

## USDA Announces Conservation Reserve Program General Signup for 2024

The U.S. Department of Agriculture (USDA) announced that agricultural producers and private landowners can begin signing up for the general Conservation Reserve Program (CRP) **starting March 4 and running through March 29, 2024**. The announcement was made earlier today by Zach Ducheneaux, Administrator of the USDA's Farm Service Agency (FSA) at this year's National Pheasant Fest, in Sioux Falls, SD.

On Nov. 16, 2023, President Biden signed into law H.R. 6363, the Further Continuing Appropriations and Other Extensions Act, 2024 (Pub. L. 118-22), which extended the Agriculture Improvement Act of 2018 (Pub. L. 115-334), more commonly known as the 2018 Farm Bill, through Sept. 30, 2024. This extension allows authorized programs, including CRP, to continue operating.

As one of the largest private lands conservation programs in the United States, CRP offers a range of conservation options to farmers, ranchers, and landowners. It has been an especially strong opportunity for farmers with less productive or marginal cropland, helping them re-establish valuable land cover to help improve water quality, prevent soil erosion, and support wildlife habitat.

Producers and landowners enrolled about 926,000 acres in General CRP in 2023, bringing the total of enrolled acres in General CRP to 7.78 million. This, combined with all other acres in CRP through other enrollment opportunities, such as Grassland and Continuous CRP, bring the current total of enrolled acres to 24.8 million.

### General CRP

General CRP helps producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland. Additionally, General CRP includes a Climate-Smart Practice Incentive to help increase carbon sequestration and reduce greenhouse gas emissions by helping producers and landowners establish trees and permanent grasses, enhance wildlife habitat, and restore wetlands.

General CRP is one of several ways agricultural producers and private landowners can participate in the program.

### Other CRP Options

This past January FSA began accepting applications for the [Continuous CRP](#) signup. Under this enrollment, producers and landowners can enroll in CRP throughout the year. Offers are automatically accepted provided the producer and land meet the eligibility requirements and the enrollment levels do not exceed the statutory cap.

The USDA also offers financial assistance to producers and landowners enrolled in CRP to improve the health of their forests through the [Forest Management Incentive](#) (FMI), which can help participants with forest management practices, such as brush management and prescribed burning.

FSA will announce the dates for [Grassland CRP](#) signup in the near future.

Producers with expiring CRP acres can use the [Transition Incentives Program](#) (TIP), which incentivizes producers who sell or enter a long-term lease with a beginning, veteran, or socially disadvantaged farmer or rancher who plans to sustainably farm or ranch the land.

## Ask the Expert: A Q&A on Farm Storage Facility Loans

**In this *Ask the Expert*, Toni Williams answers questions about how Farm Storage Facility Loans (FSFLs) provide low-interest financing to help producers build or upgrade commodity storage facilities. Toni is the Agricultural Program Manager for FSFLs at the Farm Service Agency (FSA).**

Toni has worked for FSA for more than 32 years and is responsible for providing national policy and guidance for Farm Storage Facility Loans.

### What are Farm Storage Facility Loans?

Farm Storage Facility Loans provide low-interest financing for eligible producers to build or upgrade facilities to store commodities.

The FSFL program was created in May 2000 to address an existing grain shortage. Historically, FSFLs benefitted grain farmers, but a change in the 2008 Farm Bill extended the program to fruit and vegetable producers for cold storage. An additional change extended the program to washing and packing sheds, where fresh produce is washed, sorted, graded, labeled, boxed up, and stored before it heads to market. Since May 2000, FSA has made more than 40,000 loans for on-farm storage.

Eligible facility types include grain bins, hay barns, bulk tanks, and facilities for cold storage. Drying and handling and storage equipment including storage and handling trucks are also eligible. Eligible facilities and equipment may be new or used, permanently affixed or portable.

## **Policy Updates for Acreage Reporting**

The USDA Farm Service Agency (FSA) recently made several policy updates for acreage reporting for cover crops, revising intended use, late-filed provisions, grazing allotments as well as updated the definitions of “idle” and “fallow.”

### **Reporting Cover Crops:**

Cover crop types can be chosen from the following four categories:

- **Cereals and other grasses**
- **Legumes**
- **Brassicas and other broadleaves**
- **Mixtures**

If the cover crop is harvested for any use other than forage or grazing and is not terminated according to policy guidelines, then that crop will no longer be considered a cover crop and the acreage report must be revised to reflect the actual crop.

### **Permitted Revision of Intended use After Acreage Reporting Date:**

New operators or owners who pick up a farm after the acreage reporting deadline has passed and the crop has already been reported on the farm, have 30 calendar days from the date when the new operator or owner acquired the lease on land, control of the land or ownership and new producer crop share interest in the previously reported crop acreage. Under this policy, appropriate documentation must be provided to the County Committee’s satisfaction to determine that a legitimate operator or ownership and producer crop share interest change occurred to permit the revision.

### **Acreage Reports:**

In order to maintain program eligibility and benefits, you must timely file acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may result in ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

### **Reporting Grazing Allotments:**

FSA offices can now accept acreage reports for grazing allotments. You will use form “FSA-578” to report grazing allotments as animal unit months (AUMs) using the “Reporting Unit” field. Your local FSA office will need the grazing period start and end date and the percent of public land.

### **Definitions of Terms**

FSA defines “idle” as cropland or a balance of cropland within a Common Land Unit (CLU) (field/subfield) which is not planted or considered not planted and does not meet the definition of fallow or skip row.

Fallow is considered unplanted cropland acres which are part of a crop/fallow rotation where cultivated land that is normally planted is purposely kept out of production during a regular growing season.

---

## **Transitioning Expiring CRP Land to Beginning, Veteran or Underserved Farmers and Ranchers**

Conservation Reserve Program (CRP) contract holders are encouraged to transition their CRP acres to beginning, veteran or socially disadvantaged farmers or ranchers through the Transition Incentives Program (TIP). TIP provides annual rental payments to the landowner or operator for up to two additional years after the CRP contract expires.

CRP contract holders no longer need to be a retired or retiring owner or operator to transition their land. TIP participants must agree to sell, have a contract to sell, or agree to lease long term (at least five years) land enrolled in an expiring CRP contract to a beginning, veteran, or socially disadvantaged farmer or rancher who is not a family member.

Beginning, veteran or social disadvantaged farmers and ranchers and CRP participants may enroll in TIP beginning two years before the expiration date of the CRP contract. The TIP application must be submitted prior to completing the lease or sale of the affected lands. New landowners or renters that return the land to production must use sustainable grazing or farming methods.

---

## **Update Your Records**

FSA is cleaning up our producer record database and needs your help. Please report any changes of address, zip code, phone number, email address or an incorrect name or business name on file to our office. You should also report changes in your farm operation, like the addition of a farm by lease or purchase. You should also report any changes to your operation in which you reorganize to form a Trust, LLC or other legal entity.

FSA and NRCS program participants are required to promptly report changes in their farming operation to the County Committee in writing and to update their *Farm Operating Plan* on form CCC-902.
