Gayle Martin

USDA Reopens Continuous CRP Signup

USDA's Farm Service Agency (FSA) will accept applications beginning June 3, 2019, for certain practices under the continuous Conservation Reserve Program (CRP) signup and will offer extensions for expiring CRP contracts. The 2018 Farm Bill reauthorized CRP, one of the country's largest conservation programs.

FSA stopped accepting applications last fall for the continuous CRP signup when 2014 Farm Bill authority expired. Since passage of the 2018 Farm Bill last December, Fordyce said FSA has carefully analyzed the language and determined that a limited signup prioritizing water-quality practices furthers conservation goals and makes sense for producers as FSA works to fully implement the program.

Continuous CRP Signup

Next County Committee Meeting: TBA

To find contact information for your local office go to www.fsa.usda.gov/ms

This year's signup will include such practices as grassed waterways, filter strips, riparian buffers, wetland restoration and others. [View a full list of practices approved for this program.](#)

Continuous signup enrollment contracts are 10 to 15 years in duration. Soil rental rates will be set at 90 percent of the existing rates. Incentive payments will not be offered for these contracts.

Nominations Open for the 2019 County Committee Elections

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) encourages all farmers, ranchers, and FSA program participants to take part in the County Committee election nomination process.

FSA's county committees are a critical component of the day-to-day operations of FSA and allow grassroots input and local administration of federal farm programs.

Committees are comprised of locally elected agricultural producers responsible for the fair and equitable administration of FSA farm programs in their counties. Committee members are accountable to the Secretary of Agriculture. If elected, members become part of a local decision making and farm program delivery process.

A county committee is composed of three to 11 elected members from local administrative areas (LAA). Each member serves a three-year term. One-third of the seats on these committees are open for election each year.

County committees may have an appointed advisor to further represent the local interests of underserved farmers and ranchers. Underserved producers are beginning, women and other minority farmers and ranchers and landowners and/or operators who have limited resources.

All nomination forms for the 2019 election must be postmarked or received in the local USDA service center by Aug. 1, 2019. For more information on FSA county committee elections and appointments, refer to the FSA fact sheet: *Eligibility to Vote and Hold Office as a COC Member* available online at: fsa.usda.gov/elections.

USDA and SCORE Joining Forces to Find Mentors

If you are a farmer or rancher, or have agricultural or business experience, join us in supporting the next generation and in investing in your local community! Your experiences and knowledge as a business owner, agricultural professional, or farmer can provide vital support to the community you live in.

USDA is collaborating with SCORE – www.score.org - the nation's largest network of volunteer, expert business mentors in an effort to expand the field of available agricultural mentors and provide free business mentoring to farmers, ranchers, and other agricultural and rural business owners. SCORE is currently looking for volunteers with experience in an agriculture-related field who would like to become a part of an extended field of volunteers. The organization's Orientation and Mentoring Certification program provides volunteers with everything needed to be a successful volunteer. Training includes background about SCORE's mission and services, as well as guidance on how to be a business mentor, including enhancement of listening, interviewing and problem-solving skills.

Current SCORE volunteer mentors have backgrounds in finance, accounting, marketing, operations, business and financial planning. The mentors provide local expertise and free one-on-one business mentoring to new and existing farmers and business owners. Together they work

through the process of starting up or maintaining agricultural and rural businesses. No matter what stage a business is in, SCORE volunteer mentors can help in developing business plans, navigating financing and legal issues, identifying new markets, and other topics, in order to help their clients succeed.

Acreage Crop Reporting Streamlining Initiative (ACRSI)

Farmers and ranchers filing crop acreage reports with the Farm Service Agency (FSA) and participating insurance providers approved by the Risk Management Agency (RMA) now can provide the common information from their acreage reports at one office and the information will be electronically shared with the other location. This new process is part of the USDA Acreage Crop Reporting Streamlining Initiative (ACRSI).

Producers must still visit both their local FSA office and their insurance provider to validate and sign acreage reports, complete maps, or provide program-specific information, including reporting uninsured crops to FSA. The common data from the first-filed acreage report will now be available to pre-populate and accelerate completion of the second report.

USDA Announces New Decision Tool for New Dairy Margin Coverage Program

USDA announced the availability of a new [web-based tool](#) – developed in partnership with the University of Wisconsin – to help dairy producers evaluate various scenarios using different coverage levels through the new [Dairy Margin Coverage](#) (DMC) program.

The 2018 Farm Bill authorized DMC, a voluntary risk management program that offers financial protection to dairy producers when the difference between the all milk price and the average feed cost (the margin) falls below a certain dollar amount selected by the producer. It replaces the program previously known as the Margin Protection Program for Dairy. Sign up for this USDA Farm Service Agency (FSA) program opens on June 17.

The University of Wisconsin launched the decision support tool in cooperation with FSA and funded through a cooperative agreement with the USDA Office of the Chief Economist. The tool was designed to help producers determine the level of coverage under a variety of conditions that will provide them with the strongest financial safety net. It allows farmers to simplify their coverage level selection by combining operation data and other key variables to calculate coverage needs based on price projections.

The decision tool assists producers with calculating total premiums costs and administrative fees associated with participation in DMC. It also forecasts payments that will be made during the coverage year.

For more information, access the tool at fsa.usda.gov/dmc-tool. For DMC sign up, eligibility and related program information, visit fsa.usda.gov or contact your local [USDA Service Center](#).

Producers are Encouraged to Report Prevented Planting and Failed Acres

USDA Farm Service Agency (FSA) reminds producers to report prevented planting and failed acres in order to establish or retain FSA program eligibility for some programs.

Producers should report crop acreage they intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form *CCC-576, Notice of*

Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA) contact your local FSA office for a list of final planting dates by crop.

If a producer is unable to report the prevented planting acreage within the 15 calendar days following the final planting date, a late-filed report can be submitted. Late-filed reports will only be accepted if FSA conducts a farm visit to assess the eligible disaster condition that prevented the crop from being planted. A measurement service fee will be charged.

Additionally, producers with failed acres should also use form *CCC-576, Notice of Loss*, to report failed acres.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, *Notice of Loss*, within the required 15 calendar days.

For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), producers must file a *Notice of Loss* within 15 days of the occurrence of the disaster or when losses become apparent. Producers must timely file a *Notice of Loss* for failed acres on all crops including grasses.

USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators

Options Help More Beginning, Small and Urban Producers Gain Access to Credit

Producers can apply for a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to \$100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

A new category of lenders will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to \$50,000 of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to \$100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

More information about the available types of FSA farm loans can be found at www.fsa.usda.gov/farmloans or by contacting your local FSA office.

USDA Microloans Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program has been hugely successful, providing more than 16,800 low-interest loans, totaling over \$373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office.
