provision, normally used in the wake of natural disasters, to allow farmers with USDA farm loans who are affected by COVID-19, and are determined eligible, to have their next payment set aside. In some cases, FSA may also set aside a second payment for farmers who have already had one payment set aside because of a prior designated disaster.

FSA direct loan borrowers will receive a letter with the details of the expanded Disaster Set-Aside authorities, which includes the possible set-aside of annual operating loans, as well as explanations of the additional loan servicing options that are available. To discuss or request a loan payment Set-Aside, borrowers should call or email the farm loan staff at their local FSA county office.

The set-aside payment's due date is moved to the final maturity date of the loan or extended up to twelve months in the case of an annual operating loan. Any principal set-aside will continue to accrue interest until it is repaid. This aims to improve the borrower's cashflow in the current production cycle.

FSA previously announced it was relaxing the loan-making process and adding flexibilities for servicing direct and guaranteed loans to provide credit to producers in need. Direct loan applicants and borrowers are encouraged to contact their local FSA county office to discuss loan making and servicing flexibilities and other needs or concerns. Customers participating in FSA's guaranteed loan programs are encouraged to contact their lender. Information on these flexibilities, and office contact information, can be found on farmers.gov/coronavirus.

FSA will be accepting most forms and applications by facsimile or electronic signature. Some services are also available online to customers with an eAuth account, which provides access to the farmers.gov portal where producers can view USDA farm loan information and certain program applications and payments. Customers can track payments, report completed practices, request conservation assistance and electronically sign documents. Customers who do not already have an eAuth account can enroll at farmers.gov/sign-in.

USDA Service Centers are open for business by phone appointment only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

5 Steps to Complete After Spring Planting

With #Plant2020 in the rear-view mirror, it's time to think about next steps on your farm.

Your USDA team understands that the real work continues after planting. We know the rest of spring and summer will be spent scouting crops, irrigating or waiting for timely rains for your non-irrigated fields, and monitoring weed and insect pressure.

Before you get too busy, there are five things to keep in mind after planting.

USDA Accepting Proposals for State Acres for Wildlife Enhancement Initiative

The U.S. Department of Agriculture's Farm Service Agency (FSA) is now accepting new or modified proposals from state governments for its State Acres for Wildlife Enhancement (SAFE) Initiative.

Through SAFE, vital habitat is restored to meet high-priority state wildlife conservation goals. The deadline to submit proposals is June 19.

SAFE practices must be used to restore animal habitats for the following categories:

- rare, threatened and endangered species
- species that have suffered a significant population decline
- species that provide significant social or economic value to the community.

SAFE grass and tree practices were moved to the Conservation Reserve Program (CRP) General Signup in 2019 and competed against other offers, while buffer and wetland practices remain under continuous CRP signup.

When submitted, proposals must include an overview of the project accomplishments, a list of all practices planned, the commitment of the state and participants and the planned outreach efforts.

For more information about SAFE and submitting a proposal, contact your FSA state office at 352-379-4520.

USDA Reports Record Enrollment in Key Farm Safety-Net Programs

Producers signed a record 1.77 million contracts for the U.S. Department of Agriculture's Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for the 2019 crop year, which is more than 107 percent of the total contracts signed compared with a 5-year average. USDA also reminds producers that June 30 is the deadline to enroll in ARC and PLC for the 2020 crop year.

Producers interested in enrolling for 2020 should contact their FSA county office. Producers must enroll by June 30 and make their one-time update to PLC payment yields by September 30.

FSA attributes the significant participation in the 2019 crop year ARC and PLC programs to increased producer interest in the programs under the 2018 Farm Bill and to an increase in eligible farms because of the selling and buying of farms and new opportunities for beginning farmers and military veterans with farms having 10 or fewer base acres. Enrollment for 2019 ended March 16.

USDA Service Centers, including FSA county offices, are open for business by phone only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

For more information on ARC and PLC, download the [program fact sheet](#) or the [2014-2018 farm bills comparison fact sheet](#). Online ARC and PLC election decision tools are available at www.fsa.usda.gov/arc-plc. To locate the nearest USDA Service Center, visit farmers.gov/service-center-locator.

Loan Servicing

There are options for Farm Service Agency loan customers during financial stress. If you are a borrower who is unable to make payments on a loan, contact your local FSA Farm Loan Manager to learn about the options available to you.

The Importance of Responding to NASS Surveys

The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture.

Producers who receive survey questionnaires should respond quickly and online if possible.

The results of the surveys help determine the structure of USDA farm programs, such as soil rental rates for the Conservation Reserve Program and prices and yields used for the Agriculture Risk Coverage and Price Loss Coverage programs. This county-level data is critical for USDA farm payment determinations. Survey responses also help associations, businesses and policymakers advocate for their industry and help educate others on the importance of agriculture.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

NASS data is available online at nass.usda.gov/Publications and through the searchable [Quick Stats database](#). Watch a video on how NASS data is used at youtube.com/watch?v=m-4zjnh26io&feature=youtu.be.

Document the Drought: USDA U.S. Drought Monitor Offers Producers a Voice to Report Drought Impacts

The U.S. Drought Monitor's reporting feature offers producers an opportunity to submit drought impact and condition reports.

The USDA, in partnership with the National Oceanic and Atmospheric Administration and the University of Nebraska in Lincoln, produced the U.S. Drought Monitor to include a reporting feature that allows producers to report local drought impacts and conditions.

The report allows producers to:

- Provide a written description of drought impacts on livelihood, activities, etc.;
- Select categories to show losses and gains as a result of the drought;
- Report on the duration of drought event;
- Select *Affected Places* – geographic areas ranging from an entire state to a small area within a state;
- Submit images that document the drought and its impact;
- Provide contact information (includes an option to keep information confidential).

The reporting tool for producers to record the effects of the drought can be accessed at the following link: droughtreporter.unl.edu/submitreport/

More information including state specific drought impact maps can be found on the U. S. Drought Monitor homepage: droughtmonitor.unl.edu/Home.aspx

Weather the Storm: FEMA Mobile App Provides Weather Alerts and Safety Tips

USDA offers programs to help producers recover from disasters; FEMA can help you prepare ahead of time.

The Federal Emergency Management Agency (FEMA) recently launched a free mobile app that will instruct the public on what to do before, during and after emergencies. The app is available for download for Apple, Android and Blackberry mobile devices.

Download the app to:

- Receive alerts from the National Weather Service for up to five locations
- Get safety reminders, read tips to survive natural disasters and customize your emergency checklist
- Locate open shelters and where to talk to FEMA in person (or on the phone)
- Upload and share your disaster photos to help first responders.

For more information about the FEMA app, visit fema.gov/mobile-app. To download the FEMA app from the Apple Store visit itunes.apple.com/us/app/fema/id474807486?mt=8. To download the FEMA app on Google Play for Android visit: play.google.com/store/apps/details?id=gov.fema.mobile.android&hl=en

Dates to Remember

June 19 - Deadline for SAFE proposals

June 30 - Deadline to enroll in ARC and PLC for the 2020 crop year

July 3 - Holiday Observed. Offices Closed.

July 6 - Urban Agriculture Innovative grants application deadline

August 28 - CFAP sign-up ends
