### USDA To Offer Certificates for Farm Commodities Non-Recourse Pledged To Marketing Loans

USDA's Farm Service Agency (FSA) routinely provides agricultural producers with marketing assistance loans that provide interim cash flow without having to sell the commodities when market prices are at harvest time lows. The loans allow the producer to store and delay the sale of the commodity until more favorable market conditions emerge, while also providing for a more orderly marketing of commodities throughout the marketing year.

Producers who have crops pledged as collateral for a nonrecourse marketing assistance loan can now purchase a

**Next State Committee Meeting:** TBD

**Interest Rates:**

90-Day Treasury Bill 0.250%  
Farm Operating Loans - Direct 2.25%

Farm Ownership Loans - Direct 3.75%

Farm Ownership Loans - Direct Down Payment, Beginning Farmer 1.50%

Emergency Loans 3.250%

Farm Storage Facility Loan (7 year) 1.625%

Farm Storage Facility Loan (10 years) 1.875%

Farm Storage Facility Loan (12 years) 1.875%

Please contact your local FSA Office for questions specific to your operation or county.

commodity certificate that may be exchanged for the outstanding loan collateral. The authority is provided by the 2016 Consolidated Appropriations Act, legislation enacted by Congress in December. Commodity certificates are available beginning with the 2015 crop in situations where the applicable marketing assistance loan rate exceeds the exchange rate. **Currently the only eligible commodity is cotton.**

These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan.

Any gain realized by repaying a loan with commodity certificates does not count against a producer's payment limitation. Therefore, the commodity certificate exchange is particularly beneficial to producers who have, or may, reach the \$125,000 payment limitation. In addition, any gain realized by repaying a loan with commodity certificate exchange is not subject to the Adjusted Gross Income (AGI) provisions, or the "actively engaged" provisions.

Producers may contact their FSA office that maintains their loan or their loan service agent for additional information. Producers who do business with Cooperative Marketing Associations (CMA) or Designated Marketing Associations (DMA) may contact their respective associations for additional information. To learn more about commodity certificates, visit [www.fsa.usda.gov/pricesupport](http://www.fsa.usda.gov/pricesupport).

## USDA's Building Blocks for Climate Smart Agriculture & Forestry

The U.S. Department of Agriculture announced a comprehensive and detailed approach to support farmers, ranchers, and forest land owners in their response to address the causes of climate change in April 2015. The framework consists of 10 building blocks that span a range of technologies and practices to reduce greenhouse gas emissions, increase carbon storage, and generate clean renewable energy through mitigation.

USDA's strategy focuses on climate-smart practices designed for working production systems that provide multiple economic and environmental benefits in addition to supporting resilience to extreme weather, reduced emissions and increased carbon storage.

Through this comprehensive set of voluntary programs and initiatives spanning its programs, USDA expects to reduce net emissions and enhance carbon sequestration by over **120 million metric tons** of CO2 equivalent (MMTCO2e) per year – about 2% of economy-wide net greenhouse emissions – by 2025. That's the equivalent of taking **25 million cars** off the road, or offsetting the emissions produced by powering nearly **11 million homes** last year.

For more information on the Building Blocks for Climate Smart Agriculture and Forestry click the following link: <http://www.usda.gov/documents/climate-smart-fact-sheet.pdf> . For additional information on ways to consider greenhouse gases when managing land, refer to the USDA Climate Hub webpage: <http://www.climatehubs.oce.usda.gov/>.

## Farm Loan Graduation Reminder

FSA Direct Loans are considered a temporary source of credit that is available to producers who do not meet normal underwriting criteria for commercial banks.

FSA periodically conducts Direct Loan graduation reviews to determine a borrower's ability to graduate to commercial credit. If the borrower's financial condition has improved to a point where they can refinance their debt with commercial credit, they will be asked to obtain other financing and partially or fully pay off their FSA debt.

By the end of a producer's operating cycle, the Agency will send a letter requesting a current balance sheet, actual financial performance and a projected farm budget. The borrower has 30 days to return the required financial documents. This information will be used to evaluate the borrower's potential for refinancing to commercial credit.

If a borrower meets local underwriting criteria, FSA will send the borrower's name, loan type, balance sheet and projected cash flow to commercial lenders. The borrower will be notified when loan information is sent to local lenders.

If any lenders are interested in refinancing the borrower's loan, FSA will send the borrower a letter with a list of lenders that are interested in refinancing the loan. The borrower must contact the lenders and complete an application for commercial credit within 30 calendar days.

## Farm Service Agency County Committee Nomination Period Begins June 15

The U.S. Department of Agriculture today announced that the nomination period for local Farm Service Agency (FSA) county committees begins on Wednesday, June 15, 2016.

It is important for county committees to reflect America's diversity, all eligible farmers and ranchers, including beginning farmers are encouraged to get involved in this year's elections. FSA has seen an increase in the number of nominations for qualified candidates, especially among women and minorities – a trend the Agency would like to see continue.

To be eligible to serve on a FSA county committee, a person must participate or cooperate in an agency administered program, be eligible to vote in a county committee election and reside in the local administrative area where they are nominated.

Farmers and ranchers may nominate themselves or others. Organizations representing minorities and women also may nominate candidates. To become a candidate, an eligible individual must sign an FSA-669A nomination form. The form and other information about FSA county committee elections are available at [www.fsa.usda.gov/elections](http://www.fsa.usda.gov/elections). Nomination forms for the 2016 election must be postmarked or received in the local USDA Service Center by close of business on Aug. 1, 2016.

FSA will mail election ballots to eligible voters beginning Nov. 7, 2016. Ballots will be due back to the local county office either via mail or in person by Dec. 5, 2016. Newly elected committee members and alternates will take office on Jan. 1, 2017.

While FSA county committees do not approve or deny farm ownership or operating loans, they make decisions on disaster and conservation programs, emergency programs, commodity price support loan programs and other agricultural issues. Members serve three-year terms. Nationwide, there are about 7,800 farmers and ranchers serving on FSA county committees. Committees consist of three to 11 members that are elected by eligible producers

## **MAL and LDP Policy Changes for Crop Years 2015-2018**

The Agricultural Act of 2014 authorized 2014-2018 crop year Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs), with a few minor policy changes.

Among the changes, farm-stored MAL collateral transferred to warehouse storage will retain the original loan rate, be allowed to transfer only the outstanding farm-stored quantity with no additional quantity allowed and will no longer require producers to have a paid for measurement service when moving or commingling loan collateral.

MALs and LDPs provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, peanuts, cotton, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar and extra-long staple cotton.

FSA is now accepting requests for 2016 MALs and LDPs for all eligible commodities after harvest.

Before MAL repayments with a market loan gain or LDP disbursements can be made, producers must meet the requirements of actively engaged in farming, cash rent tenant and member contribution.

Commodity certificates are available to loan holders having outstanding nonrecourse loans for wheat, upland cotton, rice, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), peanuts, wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan. MALs redeemed with commodity certificates are not subject to the actively engaged in farming, cash-rent tenant, Adjusted Gross Income provisions or the payment limitation.

To be considered eligible for an LDP, producers must have form [CCC-633EZ](#), Page 1 on file at their local FSA Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

The 2014 Farm Bill also establishes payment limitations per individual or entity not to exceed \$125,000 annually on certain commodities for the following program benefits: price loss coverage payments, agriculture risk coverage payments, marketing loan gains (MLGs) and LDPs. These payment limitations do not apply to MAL loan disbursements or redemptions using commodity certificate exchange.

Adjusted Gross Income (AGI) provisions were modified by the 2014 Farm Bill, which states that a producer whose total applicable three-year average AGI exceeds \$900,000 is not eligible to receive an MLG or LDP. Producers must have a valid CCC-941 on file to earn a market gain of LDP. The AGI does not apply to MALs redeemed with commodity certificate exchange.

For more information and additional eligibility requirements, please visit a nearby USDA Service Center or FSA's website [www.fsa.usda.gov](http://www.fsa.usda.gov).

---

## Final Planting Dates

All producers are encouraged to contact their local FSA office for more information on the final planting date for specific crops. The final planting dates vary by crop, planting period and county so please contact your local FSA office for a list of county-specific planting deadlines. The timely planting of a crop, by the final planting date, may prevent loss of program benefits.

---

## FSA Issues Fiscal Year 2015 Impacts Report

2015 marks the 20th anniversary of USDA's Farm Service Agency, but FSA's roots date back nearly 80 years, to the days of the Great Depression and the Dust Bowl, when the rural economy was in crisis and America's farmers and ranchers needed assistance. At that time, Congress empowered USDA to provide a strong safety-net for farm families, helping them navigate the unpredictability of natural disasters and volatile market conditions.

Today, technological advancements in equipment, crop and veterinary sciences, soil and water conservation, and pest and nutrient management, all have resulted in agriculture becoming stronger than we've ever known - - certainly far stronger than the days of our grandparents and great-grandparents. But the unpredictability of weather and markets remain. That means the FSA mission is as important as it's ever been to ensure the domestic agriculture sector continues to deliver an abundant, safe, and affordable food and fiber supply for the American people.

The [FSA Impacts Report](#) shows selected highlights for fiscal year 2015. This report highlights the achievements of FSA and will ensure that the path forward continues to demonstrate our commitment to rural America.

## USDA Expands Safety-Net for Dairy Operations Adding Next-Generation Family Members

Dairy farms participating in the Margin Protection Program (MPP) can now update their production history when an eligible family member joins the operation. The voluntary program, established by

the 2014 Farm Bill, protects participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below levels of protection selected by the applicant.

The U.S. Department of Agriculture's (USDA) Farm Service Agency (FSA) published a final rule which makes these changes effective on April 13, 2016. Any dairy operation already enrolled in the Margin Protection Program that had an intergenerational transfer occur will have an opportunity to increase the dairy operations production history during the 2017 registration and annual coverage election period. The next election period begins on July 1, 2016, and ends on Sept. 30, 2016. For intergenerational transfers occurring on or after July 1, 2016, notification must be made to the FSA within 60 days of purchasing the additional cows. Each participating dairy operation is authorized one intergenerational transfer at any time of its choosing until 2018.

For \$100 a year, dairy producers can receive basic catastrophic protection that covers 90 percent of milk production at a \$4 margin coverage level. For additional premiums, operations can protect 25 to 90 percent of production history with margin coverage levels from \$4.50 to \$8, in 50 cent increments. Annual enrollment in the program is required in order to receive margin protection. The final rule also provides improved risk protection for dairy farmers that pay premiums to buy-up higher levels of coverage by clarifying that 90 percent of production is covered below the \$4 level even if a lower percentage was selected above the \$4 margin.

Earlier this year, FSA gave producers the opportunity to pay their premium through additional options including via their milk cooperative or handler. This rule facilitates those options and also clarifies that the catastrophic level protection at \$4 will always cover 90 percent of the production history, even if a producer selected a less than a 90 percent percentage for the buy-up coverage.

Assuming current participation, had the Margin Protection Program existed from 2009 to 2014, premiums and fees would have totaled \$500 million while providing producers with \$2.5 billion in financial assistance, nearly \$1 billion more than provided by the old Milk Income Loss Contract program during the same period.

For more information, visit FSA online at [www.fsa.usda.gov/dairy](http://www.fsa.usda.gov/dairy) or stop by a local FSA office and ask about the Margin Protection Program. To find a local FSA office in your area, visit <http://offices.usda.gov>.

## **Save Time – Make an Appointment with FSA**

To insure maximum use of your time and to insure that you are afforded our full attention to your important business needs, please call our office ahead of your visit to set an appointment and to discuss any records or documentation that you may need to have with you when you arrive for your appointment. For local FSA Service Center contact information, please visit: <http://offices.sc.egov.usda.gov/locator/app>.

---

## **USDA Unveils New Improvement to Streamline Crop Reporting**

Farmers and ranchers filing crop acreage reports with the Farm Service Agency (FSA) and participating insurance providers approved by the Risk Management Agency (RMA) now can provide the common information from their acreage reports at one office and the information will be electronically shared with the other location.

This new process is part of the USDA Acreage Crop Reporting Streamlining Initiative (ACRSI). This interagency collaboration also includes participating private crop insurance agents and insurance

companies, all working to streamline the information collected from farmers and ranchers who participate in USDA programs.

Once filing at one location, data that's important to both FSA and RMA will be securely and electronically shared with the other location avoiding redundant and duplicative reporting, as well as saving farmers and ranchers time.

Since 2009, USDA has been working to streamline the crop reporting process for agricultural producers, who have expressed concerns with providing the same basic common information for multiple locations. In 2013, USDA consolidated the deadlines to 15 dates for submitting these reports, down from the previous 54 dates at RMA and 17 dates for FSA. USDA representatives believe farmers and ranchers will experience a notable improvement in the coming weeks as they approach the peak season for crop reporting later this summer.

More than 93 percent of all annual reported acres to FSA and RMA now are eligible for the common data reporting, and USDA is exploring adding more crops. Producers must still visit both locations to validate and sign acreage reports, complete maps or provide program-specific information. The common data from the first-filed acreage report will now be available to pre-populate and accelerate completion of the second report. Plans are underway at USDA to continue building upon the framework with additional efficiencies at a future date.

Farmers and ranchers are also reminded that they can now access their FSA farm information from the convenience of their home computer. Producers can see field boundaries, images of the farm, conservation status, operator and owner information and much more.

The new customer self-service portal, known as **FSAFarm+**, gives farmers and ranchers online access to securely view, print or export their personal farm data. To enroll in the online service, producers are encouraged to contact their local FSA office for details. To find a local FSA office in your area, visit <http://offices.usda.gov>.
