## A Message from the State Executive Director

Stock shows are upon us!

I know some folks have been sitting at the edge of their seats awaiting stock show season, just like me. I love the stock shows! There is something about watching our kids and younger generations handle livestock with tenderness and care. After years and years of running my own cattle, I still walk away from each stock show with something new that I learned from these kids.

It is truly inspiring to watch the future generation of agriculture work with so many different types of animals, learning to work hard, be gentle, and stand tall. These young competitors bring me excitement when I think about where the future of agriculture is headed. I know we are in good hands.

FSA offers a unique opportunity for students ages 10-20 years old to create an agriculture-related, income-producing project. The youth loan program makes loans to individual young persons to start and operate income-producing projects of modest size in connection with their participation in 4-H clubs, FFA, a Tribal youth group, or similar agricultural youth organization. The project being financed with an FSA Youth Loan needs to provide an opportunity for the young person to acquire experience and education in agriculture-related skills. More information regarding youth loans can be found [here](#).

---

To the young agriculturist, you are making an impact!

Good luck to you this season,

- Steve Kouplen

## **USDA Announces Signup for Crop and Revenue Loss Assistance for Agricultural Producers**

Signup begins January 23 for additional emergency relief from the U.S. Department of Agriculture (USDA) through the [Emergency Relief Program](#) (ERP) Phase Two.

To be eligible for Phase Two, producers must have suffered a decrease in allowable gross revenue in 2020 or 2021 due to necessary expenses related to losses of eligible crops from a qualifying natural disaster event. Eligible crops include both traditional insurable commodities and specialty crops that are produced in the United States as part of a farming operation and are intended to be commercially marketed. This also includes losses of eligible on-farm stored commodities. ERP Phase 2 applicants will use the following tax years when selecting allowable gross revenue:

- Benchmark years: 2018 and/or 2019; estimated for new producers with no 2018 or 2019 revenue or adjusted if the benchmark years are not representative of the disaster year due to a change in operation size.
- Disaster years: 2020 and/or 2021. The allowable gross revenue for the specific disaster year will be based on the tax year applicable to that revenue (2020, 2021 or 2022).

The ERP tool assists producers in calculating allowable gross revenue, as well as adjusted revenue for the benchmark years 2018 and 2019, and allowable gross revenue for representative tax years 2020-2022 which represent disaster years 2020 and 2021. Once producers complete the allowable gross revenue entries, they are able to print forms FSA-521 and FSA-521A through this tool.

The ERP Phase 2 and PARP application period is open from January 23 through June 2 2023.

For more information on payment calculations, payment limitations or how to determine allowable gross revenue, please reference the [ERP Phase 2 fact sheet](#).

---

## **USDA Announces Signup for Pandemic Assistance Revenue Program**

---

The Pandemic Assistance Revenue Program (PARP) will assist eligible producers of agricultural commodities who experienced revenue decreases in calendar year 2020 compared to 2018 or 2019 due to the COVID-19 pandemic. PARP will help address gaps in previous pandemic assistance, which was targeted at price loss or lack of market access, rather than overall revenue losses.

USDA's Farm Service Agency will accept PARP applications from January 23, 2023, through June 2, 2023.

### **Eligible and Ineligible Commodities**

For PARP, eligible agricultural commodities include crops, aquaculture, livestock, livestock byproducts, or other animals or animal byproducts that are produced as part of a farming operation and are intended to be commercially marketed. This includes only commodities produced in the United States or those produced outside the United States by a producer located in the United States and marketed inside the United States.

The following commodities **are not eligible** for PARP:

- Wild free-roaming animals.
- Horses and other animals used or intended to be used for racing or wagering.
- Aquatic species that do not meet the definition of aquaculture.
- *Cannabis sativa L.* and any part of that plant that does not meet the definition of hemp.
- Timber.

### **Program Eligibility**

PARP payments will be made on a whole-farm basis, not commodity-by-commodity. To be eligible for PARP, an agricultural producer must have been in the business of farming during at least part of the 2020 calendar year and must have experienced a 15 percent decrease in allowable gross revenue in 2020, as compared to either:

- The 2018 or 2019 **calendar year**, *as elected by the producer*, if they received allowable gross revenue during the 2018 or 2019 **calendar years**, or
- The producer's expected 2020 calendar year allowable gross revenue, if the producer had no allowable gross revenue in 2018 or 2019.

PARP payments will be issued after the application period ends on June 2, 2023.

For more information on determining allowable gross revenue visit [farmers.gov/coronavirus/pandemic-assistance/parp](https://farmers.gov/coronavirus/pandemic-assistance/parp) or review the [PARP fact sheet](#).

### **More Information**

To apply for PARP, contact your [local USDA Service Center](#).

## Urban Producers, Public Invited to Attend February Meeting of Federal Advisory Committee for Urban Agriculture and Innovative Production

USDA encourages urban producers, innovative producers, and other stakeholders to virtually attend the second public meeting of the Federal Advisory Committee for Urban Agriculture and Innovative Production on Feb. 23 from 3:30-6pm ET. This Committee will discuss recommendations it intends to submit to Agriculture Secretary Tom Vilsack to remove barriers to urban and innovative producers and increase access of urban and innovative producers to USDA programs and services. [Learn more, submit a comment, or register to attend.](#)

## USDA Develops Simplified Direct Loan Application to Improve Customer Service

The U.S. Department of Agriculture (USDA) has developed a simplified direct loan application to provide improved customer experience for producers applying for loans from the Farm Service Agency (FSA). The simplified direct loan application enables producers to complete a more streamlined application, reduced from 29 to 13 pages. Producers will also have the option to complete an electronic fillable form or prepare a traditional, paper application for submission to their local FSA farm loan office. The paper and electronic versions of the form will be available starting March 1, 2023.

Approximately 26,000 producers submit a direct loan application to the FSA annually, but there is a high rate of incomplete or withdrawn applications, due in part to a challenging and lengthy paper-based application process. Coupled with the Loan Assistance Tool released in October 2022, the simplified application will provide all loan applicants access to information regarding the application process and assist them with gathering the correct documents before they begin the process. This new application will help farmers and ranchers submit complete loan applications and reduce the number of incomplete, rejected, or withdrawn applications.

In October 2022, USDA launched the Loan Assistance Tool, an online step-by-step guide that provides materials to help an applicant prepare their farm loan application in one tool. Farmers can access the Loan Assistance Tool by visiting [farmers.gov/farm-loan-assistance-tool](https://farmers.gov/farm-loan-assistance-tool) and clicking the 'Get Started' button. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser. A version compatible with mobile devices is expected to be available by the summer. It does not work in Internet Explorer.

The simplified direct loan application and Loan Assistance Tool are the first of multiple farm loan process improvements that will be available to USDA customers on farmers.gov in the future. Other improvements that are anticipated to launch in 2023 include:

---

- An interactive online direct loan application that gives customers a paperless and electronic signature option, along with the ability to attach supporting documents such as tax returns.
- An online direct loan repayment feature that relieves borrowers from the necessity of calling, mailing, or visiting a local Service Center to pay a loan installment.

USDA provides access to credit to approximately 115,000 producers who cannot obtain sufficient commercial credit through direct and guaranteed farm loans. With the funds and direction Congress provided in Section 22006 of the Inflation Reduction Act, USDA took action in October 2022 to [provide relief to qualifying distressed borrowers](#) while working on making transformational changes to loan servicing so that borrowers are provided the flexibility and opportunities needed to address the inherent risks and unpredictability associated with agricultural operations.

Soon, all direct loan borrowers will receive a letter from USDA describing the circumstances under which additional payments will be made to distressed borrowers and how they can work with their FSA local office to discuss these options. Producers can explore all available options on all FSA loan options at [fsa.usda.gov](https://fsa.usda.gov) or by contacting their [local USDA Service Center](#).

## USDA Announces General Conservation Reserve Program Signups for 2023

Agriculture Secretary Tom Vilsack announced that agricultural producers and private landowners can begin applying for the Conservation Reserve Program (CRP) General signup starting **February 27 through April 7, 2023**. CRP is a cornerstone voluntary conservation program offered by the U.S. Department of Agriculture (USDA) and a key tool in the Biden-Harris administration's effort to address climate change and help agricultural communities invest in the long-term well-being of their land and natural resources.

Producers and landowners enrolled more than 5 million acres into CRP through signups in 2022, building on the acceptance of more than 3.1 million acres in the [largest Grassland CRP signup in history](#). There are currently 23 million acres enrolled in CRP, with 1.9 million set to expire this year. USDA's Farm Service Agency (FSA) is aiming to reach the 27-million-acre cap statutorily set for fiscal year 2023.

### General CRP

General CRP helps producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland. Additionally, General CRP includes a Climate-Smart Practice Incentive to help increase carbon sequestration and reduce greenhouse gas emissions by helping producers and landowners establish trees and permanent grasses, enhance wildlife habitat, and restore wetlands.

### Continuous CRP

---

Under Continuous CRP, producers and landowners can enroll in CRP throughout the year. Offers are automatically accepted provided the producer and land meet the eligibility requirements and the enrollment levels do not exceed the statutory cap. The Climate-Smart Practice Incentive is also available in the Continuous signup.

FSA offers several additional enrollment opportunities within Continuous CRP, including the Clean Lakes Estuaries and Rivers Initiative (CLEAR30), the State Acres for Wildlife Enhancement (SAFE) Initiative, the Farmable Wetlands Program (FWP), and the Conservation Reserve Enhancement Program (CREP). The CLEAR30 Initiative, which was originally piloted in twelve states in the Great Lakes and Chesapeake Bay watershed, has been expanded nationwide, allowing producers and landowners to enroll in 30-year CRP contracts for water quality practices. Under this administration, FSA also moved SAFE practices back to the Continuous CRP signup, giving producers and landowners more opportunities to participate in the initiative. Through the FWP, producers and landowners can enroll land in CRP as part of their efforts to restore previously farmed wetlands and wetland buffers, to improve both vegetation and water flow.

This administration has also made significant improvements to CREP, which leverages federal and non-federal funds to target specific State, regional or nationally significant conservation concerns. Specifically, USDA made significant improvements to CREP to reduce barriers and make the program more accessible to a broad range of producers and new types of partners.

These updates included flexibility for partners to provide matching funds in the form of cash, in-kind contributions, or technical assistance, along with an investment in additional staff to work directly with partners. Through CREP, for the first time ever, three Tribal Nations are now partnering with USDA to help conserve, maintain, and improve grassland productivity, reduce soil erosion, and enhance wildlife habitat.

### **Grassland CRP**

FSA will announce the dates for Grassland CRP signup in the coming weeks. Grassland CRP is a working lands program, helping landowners and operators protect grassland, including rangeland and pastureland and certain other lands, while maintaining the areas as working grazing lands.

Protecting grasslands contributes positively to the economy of many regions, provides biodiversity of plant and animal populations, and provides important carbon sequestration benefits to deliver lasting climate outcomes.

### **How to Sign Up**

Landowners and producers interested in CRP should contact their local [USDA Service Center](#) to learn more or to apply for the program before their deadlines.

Producers with expiring CRP acres can use the Transition Incentives Program (TIP), which incentivizes producers who sell or enter a long-term lease with a beginning, veteran, or socially disadvantaged farmer or rancher who plans to sustainably farm or ranch the land.

### **More Information**

Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. It was originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits.
