### USDA Reminds Producers of Aug. 23 Deadline to Re-enroll or Extend Expiring CRP Contracts

Farmers and ranchers with expiring [Conservation Reserve Program \(CRP\)](#) contracts have until August 23, 2019, to re-enroll in certain CRP continuous signup practices or, if eligible, select a one-year contract extension. USDA's Farm Service Agency (FSA) is also accepting offers from landowners who want to enroll for the first time in one of the country's largest conservation programs. CRP signup opened June 3 and ends August 23.

This year's CRP continuous signup includes practices, such as grass waterways, filter strips, riparian buffers, wetland restoration and others. [View a full list of practices approved for this signup.](#) Continuous signup contracts last for 10 to 15 years. Soil

To find contact information for your local office go to [www.fsa.usda.gov/ms](http://www.fsa.usda.gov/ms)

Next State Committee Meeting: TBA

rental rates are set at 90 percent of 2018 rates. Incentive payments are not offered for these practices.

Producers interested in applying for CRP continuous practices, including those under existing CREP agreements, or who want to extend their contract, should contact their USDA service center by August 23.

To locate your local FSA office, visit [www.farmers.gov](http://www.farmers.gov). More information on CRP can be found at [www.fsa.usda.gov/crp](http://www.fsa.usda.gov/crp).

## FSA Encourages Farmers and Ranchers to Vote in County Committee Elections

The 2019 Farm Service Agency County Committee Elections began on Nov. 4, when ballots were mailed to eligible voters. The deadline to return the ballots to local FSA offices, or to be postmarked, is Dec. 2, 2019.

County committee members are an important component of the operations of FSA and provide a link between the agricultural community and USDA. Farmers and ranchers elected to county committees help deliver FSA programs at the local level, applying their knowledge and judgment to make decisions on commodity price support programs; conservation programs; incentive indemnity and disaster programs for some commodities; emergency programs and eligibility. FSA committees operate within official regulations designed to carry out federal laws.

To be an eligible voter, farmers and ranchers must participate or cooperate in an FSA program. A person who is not of legal voting age but supervises and conducts the farming operations of an entire farm, may also be eligible to vote.

Eligible voters in local administrative area, who do not receive a ballot can obtain one from their local USDA Service Center.

Newly elected committee members will take office Jan. 1, 2020.

---

## Policy Updates for Acreage Reporting

The USDA Farm Service Agency (FSA) recently made several policy updates for acreage reporting for cover crops, revising intended use, late-filed provisions, grazing allotments as well as updated the definitions of “idle” and “fallow.”

In order to maintain program eligibility and benefits, producers must timely file acreage reports. Failure to file an acreage report by the crop acreage reporting deadline may result in ineligibility for future program benefits. FSA will not accept acreage reports provided more than a year after the acreage reporting deadline.

---

## Farm Storage Facility Loans

FSA's Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit [www.fsa.usda.gov/pricesupport](http://www.fsa.usda.gov/pricesupport) or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>

## Breaking New Ground

Agricultural producers are reminded to consult with FSA and NRCS before breaking out new ground for production purposes as doing so without prior authorization may put a producer's federal farm program benefits in jeopardy. This is especially true for land that must meet Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions.

Producers with HEL determined soils are required to apply tillage, crop residue and rotational requirements as specified in their conservation plan.

Producers should notify FSA as a first point of contact prior to conducting land clearing or drainage type projects to ensure the proposed actions meet compliance criteria such as clearing any trees to create new cropland, then these areas will need to be reviewed to ensure such work will not risk your eligibility for benefits.

Landowners and operators complete the form AD-1026 - Highly Erodible Land Conservation (HEL) and Wetland Conservation (WC) Certification to identify the proposed action and allow FSA to determine whether a referral to Natural Resources Conservation Service (NRCS) for further review is necessary.

---

## FSA Offers Safety Net Programs for Honeybee Producers

The Farm Service Agency (FSA) administers two programs that have specific safety net benefits for producers of honeybees and honey. The Noninsured Crop Disaster Assistance Program (NAP) and the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP) assist producers when disasters impact honey production or damage or destroy colonies, hives or honeybee feed.

NAP is designed to reduce financial losses when natural disasters result in lower yields or crop losses, including honey. NAP coverage is equivalent to catastrophic insurance, meaning it covers up to 50 percent of a producer's normal yield (must have at least a 50 percent loss) at 55 percent of the average market price. The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the "buy-up" option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production.

The NAP service fee is the lesser of \$325 per crop or \$825 per producer per administrative county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties. Eligible causes of loss include drought, freeze, hail, excessive moisture, excessive wind, hurricanes, earthquake, flood, and conditions related to damaging weather such as excessive heat, plant disease, volcanic smog or insect infestation.

Producers must apply for NAP coverage by Dec. 1 prior to the year for which they are seeking coverage.

## Reminder to FSA Direct and Guaranteed Borrowers with Real Estate Security

Farm Service Agency would like to remind farm loan borrowers who have pledged real estate as security for their loans, of key items for maintaining loan collateral. It is required that borrowers must obtain prior consent, or approval, by either FSA, for direct loans, or by a guaranteed lender, for any transaction affecting real estate security. Examples of these transactions include, but are not limited to:

- Leases of any kind;
- Easements of any kind;
- Subordinations;
- Partial releases, and
- Sales

Failure to meet or follow the requirements set forth in the loan agreement, promissory note, and other security instruments could lead to nonmonetary default which could jeopardize your current and future loans.

It is critical that borrowers keep an open line of communication with their FSA loan staff or guaranteed lender when it comes to changes in their operation. For more information on borrower responsibilities, read [Your FSA Farm Loan Compass](#).

---

## Guaranteed Conservation Loans

Guaranteed Conservation Loans are available for applicants to install a conservation practice. These funds may be used for any conservation activities included in a conservation plan or Forest Stewardship Management plan. A copy of the conservation plan is required to complete the application. These loans are not limited to just family farmers. In some cases, applicants can operate non-eligible enterprises. Loan funds are issued by a participating commercial lender and guaranteed up to 80 percent by FSA or up to 90 percent for beginning and historically underserved producers.

## USDA Opens Signup for Market Facilitation Program

*Enrollment Now Open through Dec. 6*

Signup opens today for the Market Facilitation Program (MFP), a U.S. Department of Agriculture (USDA) program to assist farmers who continue to suffer from damages because of unjustified trade retaliation from foreign nations. Through MFP, USDA will provide up to \$14.5 billion in direct payments to impacted producers, part of a broader trade relief package announced in late July. The sign-up period runs through Dec. 6.

MFP payments will be made to producers of certain non-specialty and specialty crops as well as dairy and hog producers.
