## State Executive Director Comments

With harvest wrapping up across the state, we've been busy at Minnesota FSA tracking drought conditions and getting ready for sign up periods for the next growing season. USDA has recently designated 22 counties as primary disaster areas due to drought, with 19 contiguous counties also qualifying for [FSA Emergency Loans](#). Emergency loans can be used to meet various recovery needs including the replacement of essential items such as equipment or livestock, reorganization of a farming operation, or the refinancing of certain debts. The primary counties eligible are Anoka, Brown, Carver, Cottonwood, Dakota, Hennepin, Le Sueur, Lincoln, Lyon, McLeod, Murray, Nicollet, Pipestone, Ramsey, Redwood, Renville, Rice, Scott, Sibley, Washington, Wright, and Yellow

Medicine. Contact your local [USDA Service Center](#) to ask questions about available programs.

USDA has launched a new online tool to help farmers better navigate the FSA Farm Loan Application process. Farmers can access the [Loan Assistance Tool](#) and follow the prompts to complete the Eligibility Self- Assessment. The online tool is a great first step to explore the loan programs you may qualify for and to get started on your loan journey with FSA.

Organic crop and dairy farm financial performance data is now available from a new University of Minnesota (UMN) report, [2020-2021 Organic Farm Performance in the Upper Midwest: Whole Farm and Enterprise Reports](#). The report includes whole farm and enterprise returns as well as traditional financial indicators for organic and organic transition row crops and dairies in Minnesota and Wisconsin. Data for the report comes from the Farm Business Management (FBM) programs in each state as part of a UMN-led benchmarking project in collaboration with the Minnesota State Agricultural Centers of Excellence and the Center for Farm Financial Management. The project is funded by the USDA Organic Research and Extension Initiative Program (2019-51300-30484). Scholarships are available through the project to partially off-set FBM programming and tuition costs for certified and transitioning organic farmers. [Learn more about the organic benchmarking cost share program and apply for scholarships online](#). [Find organic reports from previous years](#) and read the [full press release](#) online. Producers can contact Gigi DiGiacomo at [gigid@umn.edu](mailto:gigid@umn.edu) with any questions.

FSA County and Urban Ag Committee ballots are being mailed out to all eligible agricultural producers and private landowners across the country. [Elections for County Committee](#) members are occurring in certain Local Administrative Areas in each of your respective counties. These committee members make important decisions about how federal farm programs are administered locally. Please take the time to vote and return your ballots to your local FSA service center or mailed by December 5, 2022.

Finally, Minnesota FSA is excited to be hiring our first dedicated position for urban agriculture. An [Urban County Executive Director](#) position is currently open on USAjobs.gov under Announcement Number: [URAG-11709697-23-MN-KW](#). Applications will be accepted through November 28, 2022. Please share with anyone who may be interested in serving our urban farming community!

Wishing you all a safe and healthy November!

Respectfully,

Whitney Place, State Executive Director

## **USDA Provides Payments of nearly \$800 Million in Assistance to Help Keep Farmers Farming**

*USDA is focused on generating long-term stability and success for distressed borrowers.*

USDA announced that distressed borrowers with qualifying USDA farm loans have already received nearly \$800 million in assistance, as part of the \$3.1 billion in assistance for distressed farm loan borrowers provided through Section 22006 of the Inflation Reduction Act (IRA). The IRA directed USDA to expedite assistance to distressed borrowers of direct or guaranteed loans administered by USDA's Farm Service Agency (FSA) whose operations face financial risk.

This announcement kicks off a process to provide assistance to distressed farm loan borrowers using several complementary approaches, with the goal of keeping them farming, removing obstacles that currently prevent many of these borrowers from returning to farming, and improving the way that USDA approaches borrowing and servicing. Through this assistance, USDA is focused on generating long-term stability and success for distressed borrowers.

Work has already started to bring some relief to distressed farmers. As of today, over 13,000 borrowers have already benefited from the resources provided under the Inflation Reduction Act as follows:

- Approximately 11,000 delinquent direct and guaranteed borrowers had their accounts brought current. USDA also paid the next scheduled annual installment for these direct loan borrowers giving them peace of mind in the near term.
- Approximately 2,100 borrowers who had their farms foreclosed on and still had remaining debt have had this debt resolved in order to cease debt collections and garnishment relieving that burden that has made getting a fresh start more difficult.

In addition to the automatic assistance already provided, USDA has also outlined steps to administer up to an additional \$500 million in payments to benefit the following distressed borrowers:

- USDA will administer \$66 million in separate automatic payments, using COVID-19 pandemic relief funds, to support up to 7,000 direct loan borrowers who used FSA's disaster-set-aside option during the pandemic to move their scheduled payments to the end of their loans.
- USDA is also initiating two case-by-case processes to provide additional assistance to farm loan borrowers. Under the first new process, FSA will review and assist with delinquencies from 1,600 complex cases, including cases in which borrowers are facing bankruptcy or foreclosure. The second new process will add a new option using existing direct loan servicing criteria to intervene more quickly and help an estimated 14,000 financially distressed borrowers who request assistance to avoid even becoming delinquent.

More details on each of the categories of assistance, including a downloadable fact sheet, are available on the [Inflation Reduction Act webpage on farmers.gov](#).

Similar to other USDA assistance, all of these payments will be reported as income and borrowers are encouraged to consult their tax advisors. USDA also has resources and partnerships with cooperators who can provide additional assistance and help borrowers navigate the process.

The announcement today is only the first step in USDA's efforts to provide assistance to distressed farm loan borrowers and respond to farmers and to improve the loan servicing efforts at USDA by adding more tools and relaxing unnecessary restrictions. Additional announcements and investments in assistance will be made as USDA institutes these additional changes and improvements.

This effort will ultimately also include adding more tools and relaxing unnecessary restrictions through assistance made possible by Congress through the IRA. Further assistance and changes to the approach will be made in subsequent phases.

## **Background**

USDA provides access to credit to approximately 115,000 producers who cannot obtain sufficient commercial credit through direct and guaranteed farm loans, which do not include farm storage facility loans or marketing assistance loans. With the funds and direction Congress provided in Section 22006 of IRA, USDA is taking action to immediately provide relief to qualifying distressed borrowers whose operations are at financial risk while working on making transformational changes to how USDA goes about loan servicing in the long run so that borrowers are provided the flexibility and opportunities needed to address the inherent risks and unpredictability associated with agricultural operations and remain in good financial standing.

In January 2021, [USDA suspended foreclosures](#) and other adverse actions on direct farm loans due to the pandemic and encouraged guaranteed lenders to follow suit. Last week, USDA reiterated this request to guaranteed lenders to provide time for the full set of IRA distressed borrower assistance to be made available before lenders take irreparable actions.

Producers can explore available loan options using the [Farm Loan Discovery Tool on farmers.gov](#) ([also available in Spanish](#)) or by contacting their [local USDA Service Center](#).

Producers can also call the FSA call center at 877-508-8364 between 8 a.m. and 7 p.m. Eastern. USDA has tax-related resources available at [farmers.gov/taxes](https://farmers.gov/taxes).

## USDA Launches Loan Assistance Tool to Enhance Equity and Customer Service

The U.S. Department of Agriculture (USDA) launched a new online tool to help farmers and ranchers better navigate the farm loan application process. This uniform application process will help to ensure all farm loan applicants receive equal support and have a consistent customer experience with USDA's Farm Service Agency (FSA) regardless of their individual circumstances.

USDA experiences a high rate of incomplete or withdrawn applications, particularly among underserved customers, due in part to a challenging and lengthy paper-based application process. The Loan Assistance Tool is available 24/7 and gives customers an online step-by-step guide that supplements the support they receive when working in person with a USDA employee, providing materials that may help an applicant prepare their loan application in one tool.

Farmers can access the Loan Assistance Tool by visiting [farmers.gov/farm-loan-assistance-tool](https://farmers.gov/farm-loan-assistance-tool) and clicking the 'Get Started' button. From here they can follow the prompts to complete the Eligibility Self-Assessment and start the farm loan journey. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

The Loan Assistance Tool is the first of multiple farm loan process improvements that will be available to USDA customers on [farmers.gov](https://farmers.gov) in the future. Other improvements and tools that are anticipated to launch in 2023 include:

- A streamlined and simplified direct loan application, reduced from 29 pages to 13 pages.
- An interactive online direct loan application that gives customers a paperless and electronic signature option, along with the ability to attach supporting documents such as tax returns.
- An online direct loan repayment feature that relieves borrowers from the necessity of calling, mailing, or visiting a local Service Center to pay a loan installment.

### Background

USDA provides access to credit to approximately 115,000 producers who cannot obtain sufficient commercial credit through direct and guaranteed farm loans. With the funds and direction Congress provided in Section 22006 of the Inflation Reduction Act, USDA is taking action to immediately [provide relief to qualifying distressed borrowers](#) whose operations are at financial risk while working on making transformational changes to loan servicing so that borrowers are provided the flexibility and opportunities needed to address the inherent risks and unpredictability associated with agricultural operations.

## USDA Releases Nationwide Farmer, Rancher and Forest Manager Prospective Customer Survey

Are you a farmer, rancher or forest manager? Please share your vital feedback with USDA by taking a nationwide survey at [farmers.gov/survey](https://farmers.gov/survey)! The survey is completely anonymous, will take about 10 minutes to complete, is available in multiple languages, and will be open until March 31, 2023. The survey focuses on gathering feedback about the Farm Service Agency, Natural Resources Conservation Service and Risk Management Agency.

All farmers, ranchers and forest managers are encouraged to take the survey. USDA would especially like to hear from prospective customers: those who don't know about USDA or have yet to work with USDA, and those who were unable to participate in the past. The survey will help USDA enhance support, improve programs and services, increase access, and advance equity for new and existing customers.

## USDA Announces Assistance for On-Farm Food Safety Expenses for Specialty Crop Growers

Agriculture Secretary Tom Vilsack announced that the U.S. Department of Agriculture (USDA) plans to provide up to \$200 million in assistance for specialty crop producers who incur eligible on-farm food safety program expenses to obtain or renew a food safety certification in calendar years 2022 or 2023. USDA's new [Food Safety Certification for Specialty Crops](#) (FSCSC) program will help to offset costs for specialty crop producers to comply with regulatory requirements and market-driven food safety certification requirements, which is part of USDA's broader effort to transform the food system to create a more level playing field for small and medium producers and a more balanced, equitable economy for everyone working in food and agriculture.

Specialty crop operations can apply for assistance for eligible expenses related to a 2022 food safety certificate issued on or after June 21, 2022, beginning June 27, 2022. USDA is delivering FSCSC to provide critical assistance for specialty crop operations, with an emphasis on equity in program delivery while building on lessons learned from the COVID-19 pandemic and supply chain disruptions. Vilsack made the announcement from Hollis, N.H., where he toured a local, family-owned farm and highlighted USDA's efforts to help reduce costs for farmers and support local economies by providing significant funding to cut regulatory costs and increase market opportunities for farmers in New Hampshire and across the nation.

## Program Details

FSCSC will assist specialty crop operations that incurred eligible on-farm food safety certification and related expenses related to obtaining or renewing a food safety certification in calendar years 2022 and 2023. For each year, FSCSC covers a percentage of the specialty crop operation's cost of obtaining or renewing their certification, as well as a portion of their related expenses.

To be eligible for FSCSC, the applicant must be a specialty crop operation; meet the definition of a small business or very small business; and have paid eligible expenses related to the 2022 (issued on or after June 21, 2022) or 2023 certification.

Specialty crop operations may receive assistance for the following costs:

- Developing a food safety plan for first-time food safety certification.
- Maintaining or updating an existing food safety plan.
- Food safety certification.
- Certification upload fees.
- Microbiological testing for products, soil amendments and water.

FSCSC payments are calculated separately for each category of eligible costs. A higher payment rate has been set for socially disadvantaged, limited resource, beginning and veteran farmers and ranchers. Details about the payment rates and limitations can be found at [farmers.gov/food-safety](https://farmers.gov/food-safety).

## Applying for Assistance

The FSCSC application period for 2022 is June 27, 2022, through January 31, 2023, and the application period for 2023 will be announced at a later date. FSA will issue payments at the time of application approval for 2022 and after the application period ends for 2023. If calculated payments exceed the amount of available funding, payments will be prorated.

Interested specialty crop producers can apply by completing the FSA-888, Food Safety Certification for Specialty Crops Program (FSCSC) application. The application, along with other required documents, can be submitted to the FSA office at any USDA Service Center nationwide by mail, fax, hand delivery or via electronic means.

Producers can visit [farmers.gov/food-safety](https://farmers.gov/food-safety) for additional program details, eligibility information and forms needed to apply.

## FSA is Accepting CRP Continuous Enrollment Offers

The Farm Service Agency (FSA) is accepting offers for specific conservation practices under the [Conservation Reserve Program \(CRP\) Continuous Signup](#).

In exchange for a yearly rental payment, farmers enrolled in the program agree to remove environmentally sensitive land from agricultural production and to plant species that will improve environmental health and quality. The program's long-term goal is to re-establish valuable land cover to

improve water quality, prevent soil erosion, and reduce loss of wildlife habitat. Contracts for land enrolled in CRP are 10-15 years in length.

Under continuous CRP signup, environmentally sensitive land devoted to certain conservation practices can be enrolled in CRP at any time. Offers for continuous enrollment are not subject to competitive bidding during specific periods. Instead they are automatically accepted provided the land and producer meet certain eligibility requirements and the enrollment levels do not exceed the statutory cap.

For more information, including a list of acceptable practices, contact your local USDA Service Center or visit [fsa.usda.gov/crp](http://fsa.usda.gov/crp).

## Is the Noninsured Crop Disaster Assistance Program Right for You?

Farmers and ranchers rely on crop insurance to protect themselves from disasters and unforeseen events, but not all crops are insurable through the USDA's Risk Management Agency. The Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) provides producers another option to obtain coverage against disaster for these crops. NAP provides financial assistance to producers of non-insured crops impacted by natural disasters that result in lower yields, crop losses, or prevents crop planting.

Commercially produced crops and agricultural commodities for which crop insurance is not available are generally eligible for NAP. Eligible crops include those grown specifically for food, fiber, livestock consumption, biofuel or biobased products, or be commodities such as value loss crops like Christmas trees and ornamental nursery, honey, maple sap, and many others. Contact your FSA office to see which crops are eligible in your state and county.

Eligible causes of loss include drought, freeze, hail, excessive moisture, excessive wind or hurricanes, earthquake, flood. These events must occur during the NAP policy coverage period, before or during harvest, and the disaster must directly affect the eligible crop. For guidance on causes of loss not listed, contact your local FSA county office.

Interested producers must apply for coverage using FSA form [CCC-471](#), "Application for Coverage," and pay the applicable service fee at the FSA office where their farm records are maintained. These must be filed by the application closing date. Closing dates vary by crop, so it is important to contact your local FSA office as soon as possible to ensure you don't miss an application closing date.

At the time of application, each producer will be provided a copy of the [NAP Basic Provisions](#), which describes how NAP works and all the requirements you must follow to maintain NAP coverage. NAP participants must provide accurate annual reports of their production in non-loss years to ensure their NAP coverage is beneficial to their individual operation.

Producers are required to pay service fees which vary depending on the number of crops and number of counties your operation is located in. The NAP service fee is the lesser of \$325 per crop or \$825 per producer per administrative county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties. Premiums also apply when producers elect higher levels of coverage with a maximum premium of \$15,750 per person or legal entity depending on the maximum payment limitation that may apply to the NAP covered producer. The service fee can be waived for beginning, qualifying veteran, and limited resource farmers and rancher., These farmers and ranchers can also receive a 50 percent reduction in the premium.

For more detailed information on NAP, download the [NAP Fact Sheet](#). To get started with NAP, we recommend you contact your [local USDA service center](#).

## USDA Offers Disaster Assistance for Producers Facing Inclement Weather

Severe weather events create significant challenges and often result in catastrophic loss for agricultural producers. Despite every attempt to mitigate risk, your operation may suffer losses. USDA offers several programs to help with recovery.

### Risk Management

For producers who have risk protection through [Federal Crop Insurance](#) or the [Noninsured Crop Disaster Assistance Program](#) (NAP), we want to remind you to report crop damage to your crop insurance agent or the local Farm Service Agency (FSA) office.

If you have crop insurance, contact your agency within 72 hours of discovering damage and be sure to follow up in writing within 15 days. If you have NAP coverage, file a Notice of Loss (also called Form CCC-576) within 15 days of loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

### Disaster Assistance

USDA also offers disaster assistance programs, which is especially important to livestock, fruit and vegetable, specialty and perennial crop producers who have fewer [risk management options](#).

First, the [Livestock Indemnity Program](#) (LIP) and [Emergency Assistance for Livestock, Honeybee and Farm-raised Fish Program](#) (ELAP) reimburses producers for a portion of the value of livestock, poultry and other animals that died as a result of a qualifying natural disaster event or for loss of grazing acres, feed and forage. And, the [Livestock Forage Disaster Program](#) (LFP) provides assistance to producers of grazed forage crop acres that

have suffered crop loss due to a qualifying drought. Livestock producers suffering the impacts of drought can also request [Emergency Haying and Grazing](#) on Conservation Reserve Program (CRP) acres.

Next, the [Tree Assistance Program](#) (TAP) provides cost share assistance to rehabilitate and replant tree, vines or shrubs loss experienced by orchards and nurseries. This complements NAP or crop insurance coverage, which cover the crop but not the plants or trees in all cases.

For LIP and ELAP, you will need to file a Notice of Loss for livestock and grazing or feed losses within 30 days and honeybee losses within 15 days. For TAP, you will need to file a program application within 90 days.

### **Documentation**

It's critical to keep accurate records to document all losses following this devastating cold weather event. Livestock producers are advised to document beginning livestock numbers by taking time and date-stamped video or pictures prior to after the loss.

Other common documentation options include:

- Purchase records
- Production records
- Vaccination records
- Bank or other loan documents
- Third-party certification

### **Other Programs**

The [Emergency Conservation Program](#) and [Emergency Forest Restoration Program](#) can assist landowners and forest stewards with financial and technical assistance to restore damaged farmland or forests.

Additionally, FSA offers a variety of loans available including emergency loans that are triggered by disaster declarations and operating loans that can assist producers with credit needs. You can use these loans to replace essential property, purchase inputs like livestock, equipment, feed and seed, or refinance farm-related debts, and other needs.

Meanwhile, USDA's Natural Resources Conservation Service (NRCS) provides financial resources through its [Environmental Quality Incentives Program](#) to help with immediate needs and long-term support to help recover from natural disasters and conserve water resources. Assistance may also be available for emergency animal mortality disposal from natural disasters and other causes.

### **Additional Resources**

Additional details – including payment calculations – can be found on our [NAP](#), [ELAP](#), [LIP](#), and [TAP](#) fact sheets. On farmers.gov, the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Farm Loan Discovery Tool](#) can help you determine program or loan options.

While we never want to have to implement disaster programs, we are here to help. To file a Notice of Loss or to ask questions about available programs, contact your local USDA Service Center. All [USDA Service Centers](#) are open for business, including those that restrict in-person visits or require appointments because of the pandemic.

## Loans for Targeted Underserved Producers

The Farm Service Agency (FSA) has several loan programs to help you start or continue an agriculture production. Farm ownership and operating loans are available.

While all qualified producers are eligible to apply for these loan programs, FSA has provided priority funding for members of targeted underserved applicants.

A targeted underserved applicant is one of a group whose members have been subjected to racial, ethnic or gender prejudice because of his or her identity as members of the group without regard to his or her individual qualities.

For purposes of this program, targeted underserved groups are women, African Americans, American Indians, Alaskan Natives, Hispanics, Asian Americans and Pacific Islanders.

FSA loans are only available to applicants who meet all the eligibility requirements and are unable to obtain the needed credit elsewhere.

## USDA Microloans Help Farmers Purchase Farmland and Improve Property

Farmers can use USDA farm ownership microloans to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013.

Microloans can also help with farmland and building purchases and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program, contact your local USDA Service Center or visit [fsa.usda.gov/microloans](https://fsa.usda.gov/microloans).

## Obtaining Payments Due to Deceased Producers

In order to claim a Farm Service Agency (FSA) payment on behalf of a deceased producer, all program conditions for the payment must have been met before the applicable producer's date of death.

If a producer earned a FSA payment prior to his or her death, the following is the order of precedence for the representatives of the producer:

- administrator or executor of the estate
- the surviving spouse
- surviving sons and daughters, including adopted children
- surviving father and mother
- surviving brothers and sisters
- heirs of the deceased person who would be entitled to payment according to the State law

For FSA to release the payment, the legal representative of the deceased producer must file a form FSA-325 to claim the payment for themselves or an estate. The county office will verify that the application, contract, loan agreement, or other similar form requesting payment issuance, was signed by the applicable deadline by the deceased or a person legally authorized to act on their behalf at that time of application.

If the application, contract or loan agreement form was signed by someone other than the deceased participant, FSA will determine whether the person submitting the form has the legal authority to submit the form.

Payments will be issued to the respective representative's name using the deceased program participant's tax identification number. Payments made to representatives are subject to offset regulations for debts owed by the deceased.

FSA is not responsible for advising persons in obtaining legal advice on how to obtain program benefits that may be due to a participant who has died, disappeared or who has been declared incompetent.

## Before You Break Out New Ground, Ensure Your Farm Meets Conservation Compliance

The term “sodbusting” is used to identify the conversion of land from native vegetation to commodity crop production after December 23, 1985. As part of the conservation provisions of the Food Security Act of 1985, if you’re proposing to produce agricultural commodities (crops that require annual tillage including one pass planting operations and sugar cane) on land that has been determined highly erodible and that has no crop history prior to December 23,

1985, that land must be farmed in accordance with a conservation plan or system that ensures no substantial increase in soil erosion.

Eligibility for many USDA programs requires compliance with a conservation plan or system on highly erodible land (HEL) used for the production of agricultural commodities. This includes Farm Service Agency (FSA) loan, disaster assistance, safety net, price support, and conservation programs; Natural Resources Conservation Service (NRCS) conservation programs; and Risk Management Agency (RMA) Federal crop insurance.

Before you clear or prepare areas not presently under production for crops that require annual tillage, you are required to file Form AD-1026 “Highly Erodible Land Conservation and Wetland Conservation Certification,” with FSA indicating the area to be brought into production. The notification will be referred to NRCS to determine if the field is considered highly erodible land. If the field is considered HEL, you are required to implement a conservation plan or system that limits the erosion to the tolerable soil loss (T) for the predominant HEL soil on those fields.

In addition, prior to removing trees or conducting any other land manipulations that may affect wetlands, remember to update form AD-1026, to ensure you remain in compliance with the wetland conservation provisions.

Prior to purchasing or renting new cropland acres, it is recommended that you check with your local USDA Service Center to ensure your activities will be in compliance with the highly erodible land and wetland conservation provisions.

For additional information on highly erodible land conservation and wetland conservation compliance, contact [your local USDA Service Center](#).
