USDA to Provide Agricultural Credit Training, Expand Opportunities for Farmer Veterans and Beginning Farmers

USDA announced a partnership with the Farmer Veteran Coalition (FVC) to conduct agricultural credit training sessions in the Midwest for military veterans and beginning farmers and ranchers. States under consideration to host the workshops include Iowa, Illinois, Indiana, Michigan, Minnesota, Missouri, and Nebraska.

These workshops will provide individuals interested in farming as a career, including military veterans, with methods to improve business planning and financial skills, and improve understanding of the risk management tools that can help small farm operations.

Other partners include Niman Ranch a community network of more than 700 independent family farmers and ranchers, and the Farm Credit Council and the Farm Credit System, which provides loans, leases and financial services to farmers, ranchers and rural businesses across the United States. The workshops will also include assistance with credit applications and introductions to local or regional food markets.

To learn more about veterans in agriculture, visit www.usda.gov/veterans. Visit

<u>www.fsa.usda.gov/farmloans</u> or your local Farm Service Agency (FSA) office to learn more about FSA's farm loan programs. To find your local FSA office, visit http://offices.usda.gov. More information also is available from the Farmer Veteran Coalition at www.farmvetco.org.

2016 Acreage Reporting Dates

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit your local FSA office to file an accurate crop certification report by the applicable deadline.

The following acreage reporting dates are applicable for Maryland:

Reporting Date	Crop
December 15, 2015	Fall Forage Seeding, Perennial Forage, Fall-Seeded Small Grains
January 15, 2016	Apples, Peaches
May 15, 2016	Spring Forage Seeding, Peas (Green only), Potatoes
June 15, 2016	Tomatoes
July 15, 2016	Beans (Limas only), Cucumbers (Planted 4/20-6/25 in Caroline,
	Dorchester, Kent, and Talbot Counties), All Other Crops
August 15, 2016	Beans (all types except Limas), Cucumbers (Planted 6/26-8/10 in
	Caroline, Dorchester, Kent, and Talbot Counties)

The following exceptions apply to the above acreage reporting dates:

- If the crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendars days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of "cover only," "green manure," "left standing," or "seed," then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your <u>local county FSA</u> office.

Update Your Records

FSA is cleaning up our producer record database. If you have any unreported changes of address or zip code or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

Farm Reconstitutions

When changes in farm ownership or operation take place, a farm reconstitution is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

The following are the different methods used when doing a farm recon.

Estate Method

The division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

Designation of Landowner Method

May be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

DCP Cropland Method

The division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

Default Method

The division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

Farmers to Receive Documentation of USDA Services

Local Offices Issue Receipts for Services

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

As part of FSA's mission to provide enhanced customer service, producers who visit FSA will receive documentation of services requested and provided. From December through June, FSA issued more than 327,000 electronic receipts.

The 2014 Farm Bill requires a receipt to be issued for any agricultural program assistance requested from FSA, the National Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity.

In some cases, a form or document – such as a completed and signed program enrollment form – serves as the customer receipt instead of a printed or electronic receipt. A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

To learn more about FSA, visit www.fsa.usda.gov.

Producers are Reminded to Complete NASS Crop Surveys

The National Agricultural Statistics Service (NASS) Field Offices are currently completing 2015 small grain yield surveys and will contact growers in December to complete row crop yield surveys. If you are one of the producers contacted to complete a 2015 yield survey, we encourage your participation and cooperation as many USDA agencies including the Farm Service Agency (FSA) and Risk Management Agency (RMA) use the NASS yield data for their programs.

FSA uses NASS county yield data for farm credit, conservation, disaster programs, loan and commodity programs. Under the 2014 Farm Bill, FSA uses the NASS county yield data to calculate Agriculture Risk Coverage – County (ARC-CO) benchmark revenues and current year county revenues. For example, the 2014 NASS county yield, along with the crop's marketing year average price (MYA), are used to determine the county's current year revenue to determine if the county will trigger an ARC-CO payment. An ARC-CO payment is triggered for a county when the current year revenue falls below the guarantee revenue for the crop and crop year. In cases where NASS county yield data is not available, the FSA State Committee must determine a county yield using RMA yield data or the best available yield data, including assigning a county yield using neighboring county yields from NASS or RMA.

Any information that producers provide to NASS is kept confidential and protected by federal law. NASS publishes only aggregate-level data, ensuring that no individual operation or producer can be identified. All reports will be available at www.nass.usda.gov.

Loans for Targeted Underserved Producers

FSA has a number of loan programs available to assist applicants to begin or continue in agriculture production. Loans are available for operating type loans and/or to purchase or improve farms or ranches.

While all qualified producers are eligible to apply for these loan programs, FSA has provided priority funding for members of targeted underserved applicants.

A targeted underserved applicant is one of a group whose members have been subjected to racial, ethnic or gender prejudice because of his or her identity as members of the group without regard to his or her individual qualities.

For purposes of this program, targeted underserved groups are women, African Americans, American Indians, Alaskan Natives, Hispanics, Asian Americans and Pacific Islanders.

FSA loans are only available to applicants who meet all the eligibility requirements and are unable to obtain the needed credit elsewhere.

Beginning Farmer Loans

FSA assists beginning farmers to finance agricultural enterprises. Under these designated farm loan programs, FSA can provide financing to eligible applicants through either direct or guaranteed loans. FSA defines a beginning farmer as a person who:

- Has operated a farm for not more than 10 years
- Will materially and substantially participate in the operation of the farm
- Agrees to participate in a loan assessment, borrower training and financial management program sponsored by FSA

• Does not own a farm in excess of 30 percent of the county's average size farm.

Additional program information, loan applications, and other materials are available at your local USDA Service Center. You may also visit www.fsa.usda.gov.
