USDA To Compensate Drought-Stricken Ranchers for Above Normal Costs to Haul Livestock to Forage

Due to the persistent drought conditions in the Great Plains and West, the U.S. Department of Agriculture (USDA) is offering additional relief through the [Emergency Assistance for Livestock, Honeybees and Farm-raised Fish Program \(ELAP\)](#) to help ranchers cover above normal costs of hauling livestock to forage or other grazing acres. This policy enhancement complements previously announced ELAP compensation for hauling feed to livestock. ELAP livestock and feed hauling assistance is retroactive for 2021 and will be available for losses in 2022 and subsequent years.

ELAP Assistance Overview

ELAP provides financial assistance to eligible producers of livestock, honeybees and farm-raised fish for losses due to disease, certain adverse weather events or loss conditions as determined by the Secretary of Agriculture. In addition to ELAP covering feed transportation costs where grazing and hay resources have been depleted, ELAP now also covers transportation costs associated with hauling livestock to feed sources This includes places where:

- Drought intensity is D2 for eight consecutive weeks as indicated by the [S. Drought Monitor](#); or
- Drought intensity is D3 or greater.

Additionally, FSA has updated ELAP policy to also cover water hauling in areas experiencing D2 for eight consecutive weeks, lowering the drought intensity threshold (previously D3) triggering the availability of this financial assistance.

Eligibility

To be eligible for ELAP assistance, livestock must be intended for grazing and producers must have incurred feed or livestock transportation costs on or after Jan. 1, 2021. Although producers will self-certify losses and expenses to FSA, producers are encouraged to maintain good records and retain receipts and related documentation in the event these documents are requested for review by the local FSA County Committee.

Payment Calculations

USDA will reimburse eligible ranchers 60% of livestock transportation costs above what would have been incurred in a normal year. Producers qualifying as underserved (socially disadvantaged, limited resource, beginning or military veteran) will be reimbursed for 90% of the feed transportation cost above what would have been incurred in a normal year.

USDA uses a national cost formula to determine reimbursement costs that will not include the first 25 miles and distances exceeding 1,000 transportation miles. The calculation will also exclude the normal cost to transport hay or feed if the producer normally purchases some feed. For 2021, the initial cost formula of \$6.60 per mile will be used (before the percentage is applied).

Online Decision Tool

Producers can use the updated ELAP Feed Livestock Transportation Producer Tool to help producers document and estimate payments to cover both feed and livestock transportation costs caused by drought. The tool (a Microsoft Excel workbook) and other resources are available at fsa.usda.gov/elap. Final payments may vary depending on eligibility.

Eligible ranchers should contact their FSA county office to apply for ELAP assistance. To simplify the application process, ranchers can print or email payment estimates generated by the online tool for submission to FSA. The deadline to request ELAP assistance for hauling livestock to forage in 2021 is June 30, 2022. The deadline to request all ELAP assistance for 2022 calendar year losses will be Jan. 31, 2023.

More Information

Additional USDA disaster assistance information can be found on farmers.gov, including USDA resources specifically for producer impacted by [drought](#) and [wildfire](#) and the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#) and [Farm Loan Discovery Tool](#). For FSA and Natural Resources Conservation Service programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

USDA Encourages Producers to Enroll in Grassland CRP

The U.S. Department of Agriculture (USDA) encourages producers and landowners to enroll in the Grassland Conservation Reserve Program (CRP) starting next week through May 13,

2022. Grassland CRP provides a unique opportunity for farmers, ranchers, and agricultural landowners to keep land in agricultural production and supplement their income while improving their soils and permanent grass cover. The program had its highest enrollment in history in 2021 and is part of the Biden-Harris Administration's broader effort to equip producers with the tools they need to help address climate change and invest in the long-term health of our natural resources.

[Grassland CRP](#) is a federally funded voluntary working lands program. Through the program, USDA's Farm Service Agency (FSA) provides annual rental payments to landowners to maintain and conserve grasslands while allowing producers to graze, hay, and produce seed on that land. Maintaining the existing permanent cover provides several benefits, including reducing erosion, providing wildlife habitat and migration corridors, and capturing and maintaining carbon in the soil and cover.

FSA provides participants with annual rental payments and cost-share assistance. The annual rental rate varies by county with a national minimum rental rate of \$13 per acre for this signup. Contract duration is 10 or 15 years.

Grassland CRP National Priority Zones

Because Grassland CRP supports not only grazing operations but also biodiversity and conserving environmentally sensitive land such as that prone to wind erosion, FSA created two [National Priority Zones](#) in 2021: the Greater Yellowstone Migration Corridor and Dust Bowl Zone. As part of the Biden-Harris Administration's focus on conservation in important wildlife corridors and key seasonal ranges, for this year's signup, FSA is expanding the Greater Yellowstone Wildlife Migration Corridor Priority Zone to include seven additional counties across Montana, Wyoming, and Utah, to help protect the big-game animal migration corridor associated with Wyoming elk, mule deer, and antelope.

Offers within one of these National Priority Zones will receive an additional 15 ranking points and \$5 per acre if at least 50% of the offer is located in the zone.

Alongside Grassland CRP, producers and landowners can also enroll acres in Continuous CRP under the ongoing sign up, which includes projects available through the Conservation Reserve Enhancement Program (CREP) and State Acres for Wildlife Enhancement (SAFE).

Broadening Reach of Program

As part of the Agency's Justice40 efforts, producers and landowners who are historically underserved, including beginning farmers and military veterans, will receive 10 additional ranking points to enhance their offers.

Additionally, USDA is working to broaden the scope and reach of Grassland CRP by leveraging the [Conservation Reserve Enhancement Program](#) (CREP) to engage historically underserved communities. CREP is a partnership program that enables states, Tribal governments, non-profit, and private entities to partner with FSA to implement CRP practices and address high priority conservation and environmental objectives. Interested entities are encouraged to contact FSA.

More Information on CRP

Landowners and producers interested in Grassland CRP should contact their local [USDA Service Center](#) to learn more or to apply for the program before the May 13 deadline. Additionally, fact sheets and other resources are available at fsa.usda.gov/crp.

Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. The working lands signup announced today demonstrates how

much it has evolved from the original program that was primarily intended to control soil erosion and only had the option to take enrolled land out of production. The program has expanded over the years and now supports a greater variety of conservation and wildlife benefits, along with the associated economic benefits.

USDA Reminds Idaho Producers to File Crop Acreage Reports

Agricultural producers in Idaho who have not yet completed their [crop acreage reports](#) after planting should make an appointment with their Farm Service Agency (FSA) office before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

Acreage reporting dates vary by crop and by county. Contact your local FSA office for a list of acreage reporting deadlines by crop.

Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some [USDA Service Centers](#) are open to limited visitors. Contact your Service Center to set up an in-person or phone appointment.

To file a crop acreage report, you will need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to plant. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA's Risk Management Agency.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP-covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

More Information

For questions, please contact your local FSA office. To locate your local FSA office visit farmers.gov/service-center-locator.

USDA Expands Farmers.gov to Include Farm Records

Producers with farmers.gov accounts can now access farm records and maps online, the latest self-service feature added to the U.S. Department of Agriculture (USDA) website.

You can quickly and easily access your land information in real time by desktop computer, tablet or phone. Capabilities include:

- View, print and export detailed farm records such as cropland, base acres, yields, CRP acres, land ownership details, and much more.
- View, print and export farm/tract maps that can be provided to lenders, chemical or fertilizer providers, and FSA for reporting acreage and crop insurance agents; and
- Export common land unit (field) boundaries as ESRI shapefiles.

The ability to access these records on demand without a visit to the service center saves you time and money.

[Farmers.gov](https://farmers.gov) now includes the most popular functionalities from FSAFarm+, the FSA portal for producers, while providing enhanced functionality and an improved user experience. A new enhancement expands the scope of accessibility to include farmers and ranchers who are members of an entity, as well as people with a power of attorney form (FSA-211) on file with FSA.

Managing USDA Business Online

Using farmers.gov, producers, entities and those acting on their behalf can also:

- View, upload, download, and e-sign conservation documents.
- Request financial assistance, including submitting a program application.
- View and submit conservation requests.
- View technical references and submit questions.
- Access information on current and past conservation practices, plans and contracts.
- Report practice completion and request practice certification.
- View farm loan and interest information (producers only).

Future plans include adding the ability to import and view other shapefiles, such as precision agriculture planting boundaries.

To access your information, you'll will need a [USDA eAuth account](#) to login to farmers.gov. After obtaining an eAuth account, producers should visit [farmers.gov](#) and sign into the site's authenticated portal via the [Sign In/Sign Up link](#) at the top right of the website. Google Chrome, Mozilla Firefox or Microsoft Edge are the recommended browsers to access the feature.

In addition to the self-service features available by logging into farmers.gov, the website also has ample information on USDA programs, including pandemic assistance, farm loans, disaster assistance, conservation programs and crop insurance. Recently, USDA updated the navigation and organization of the site as well as added some new webpages, including "[Get Involved](#)," "[Common Forms](#)," and "[Translations](#)." [Learn more about these changes](#).

USDA Offers Disaster Assistance for Producers Facing Inclement Weather

Severe weather events create significant challenges and often result in catastrophic loss for agricultural producers. Despite every attempt to mitigate risk, your operation may suffer losses. USDA offers several programs to help with recovery.

Risk Management

For producers who have risk protection through [Federal Crop Insurance](#) or the [Noninsured Crop Disaster Assistance Program](#) (NAP), we want to remind you to report crop damage to your crop insurance agent or the local Farm Service Agency (FSA) office.

If you have crop insurance, contact your agency within 72 hours of discovering damage and be sure to follow up in writing within 15 days. If you have NAP coverage, file a Notice of Loss (also called Form CCC-576) within 15 days of loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

Disaster Assistance

USDA also offers disaster assistance programs, which is especially important to livestock, fruit and vegetable, specialty and perennial crop producers who have fewer [risk management options](#).

First, the [Livestock Indemnity Program](#) (LIP) and [Emergency Assistance for Livestock, Honeybee and Farm-raised Fish Program](#) (ELAP) reimburses producers for a portion of the value of livestock, poultry and other animals that died as a result of a qualifying natural disaster event or for loss of grazing acres, feed and forage. And, the [Livestock Forage Disaster Program](#) (LFP) provides assistance to producers of grazed forage crop acres that have suffered crop loss due to a qualifying drought. Livestock producers suffering the impacts of drought can also request [Emergency Haying and Grazing](#) on Conservation Reserve Program (CRP) acres.

Next, the [Tree Assistance Program](#) (TAP) provides cost share assistance to rehabilitate and replant tree, vines or shrubs loss experienced by orchards and nurseries. This complements NAP or crop insurance coverage, which cover the crop but not the plants or trees in all cases.

For LIP and ELAP, you will need to file a Notice of Loss for livestock and grazing or feed losses within 30 days and honeybee losses within 15 days. For TAP, you will need to file a program application within 90 days.

Documentation

It's critical to keep accurate records to document all losses following this devastating cold weather event. Livestock producers are advised to document beginning livestock numbers by taking time and date-stamped video or pictures prior to after the loss.

Other common documentation options include:

- Purchase records
- Production records
- Vaccination records
- Bank or other loan documents
- Third-party certification

Other Programs

The [Emergency Conservation Program](#) and [Emergency Forest Restoration Program](#) can assist landowners and forest stewards with financial and technical assistance to restore damaged farmland or forests.

Additionally, FSA offers a variety of loans available including emergency loans that are triggered by disaster declarations and operating loans that can assist producers with credit needs. You can use these loans to replace essential property, purchase inputs like livestock, equipment, feed and seed, or refinance farm-related debts, and other needs.

Meanwhile, USDA's Natural Resources Conservation Service (NRCS) provides financial resources through its [Environmental Quality Incentives Program](#) to help with immediate needs and long-term support to help recover from natural disasters and conserve water resources. Assistance may also be available for emergency animal mortality disposal from natural disasters and other causes.

Additional Resources

Additional details – including payment calculations – can be found on our [NAP](#), [ELAP](#), [LIP](#), and [TAP](#) fact sheets. On farmers.gov, the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Farm Loan Discovery Tool](#) can help you determine program or loan options.

While we never want to have to implement disaster programs, we are here to help. To file a Notice of Loss or to ask questions about available programs, contact your local USDA Service Center. All [USDA Service Centers](#) are open for business, including those that restrict in-person visits or require appointments because of the pandemic.

Multiple Idaho Counties are Eligible for Emergency Loans

36 Idaho Counties have been declared eligible for disaster due drought and heat using the Secretarial Disaster Designation process. Under this designation, if you have operations in any primary or contiguous county, you are eligible to apply for low interest emergency loans.

Emergency loans help you recover from production and physical losses due to drought, flooding and other natural disasters or quarantine.

You have eight months from the date of the declaration to apply for emergency loan assistance. FSA will consider each loan application on its own merits, taking into account the extent of losses, security available and repayment ability. You can borrow up to 100 percent of actual production or physical losses, to a maximum amount of \$500,000.

For more information about emergency loans, contact your Local County USDA Service Center or visit fsa.usda.gov.
