Message from the State Executive Director

Greetings Neighbor,

I hope everyone had a great Memorial Day weekend. I would like to respectfully remember those who gave their lives in the pursuit of our everyday freedoms. Now that the month of May is past us, we look forward to this summer and all of the wonderful opportunities to improve on your goals for this year. Below are some updates for program deadlines as well as some articles pertaining to FSA at this time.

As part of USDA's broader effort to support organic producers and in response to stakeholder feedback, this year FSA increased the cost share to the maximum amount allowed by statute. USDA will cover up to 75% of the costs associated with organic certification, up to \$750 per category, through the Organic Certification Cost Share Program (OCCSP).

We are seeking nomination for four positions on the Federal Advisory Committee for Urban Agriculture and Innovative Production. Nominations will be open to the public from May 15, 2023, to July 15, 2023. The 12-member Committee, which first convened in March 2022, is part of USDA's efforts to increase support for urban agriculture and innovative production. Member of the Committee provide input on policy development and help identify barriers to urban agriculture as USDA works to promote urban farming and the economic opportunities it provides in cities across the country.

Jonas Moya State Executive Director

OFFICE CLOSURE

- Juneteenth National Independence Day June 19
- Independence Day July 4
- Labor Day September 4
- Columbus Day- October 9
- Veterans Day (observed) November 10
- Thanksgiving November 23
- Christmas Day December 25

<u>IMPORTANT DATES</u> (Please check with your local office for other deadlines that may apply to your particular situation) <u>Service Center Locator</u>

Acreage Reporting

- All other crops, Perennial Forage, Potatoes (Except Curry, Lea, and Roosevelt Couties) * Sign Up Ends July 15
- Hemp * Sign Up Ends July 31
- Beans * Sign Up Ends August 15

Conservation Programs

- o Conservation Reserve Program (Continuous) Signup 59 Ongoing
- Pandemic Assistance Revenue Program (PARP)
 - Sign Up Ends July 14
- Emergency Relief Program (ERP) Phase 2
 - Sign Up Ends July 14

USDA Announces Signup for Crop and Revenue Loss Assistance for Agricultural Producers

Signup began January 23 for additional emergency relief from the U.S. Department of Agriculture (USDA) through the Emergency Relief Program (ERP) Phase Two.

To be eligible for Phase Two, producers must have suffered a decrease in allowable gross revenue in 2020 or 2021 due to necessary expenses related to losses of eligible crops from a qualifying natural disaster event. Eligible crops include both traditional insurable commodities and specialty crops that are produced in the United States as part of a farming operation and are intended to be commercially marketed. This also includes losses of eligible on-farm stored commodities. ERP Phase 2 applicants will use the following tax years when selecting allowable gross revenue:

- Benchmark years: 2018 and/or 2019; estimated for new producers with no 2018 or 2019 revenue or adjusted if the benchmark years are not representative of the disaster year due to a change in operation size.
- Disaster years: 2020 and/or 2021. The allowable gross revenue for the specific disaster year will be based on the tax year applicable to that revenue (2020, 2021 or 2022).

The ERP tool assists producers in calculating allowable gross revenue, as well as adjusted revenue for the benchmark years 2018 and 2019, and allowable gross revenue for representative tax years 2020-2022 which represent disaster years 2020 and 2021. Once producers complete the allowable gross revenue entries, they are able to print forms FSA-521 and FSA-521A through this tool.

The ERP Phase 2 and PARP application period is open from January 23 through June 2 2023.

For more information on payment calculations, payment limitations or how to determine allowable gross revenue, please reference the <u>ERP Phase 2 fact sheet</u>.

USDA Develops Simplified Direct Loan Application to Improve Customer Service

The U.S. Department of Agriculture (USDA) has developed a simplified direct loan application to provide improved customer experience for producers applying for loans from the Farm Service Agency (FSA). The simplified direct loan application enables producers to complete a more streamlined application, reduced from 29 to 13 pages. Producers will also have the option to complete an electronic fillable form or prepare a traditional, paper application for submission to their local FSA farm loan office. The paper and electronic versions of the form will be available starting March 1, 2023.

Approximately 26,000 producers submit a direct loan application to the FSA annually, but there is a high rate of incomplete or withdrawn applications, due in part to a challenging and

lengthy paper-based application process. Coupled with the Loan Assistance Tool released in October 2022, the simplified application will provide all loan applicants access to information regarding the application process and assist them with gathering the correct documents before they begin the process. This new application will help farmers and ranchers submit complete loan applications and reduce the number of incomplete, rejected, or withdrawn applications.

In October 2022, USDA launched the Loan Assistance Tool, an online step-by-step guide that provides materials to help an applicant prepare their farm loan application in one tool. Farmers can access the Loan Assistance Tool by visiting farmers.gov/farm-loan-assistance-tool and clicking the 'Get Started' button. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser. A version compatible with mobile devices is expected to be available by the summer. It does not work in Internet Explorer.

The simplified direct loan application and Loan Assistance Tool are the first of multiple farm loan process improvements that will be available to USDA customers on farmers.gov in the future. Other improvements that are anticipated to launch in 2023 include:

- An interactive online direct loan application that gives customers a paperless and electronic signature option, along with the ability to attach supporting documents such as tax returns.
- An online direct loan repayment feature that relieves borrowers from the necessity of calling, mailing, or visiting a local Service Center to pay a loan installment.

USDA provides access to credit to approximately 115,000 producers who cannot obtain sufficient commercial credit through direct and guaranteed farm loans. With the funds and direction Congress provided in Section 22006 of the Inflation Reduction Act, USDA took action in October 2022 to provide relief to qualifying distressed borrowers while working on making transformational changes to loan servicing so that borrowers are provided the flexibility and opportunities needed to address the inherent risks and unpredictability associated with agricultural operations.

Soon, all direct loan borrowers will receive a letter from USDA describing the circumstances under which additional payments will be made to distressed borrowers and how they can work with their FSA local office to discuss these options. Producers can explore all available options on all FSA loan options at <u>fsa.usda.gov</u> or by contacting their <u>local USDA Service</u> <u>Center</u>.

USDA Launches Loan Assistance Tool to Enhance Equity and Customer Service

The U.S. Department of Agriculture (USDA) launched a new online tool to help farmers and ranchers better navigate the farm loan application process. This uniform application process will help to ensure all farm loan applicants receive equal support and have a consistent customer experience with USDA's Farm Service Agency (FSA) regardless of their individual circumstances.

USDA experiences a high rate of incomplete or withdrawn applications, particularly among underserved customers, due in part to a challenging and lengthy paper-based application process. The Loan Assistance Tool is available 24/7 and gives customers an online step-by-step guide that supplements the support they receive when working in person with a USDA employee, providing materials that may help an applicant prepare their loan application in one tool.

Farmers can access the Loan Assistance Tool by visiting farmers.gov/farm-loan-assistance-tool and clicking the 'Get Started' button. From here they can follow the prompts to complete the Eligibility Self-Assessment and start the farm loan journey. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

The Loan Assistance Tool is the first of multiple farm loan process improvements that will be available to USDA customers on farmers.gov in the future. Other improvements and tools that are anticipated to launch in 2023 include:

- A streamlined and simplified direct loan application, reduced from 29 pages to 13 pages.
- An interactive online direct loan application that gives customers a paperless and electronic signature option, along with the ability to attach supporting documents such as tax returns.
- An online direct loan repayment feature that relieves borrowers from the necessity of calling, mailing, or visiting a local Service Center to pay a loan installment.

Background

USDA provides access to credit to approximately 115,000 producers who cannot obtain sufficient commercial credit through direct and guaranteed farm loans. With the funds and direction Congress provided in Section 22006 of the Inflation Reduction Act, USDA is taking action to immediately provide relief to qualifying distressed borrowers whose operations are at financial risk while working on making transformational changes to loan servicing so that borrowers are provided the flexibility and opportunities needed to address the inherent risks and unpredictability associated with agricultural operations.

USDA Announces Signup for Pandemic Assistance Revenue Program

The Pandemic Assistance Revenue Program (PARP) will assist eligible producers of agricultural commodities who experienced revenue decreases in calendar year 2020 compared to 2018 or 2019 due to the COVID-19 pandemic. PARP will help address gaps in previous pandemic assistance, which was targeted at price loss or lack of market access, rather than overall revenue losses.

USDA's Farm Service Agency will accept PARP applications from January 23, 2023, through June 2, 2023.

Eligible and Ineligible Commodities

For PARP, eligible agricultural commodities include crops, aquaculture, livestock, livestock byproducts, or other animals or animal byproducts that are produced as part of a farming operation and are intended to be commercially marketed. This includes only commodities produced in the United States or those produced outside the United States by a producer located in the United States and marketed inside the United States.

The following commodities are not eligible for PARP:

- Wild free-roaming animals.
- Horses and other animals used or intended to be used for racing or wagering.
- Aquatic species that do not meet the definition of aquaculture.
- Cannabis sativa L. and any part of that plant that does not meet the definition of hemp.
- Timber.

Program Eligibility

PARP payments will be made on a whole-farm basis, not commodity-by-commodity. To be eligible for PARP, an agricultural producer must have been in the business of farming during at least part of the 2020 calendar year and must have experienced a 15 percent decrease in allowable gross revenue in 2020, as compared to either:

- The 2018 or 2019 **calendar year**, as elected by the producer, if they received allowable gross revenue during the 2018 or 2019 **calendar years**, or
- The producer's expected 2020 calendar year allowable gross revenue, if the producer had no allowable gross revenue in 2018 or 2019.

PARP payments will be issued after the application period ends on June 2, 2023.

For more information on determining allowable gross revenue visit <u>farmers.gov/coronavirus/pandemic-assistance/parp</u> or review the <u>PARP fact sheet</u>.

More Information

To apply for PARP, contact your <u>local USDA Service Center</u>.

USDA Offers New Mexico Producers Many Conservation Choices with Continuous CRP

Agricultural producers and landowners interested in conservation opportunities for their land in exchange for yearly rental payments can find many possibilities through the U.S. Department of Agriculture's (USDA) Continuous Conservation Reserve Program (Continuous CRP) enrollment. This option offers conservation benefits similar to others, like General and Grassland CRP, but also offers unique flexibility and several program choices.

The long-term goal of all CRP opportunities is to re-establish valuable land cover—helping to improve water quality, prevent soil erosion, and reduce loss of wildlife habitat. Farmers enrolled in the program agree to remove environmentally sensitive land from agricultural production and plant species that will improve environmental health and quality in exchange for a yearly rental payment.

Under Continuous CRP, producers and landowners can enroll in CRP throughout the year. Offers are automatically accepted provided the producer and land meet the eligibility requirements and the enrollment levels do not exceed the statutory cap. The Climate-Smart Practice Incentive is also applicable to Continuous signup.

There are several enrollment options within Continuous CRP, including:

• CLEAR30

- The Clean Lakes, Estuaries, And Rivers Initiative provides the opportunity to reenroll expiring CRP water quality practices in a 30-year CRP contract, which promotes continued maintenance of established waterways, wetlands, and buffer practices.
- State Acres For Wildlife Enhancement (SAFE)
 - The SAFE initiative restores vital habitat in order to meet high-priority state wildlife conservation goals.
- Highly Erodible Lands Initiative (HELI)
 - HELI provides participants with the opportunity to establish long-term cover on highly erodible cropland that has a weighted erodibility index (EI) greater than or equal to 20.

To sign up, producers should contact the Farm Service Agency at their local USDA Service Center.

USDA Seeks Members for Federal Advisory Committee for Urban Agriculture and Innovative Production

USDA is seeking nominations for four positions on the Federal Advisory Committee for Urban Agriculture and Innovative Production. Nominations will be open to public from May 15, 2023, to July 15, 2023. The 12-member Committee, which assembled in March 2022, is part of USDA's efforts to increase support for urban agriculture and innovative production. Members of the committee provide input on policy development and to help identify barriers to urban

agriculture as USDA works to promote urban farming and the economic opportunities it provides in cities across the country.

Join us for the People's Garden anniversary! Sign up your garden in New Mexico

The People's Garden community is growing! Last May, USDA renewed the People's Garden initiative. On the anniversary of the reopening we invite you to join approximately 1,200 People's Gardens that have signed up nationwide in the past year by registering on the USDA People's Garden website. Community gardens, urban farms, school gardens, and small-scale agriculture projects in rural, suburban and urban areas can join the "People's Garden" community.

We invite you to:

- Join the People's Garden community.
- Grow using sustainable practices that benefit people and wildlife.
- **Teach** about local, resilient food systems.
- People's Gardens are marked on a map on the USDA website and may be featured in USDA communications. You'll receive a People's Garden sign to display and learn about People's Garden community information such as webinars.

Sign up at www.usda.gov/peoples-garden

USDA Offers Livestock Disaster Program Flexibilities; Responds to Needs Expressed by Producers Hard-Hit by Natural Disasters

USDA's Farm Service Agency (FSA) has provided additional flexibilities and further enhanced disaster recovery assistance provided by the Emergency Assistance for Livestock Honeybees, and Farm-raised Fish Program (ELAP), Livestock Honeybees, and Farm-raised Fish Program (ELAP), Livestock Indemnity Program (LIP) and Livestock Indemnity Program (LIP) and Livestock Program (LIP) and

LIP and ELAP reimburses producers for a portion of the value of livestock, poultry and other animals that died because of a qualifying natural disaster event or for loss of grazing acres,

feed, and forage. LFP provides benefits for grazing losses due to a qualifying drought or wildfire. For fire, losses must occur on federally managed lands. ELAP provides benefits for grazing losses not covered under LFP.

New Program Applications for 2022

FSA is accepting 2022 LIP notices of loss and applications for payment through June 2, 2023, for all covered livestock that may have been eligible in 2022.

Producers who did not sign up for ELAP assistance for hauling livestock, forage and feedstuff hauling or other losses covered under ELAP in 2022 can also apply through June 2, 2023.

FSA will accept LFP applications for only newly eligible covered livestock through June 2, 2023.

All required supporting documentation must be received and on file in the county office by the established deadline.

Revising 2022 Applications

Producers who have a 2022 ELAP, LIP or LFP application on file with FSA as of the program deadline or were placed on an approved register, may revise their application with the newly updated eligible livestock no later than June 2, 2023.

Filing a Notice of Loss for ELAP due to 2022 and 2023 Drought

To support program access for counties that do not currently have a 365-day grazing season, FSA is waiving the 30-day timeframe for producers to submit a notice of loss for the 2023 ELAP program year due to qualifying drought in calendar years 2022 or 2023. Producers can now submit a notice of loss from the date the loss is apparent, as far back as Jan. 1, 2023, for 2022 eligible losses and 2023 eligible losses that occur before June 2, 2023.

For counties that have a 365-day grazing season, producers must have a qualifying drought in the 2023 calendar year to be eligible for 2023 livestock, water and feed hauling in 2023.

More Information

Livestock producers must provide evidence that livestock death was due to an eligible adverse weather event or loss condition. In addition, livestock producers should bring supporting evidence, including documentation of the number and kind of livestock that died, photographs or video records to document the loss, purchase records, veterinarian records, production records and other similar documents. Owners who sold injured livestock for a reduced price because the livestock were injured due to an adverse weather event, must provide verifiable evidence of the reduced sale of the livestock.

Producers can apply for ELAP, LFP and LIP benefits at their local FSA county office. For more information or to submit a notice of loss or an application for payment, please contact your local FSA office or visit farmers.gov/recover.

USDA Previews Emergency Relief Assistance for Agricultural Producers Who Incurred Losses Due to 2022 Natural Disaster Events

Agriculture Secretary Tom Vilsack today announced plans to roll out \$3.7 billion in <u>Emergency Relief Program (ERP)</u> and Emergency Livestock Relief Program (ELRP) assistance to crop and livestock producers who sustained losses due to a qualifying natural disaster event in calendar year 2022. USDA is sharing early information to allow producers time to gather documents in advance of program delivery. Through distribution of remaining funds, USDA is also concluding the 2021 ELRP program by sending payments in the amount of 20% of the initial ELRP payment to all existing recipients.

Background

On December 29, 2022, President Biden signed into law the *Disaster Relief Supplemental Appropriations Act, 2023 (P.L. 117-328)* that provides about \$3.7 billion in financial assistance for agricultural producers impacted by wildfires, droughts, hurricanes, winter storms and other eligible disasters occurring in calendar year 2022.

Additionally, the Act specifically targets up to about \$500 million to livestock producers for losses incurred due to drought or wildfire in calendar year 2022.

ERP 2022 for Crop Producers

USDA, through the Farm Service Agency (FSA), intends to deploy the lessons learned from the development and implementation of ERP and ELRP for previous years' losses to ensure expedited assistance for 2022 losses.

Based on positive feedback from producers, stakeholder groups and FSA county office staff, USDA intends to provide an ERP track for producers who had coverage through Risk Management Agency's <u>federal crop insurance</u> or FSA's <u>Noninsured Crop Disaster Assistance Program</u> (NAP). Through a streamlined application process, USDA intends to be in a position to send pre-filled applications directly to eligible producers in early summer.

For producers who have not been able to avail themselves of risk management coverage or whose losses were not covered, USDA intends to offer a program track to access ERP assistance with assistance provided to producers who suffered a decrease in allowable gross revenue in 2022 due to necessary expenses related to losses of eligible crops from a qualifying natural disaster event.

Instead of implementing these program tracks as two separate phases on different timelines, FSA intends to make both tracks available to producers at the same time, noting that the first track will follow a streamlined process with less paperwork burden, based on existing, available risk management data. The second ERP track would require that producers provide FSA with certain information related to revenue.

ELRP 2022 for Livestock Producers and Close Out of ELRP for 2021

For impacted ranchers, USDA intends to leverage FSA's Livestock Forage Disaster Program (LFP) data to deliver ELRP assistance for increases in supplemental feed costs in 2022.

To be eligible for an ELRP payment for 2022 losses, livestock producers will need to have suffered grazing losses from wildfire or in a county rated by the U.S. Drought Monitor as having a D2 (severe drought) for eight consecutive weeks or a D3 (extreme drought) or higher level of drought intensity during the 2022 calendar year and have applied and been approved for 2022 LFP. Additionally, otherwise eligible producers whose permitted grazing on federally managed lands was disallowed due to wildfire will also be eligible for ELRP payments if they applied and were approved for 2022 LFP.

In a continued effort to streamline and simplify the delivery of ELRP benefits, eligible producers will not be required to apply for payment.

Meanwhile, FSA also intends to provide additional assistance to ranchers for qualifying livestock losses from drought and wildfire in 2021. More information will be announced in the coming months.

How Producers Can Prepare

To participate in ERP and ELRP for 2022 losses, both crop and livestock producers should have or be prepared to have the following forms on file with FSA:

- Form AD-2047, Customer Data Worksheet (as applicable to the program participant);
- Form CCC-902, Farm Operating Plan for an individual or legal entity;
- Form CCC-901, Member Information for Legal Entities (if applicable); and
- Form AD-1026 Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms on file. However, those who are uncertain or want to confirm should contact FSA at their local USDA Service Center.

In addition to the forms listed above, underserved producers are encouraged to register their status with FSA, using Form CCC-860, Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification, as certain existing permanent and ad-hoc disaster programs provide increased benefits or reduced fees and premiums.

Producers with eligible crop losses who did not have federal crop insurance or NAP risk management coverage for 2022 and intend to apply for ERP assistance will need to pull together revenue information that is readily available from most tax records. FSA encourages producers to have their tax documents from the past few years and supporting materials ready including Schedule F (Form 1040) and *Profit or Loss from Farming* or similar tax documents. FSA will not require these forms to be submitted with the ERP application, but will require a certification, similar to Adjusted Gross Income certification that has been used for many years for Farm Bill programs. Applicants simply report and certify to the information required for the program.

Crop producers who have federal crop insurance coverage should ensure that information on file with their insurance agent is accurate and that any pending activities needed to file loss claims for 2022 losses are addressed as soon as possible. Producers who received ERP assistance last year or who will receive assistance for 2022 losses are required to purchase crop insurance or NAP for the next two crop years.

More Information

In the coming months, USDA intends to provide additional information on how to apply for assistance through ERP and ELRP for 2022 losses. Through proactive communications and outreach, USDA will keep producers and stakeholders informed as program eligibility, application and implementation details unfold.

USDA Reminds New Mexico Producers to File Crop Acreage Reports

Agricultural producers in New Mexico who have not yet completed their <u>crop acreage</u> <u>reports</u> after planting should make an appointment with their U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) service center before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

The following acreage reporting dates are applicable in New Mexico:

May 15, 2023 Spring Small Grains

Acreage reporting dates vary by crop and by county. Contact your local FSA office for a list of acreage reporting deadlines by crop.

To file a crop acreage report, producers need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).

- Acreage prevented from planting, when applicable.
- Other information as required.

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If crops are covered by the Noninsured Crop Disaster Assistance Program, acreage reports should be submitted by the applicable state, county, or crop-specific reporting deadline or 15 calendar days before grazing or harvesting of the crop begins.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to because of a natural disaster.

Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA's Risk Management Agency.

FSA offers continuous certification for perennial forage. This means after perennial forage is reported once and the producer elects continuous certification, the certification remains in effect until a change is made. Check with FSA at the local USDA Service Center for more information on continuous certification.

New Option to View, Print and Label Maps on Farmers.gov

Producers with an eAuth account linked to their USDA customer record can now access their FSA farm records, maps and common land units by logging into farmers.gov. A new feature will allow producers to export field boundaries as shapefiles and import and view other shapefiles, such as precision agriculture boundaries. This will allow producers to view, print and label their own maps for acreage reporting purposes.

Producers who have authority to act on behalf of another customer as a grantee via form FSA-211 Power of Attorney, Business Partner Signature Authority, along with other signature types, or as a member of a business can now access information in the farmers.gov portal.

Producers can learn how to use the farmers.gov Farm Records Mapping functionality with this fact sheet and these video tutorials.

More Information

Producers can make an appointment to report acres by contacting their local USDA Service Center
