### New Actively Engaged Provisions for Non-Family Joint Operations or Entities

Many Farm Service Agency programs require all program participants, either individuals or legal entities, to be “actively engaged in farming”. This means participants provide a significant contribution to the farming operation, whether it is capital, land, equipment, active personal labor and/or management. For entities, each partner, stockholder or member with an ownership interest, must contribute active personal labor and/or management to the operation on a regular basis.

The 2014 Farm Bill established additional payment eligibility provisions relating to the farm management component of meeting “actively engaged in farming”. These new provisions apply to joint operations comprised of non-family members or partners, stockholders or persons with an ownership in the farming operation. Effective for 2016 and subsequent crop years, non-family joint operations are afforded to one member

specific to your operation or county at [offices.usda.gov](http://offices.usda.gov).

that may use a significant contribution of active personal management exclusively to meet the requirements to be determined "actively engaged in farming". The person or member will be defined as the Farm Manager for the purposes of administering these new management provisions.

In some instances, additional persons or members of a non-family member joint operation who meet the definition of Farm Manager may also be allowed to use such a contribution of active personal management to meet the eligibility requirements. However, under no circumstances may the number of Farm Managers in a non-family joint operation exceed a total of three in any given crop and program year.

## **USDA Encourages Producers to Consider Risk Protection Coverage Before Crop Sales Deadlines**

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection."

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) that allows producers to determine whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

## Producers are Encouraged to Report Prevented Planting and Failed Acres

USDA Farm Service Agency (FSA) reminds producers to report prevented planting and failed acres in order to establish or retain FSA program eligibility for some programs.

Producers should report crop acreage they intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

Contact your local FSA office for a list of final planting dates by crop.

If a producer is unable to report the prevented planting acreage within the 15 calendar days following the final planting date, a late-filed report can be submitted. Late-filed reports will only be accepted if FSA conducts a farm visit to assess the eligible disaster condition that prevented the crop from being planted. A measurement service fee will be charged.

Additionally, producers with failed acres should also use form CCC-576, Notice of Loss, to report failed acres.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, Notice of Loss, within the required 15 calendar days.

For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), producers must file a Notice of Loss within 15 days of the occurrence of the disaster or when losses become apparent. Producers must timely file a Notice of Loss for failed acres on all crops including grasses.

---

## Tree Assistance Program (TAP) Sign-up

Orchardists and nursery tree growers who experience losses from natural disasters during calendar year 2016 must submit a TAP application either 90 calendar days after the disaster event or the date when the loss is apparent. TAP was authorized by the Agricultural Act of 2014 as a permanent

disaster program. TAP provides financial assistance to qualifying orchardists and nursery tree growers to replant or rehabilitate eligible trees, bushes and vines damaged by natural disasters.

Eligible tree types include trees, bushes or vines that produce an annual crop for commercial purposes. Nursery trees include ornamental, fruit, nut and Christmas trees that are produced for commercial sale. Trees used for pulp or timber are ineligible.

To qualify for TAP, orchardists must suffer a qualifying tree, bush or vine loss in excess of 15 percent mortality from an eligible natural disaster. The eligible trees, bushes or vines must have been owned when the natural disaster occurred; however, eligible growers are not required to own the land on which the eligible trees, bushes and vines were planted.

If the TAP application is approved, the eligible trees, bushes and vines must be replaced within 12 months from the date the application is approved. The cumulative total quantity of acres planted to trees, bushes or vines, for which a producer can receive TAP payments, cannot exceed 500 acres annually.

## **USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators**

Options Help More Beginning, Small and Urban Producers Gain Access to Credit

The U.S. Department of Agriculture (USDA) announced the availability of a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to \$100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

A new category of lenders will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to \$50,000 of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to \$100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

More information about the available types of FSA farm loans can be found at [www.fsa.usda.gov/farmloans](http://www.fsa.usda.gov/farmloans) or by contacting your local FSA office.
