Acting State Executive Director:

T. Christine Normand

Next State Committee Meeting:

To be determined

Please contact your local FSA Office for questions specific to your operation

Upcoming Deadlines and Important Dates

- **Earth day is April 22 - Earth Day and Every Day, American Farmers and Ranchers are Stewards of the Earth**
- May 31 – Final availability date for 2016 Marketing Assistance Loans & LDPs for rice, upland cotton, soybeans, corn & sorghum
- July 15 - Acreage reporting deadline for most spring-seeded crops
- Aug. 1 – final day to enroll 2017 ARC/PLC contracts
- Aug. 1 - final date to request a reconstitution-combining or dividing farms or tracts of land based on farming operation

or parish.

To find contact information for your local office go to

www.fsa.usda.gov/la

Louisiana FSA now offers SMS texting; receive text message alerts on your cell phone regarding important deadlines, reporting requirements and updates. Contact your local FSA Office for more information.

Census of Agriculture Countdown Begins for America's Farmers and Ranchers

America's farmers and ranchers will soon have the opportunity to strongly represent agriculture in their communities and industry by taking part in the 2017 Census of Agriculture. Conducted every five years by the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS), the census, to be mailed at the end of this year, is a complete count of all U.S. farms, ranches, and those who operate them.

The Census of Agriculture highlights land use and ownership, operator characteristics, production practices, income and expenditures, and other topics. The 2012 Census of Agriculture revealed that over three million farmers operated more than two million farms, spanning over 914 million acres. This was a four percent decrease in the number of U.S. farms from the previous census in 2007. However, agriculture sales, income, and expenses increased between 2007 and 2012. This telling information and thousands of other agriculture statistics are a direct result of responses to the Census of Agriculture.

Producers who are new to farming or did not receive a Census of Agriculture in 2012 still have time to sign up to receive the 2017 Census of Agriculture report form by visiting www.agcensus.usda.gov and clicking on the 'Make Sure You Are Counted' button through June. NASS defines a farm as any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year (2017).

Earth Day and Every Day, American Farmers and Ranchers are Stewards of the Earth

Farmers and ranchers are stewards of the Earth. Understanding the fragility of the land, agricultural producers want to sustain and protect the land they operate on to ensure its availability generations to come.

According to the 2012 Agriculture Census, there are 3.2 million farmers and ranchers in the United States. These producers are always looking for new and sustainable ways to operate to help preserve our natural resources.

Through their voluntary participation in the various conservation programs the U.S. Department of Agriculture's Farm Service Agency (FSA) oversees, farmers and ranchers help protect drinking water, reduce soil erosion, and help preserve and restore wildlife habitats, forests and wetlands. Thanks to American agricultural producers, there are currently more than 23 million acres enrolled in the Conservation Reserve Program.

As we recognize Earth Day on April 22, we thank our farmers and ranchers for caring for the land,

and ensuring the air we breathe and the water we drink is safe and clean.

For more information on FSA conservation programs, visit www.fsa.usda.gov.

Enrollment Period for 2017 Safety Net Coverage Continues Through Aug. 1

Producers on farms with base acres under the safety net programs established by the 2014 Farm Bill, known as the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs, can visit their local FSA office to sign contracts and enroll for the 2017 crop year. The enrollment period will continue until Aug. 1, 2017.

Since shares and ownership of a farm can change year-to-year, producers on the farm must enroll by signing a contract each program year.

If a farm is not enrolled during the 2017 enrollment period, the producers on that farm will not be eligible for financial assistance from the ARC or PLC programs for the 2017 crop should crop prices or farm revenues fall below the historical price or revenue benchmarks established by the program. Producers who made their elections in 2015 must still enroll during the 2017 enrollment period.

The ARC and PLC programs were authorized by the 2014 Farm Bill and offer a safety net to agricultural producers when there is a substantial drop in prices or revenues for covered commodities. Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity. For more details regarding these programs, go to www.fsa.usda.gov/arc-plc.

For more information, producers are encouraged to visit their local FSA office. To find a local FSA office, visit <http://offices.usda.gov>.

Farm Storage Facility Loans

FSA's Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$50,000 can be secured by a promissory note/security agreement and loans between \$50,000 and \$100,000 will require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/pricesupport or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

Loan Servicing

There are options for Farm Service Agency loan customers during financial stress. If you are a borrower who is unable to make payments on a loan, contact your local FSA Farm Loan Manager to learn about the options available to you.

Guaranteed Conservation Loans

Guaranteed Conservation Loans are available for applicants to install a conservation practice. These funds may be used for any conservation activities included in a conservation plan or Forest Stewardship Management plan. A copy of the conservation plan is required to complete the application. These loans are not limited to just family farmers. In some cases, applicants can operate non-eligible enterprises. Loan funds are issued by a participating commercial lender and guaranteed up to 80 percent by FSA or up to 90 percent for beginning and historically underserved producers.

USDA Makes it Easier to Transfer Land to the Next Generation of Farmers and Ranchers

Allows for Transfer of Certain Conservation Reserve Program Land to New Farmers; Provides Priority Enrollment in Working Lands Conservation Programs

U.S. Department of Agriculture (USDA) is offering an early termination opportunity for certain Conservation Reserve Program (CRP) contracts, making it easier to transfer property to the next generation of farmers and ranchers, including family members. The land that is eligible for the early termination is among the least environmentally sensitive land enrolled in CRP.

Normally if a landowner terminates a CRP contract early, they are required to repay all previous payments plus interest. The new policy waives this repayment if the land is transferred to a beginning farmer or rancher through a sale or lease with an option to buy. With CRP enrollment close to the Congressionally-mandated cap of 24 million acres, the early termination will also allow USDA to enroll other land with higher conservation value elsewhere.

Acres terminated early from CRP under these land tenure provisions will be eligible for priority enrollment consideration into the CRP Grasslands, if eligible; or the Conservation Stewardship Program or Environmental Quality Incentives Program, as determined by the Natural Resources Conservation Service.

According to the Tenure, Ownership and Transition of Agricultural Land survey, conducted by USDA in 2014, U.S. farmland owners expect to transfer 93 million acres to new ownership during 2015-2019. This represents 10 percent of all farmland across the nation. Details on the early termination opportunity will be available starting on Jan. 9, 2017, at local USDA service centers. For more information about CRP and to find out if your acreage is eligible for early contract termination, contact your local Farm Service Agency (FSA) office or go online at www.fsa.usda.gov/crp.

Emergency Disaster Declarations and Designations

Farmers and ranchers know all too well that natural disasters can be a common, and likely a costly, variable to their operation. The Farm Service Agency (FSA) has emergency assistance programs to provide assistance when disasters strike, and for some of those programs, a disaster designation may be the eligibility trigger. When natural disaster occurs, there is a process for requesting a USDA Secretarial disaster designation for a county. Agricultural producers can play a vital role in this process.

If you have experienced a production loss as a result of a natural disaster you may submit a request to your local FSA county office for your county to be evaluated for a Secretarial disaster designation. Once a request is received, the county office will collect disaster data and create a Loss Assessment Report. The County Emergency Board will review the Loss Assessment Report and determine if a recommendation is sent forward to the U.S. Secretary of Agriculture for the designation.

For more information on FSA disaster programs and disaster designations, visit www.fsa.usda.gov/disaster.

Baled Hay and the Imported Fire Ant

If you buy, sell, or produce baled hay, check out USDA's new factsheet titled "Questions and Answers: Moving Baled Hay From Areas Under Quarantine for Imported Fire Ant." This publication contains useful information for farmers, ranchers, hay growers, and suppliers as they respond to recent wildfires in Colorado, Kansas, Oklahoma, and Texas. Its goal is to help support commerce and the movement of hay, while guarding against the further spread of the imported fire ant. Click [here](http://www.aphis.usda.gov/plant-health/baled-hay) to open the factsheet. The Web address is <http://www.aphis.usda.gov/plant-health/baled-hay>.

Selected Interest Rates for April 2017

- 90-Day Treasury Bill — .500%
- Farm Operating Loans — Direct 2.875%
- Farm Ownership Loans — Direct 4.000%
- Farm Ownership Loans — Direct Down Payment, Beginning Farmer or Rancher — 1.50%
- Emergency Loans — 3.875%
- Farm Storage Facility Loans (7 years) — 2.250%
- Farm Storage Facility Loans (10 years) — 2.500%
- Farm Storage Facility Loans (12 years) — 2.500%
- Sugar Storage Facility Loans (15 year term) — 2.625%
- Commodity Loans — 2.000%
