Acting State Executive Director:

Daniel Smeal

March 15 is Deadline to Make Elections and Complete Enrollment in 2021 Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) Programs

Agricultural producers can now make elections and enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for the 2021 crop year.

Enrollment for the 2021 crop year closes March 15, 2021.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base

acres when the effective price for a covered commodity falls below its reference price.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

2021 Elections and Enrollment

Producers can elect coverage and enroll in crop-by-crop ARC-County or PLC, or ARC-Individual for the entire farm, for the 2021 crop year. Although election changes for 2021 are optional, enrollment (signed contract) is required for each year of the program. If a producer has a multi-year contract on the farm and makes an election change for 2021, it will be necessary to sign a new contract.

If an election is not submitted by the deadline of March 15, 2021, the election defaults to the current election for crops on the farm from the prior crop year.

For crop years 2022 and 2023, producers will have an opportunity to make new elections during those signups. Farm owners cannot enroll in either program unless they have a share interest in the farm.

Web-Based Decision Tools

In partnership with USDA, the University of Illinois and Texas A&M University offer web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. Tools include:

- [Gardner-farmdoc Payment Calculator](#), the University of Illinois tool that offers farmers the ability to run payment estimate modeling for their farms and counties for ARC-County and PLC.
- [ARC and PLC Decision Tool](#), the Texas A&M tool allows producers to analyze payment yield updates and expected payments for 2021. Producers who have used the tool in the past should see their username and much of their farm data already available in the system.

More Information

For more information on ARC and PLC, including two online decision tools that assist producers in making enrollment and election decisions specific to their operations, visit the [ARC and PLC webpage](#).

For additional questions and assistance, contact your local USDA service center. To locate your local FSA office, visit farmers.gov/service-locator.

Quality Loss Assistance Now Available for Eligible Producers Affected by 2018, 2019 Natural Disasters

The U.S. Department of Agriculture's (USDA) Farm Service Agency (FSA) announced that signup for the Quality Loss Adjustment (QLA) Program began Wednesday, Jan. 6, 2021. Funded by the Further Consolidated Appropriations Act of 2020, this new program provides assistance to producers who suffered eligible crop quality losses due to natural disasters occurring in 2018 and 2019. **The deadline to apply for QLA is Friday, March 5, 2021.**

Eligible Crops

Eligible crops include those for which [federal crop insurance](#) or [Noninsured Crop Disaster Assistance Program](#) (NAP) coverage is available, except for grazed crops and value loss crops, such as honey, maple sap, aquaculture, floriculture, mushrooms, ginseng root, ornamental nursery, Christmas trees, and turfgrass sod.

Additionally, crops that were sold or fed to livestock or that are in storage may be eligible; however, crops that were destroyed before harvest are not eligible. Crop quality losses occurring after harvest, due to deterioration in storage, or that could have been mitigated, are also not eligible.

Assistance is based on a producer's harvested affected production of an eligible crop, which must have had at least a 5% quality loss reflected through a quality discount; or for forage crops, a nutrient loss, such as total digestible nutrients.

Qualifying Disaster Events

Losses must have been a result of a qualifying disaster event (hurricane, excessive moisture, flood, qualifying drought, tornado, typhoon, volcanic activity, snowstorm, or wildfire) or related condition that occurred in calendar years 2018 and/or 2019.

Assistance is available for eligible producers in counties that received a qualifying Presidential Emergency Disaster Declaration or Secretarial Disaster Designation because of one or more of the qualifying disaster events or related conditions.

Lists of counties with Presidential Emergency Disaster Declarations and Secretarial Disaster Designations for all qualifying disaster events for 2018 and 2019 are available [here](#). For drought, producers are eligible for QLA if the loss occurred in an area within a county rated by the [U.S. Drought Monitor](#) as having a D3 (extreme drought) or higher intensity level during 2018 or 2019.

Producers in counties that did not receive a qualifying declaration or designation may still apply but must also provide supporting documentation to establish that the crop was directly affected by a qualifying disaster event.

To determine QLA eligibility and payments, FSA considers the total quality loss caused by all qualifying natural disasters in cases where a crop was impacted by multiple events.

Applying for QLA

When applying, producers are asked to provide verifiable documentation to support claims of quality loss or nutrient loss in the case of forage crops. For crops that have been sold, grading must have been completed within 30 days of harvest, and for forage crops, a laboratory analysis must have been completed within 30 days of harvest.

Some acceptable forms of documentation include sales receipts from buyers, settlement sheets, truck or warehouse scale tickets, written sales contracts, similar records that represent actual and specific quality loss information, and forage tests for nutritional values.

Payments Calculations and Limitations

QLA payments are based on formulas for the type of crop (forage or non-forage) and loss documentation submitted. Based on this documentation FSA is calculating payments based on the producer's own individual loss or based on the county average loss. More information on payments can be found on farmers.gov/quality-loss.

FSA will issue payments once the application period ends. If the total amount of calculated QLA payments exceeds available program funding, payments will be prorated.

For each crop year, 2018, 2019 and 2020, the maximum amount that a person or legal entity may receive, directly or indirectly, is \$125,000. Payments made to a joint operation (including a general partnership or joint venture) will not exceed \$125,000, multiplied by the number of persons and legal entities that comprise the ownership of the joint operation. A person or legal entity is ineligible for QLA payment if the person's or legal entity's average Adjusted Gross Income exceeds \$900,000, unless at least 75% is derived from farming, ranching or forestry-related activities.

Future Insurance Coverage Requirements

All producers receiving QLA Program payments are required to purchase crop insurance or NAP coverage for the next two available crop years at the 60% coverage level or higher. Wildlife and Hurricane Indemnity Program Plus (WHIP+) participants who already met the WHIP+ requirement to purchase crop insurance or NAP coverage are considered to have thereby met the requirement to purchase crop insurance or NAP coverage for QLA. If eligible, QLA participants may meet the insurance purchase requirement by purchasing [Whole-Farm Revenue Protection](#) coverage offered through USDA's Risk Management Agency.

More Information For more information, visit farmers.gov/quality-loss, or contact your local [USDA Service Center](#). Producers can also obtain one-on-one support with applications by calling 877-508-8364.

USDA Offers Secure New Options for Signing and Sharing Documents Online

Farmers and ranchers working with USDA's Farm Service Agency or Natural Resources Conservation Service can now sign and share documents online in just a few clicks. By using Box or OneSpan, producers can digitally complete business transactions without leaving their homes or agricultural operations. Both services are free, secure, and available for multiple FSA and NRCS programs.

Box is a secure, cloud-based site where FSA or NRCS documents can be managed and shared. Producers who choose to use Box can create a username and password to access their secure Box account, where documents can be downloaded, printed, manually signed, scanned, uploaded, and shared digitally with Service Center staff. This service is available to any FSA or NRCS customer with access to a mobile device or computer with printer connectivity.

OneSpan is a secure eSignature solution for FSA and NRCS customers. Like Box, no software downloads or eAuthentication is required for OneSpan. Instead, producers interested in eSignature through OneSpan can confirm their identity through two-factor authentication using a verification code sent to their mobile device or a personalized question and answer. Once identity is confirmed, documents can be reviewed and e-signed through OneSpan via the producer's personal email address. Signed documents immediately become available to the appropriate Service Center staff.

Box and OneSpan are both optional services for customers interested in improved efficiency in signing and sharing documents with USDA, and they do not replace existing systems using eAuthentication for digital signature. Instead, these tools provide additional digital options for producers to use when conducting business with FSA or NRCS.

USDA Service Center staff are available to help producers get started with Box and OneSpan through a few simple steps. Please visit farmers.gov/service-locator to find your local office and let Service Center staff know you're interested in signing and sharing documents through these new features. In most cases, one quick phone call will be all that is needed to initiate the process.

Visit farmers.gov/mydocs to learn more about Box and OneSpan, steps for getting started, and additional resources for conducting business with USDA online.

To learn more about program flexibilities and Service Center status during the coronavirus pandemic, visit farmers.gov/coronavirus.

Unauthorized Disposition of Grain Results in Financial Penalties

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and your name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.

Is the Noninsured Crop Disaster Assistance Program Right for You?

Farmers and ranchers rely on crop insurance to protect themselves from disasters and unforeseen events, but not all crops are insurable through the USDA's Risk Management Agency. The Farm Service Agency's (FSA) Noninsured Crop Disaster Assistance Program (NAP) provides producers another option to obtain coverage against disaster for these crops. NAP provides financial assistance to producers of non-insured crops impacted by natural disasters that result in lower yields, crop losses, or prevents crop planting.

Commercially produced crops and agricultural commodities for which crop insurance is not available are generally eligible for NAP. Eligible crops include those grown specifically for food, fiber,

livestock consumption, biofuel or biobased products, or be commodities such as value loss crops like Christmas trees and ornamental nursery, honey, maple sap, and many others. Contact your FSA office to see which crops are eligible in your state and county.

Eligible causes of loss include drought, freeze, hail, excessive moisture, excessive wind or hurricanes, earthquake, flood. These events must occur during the NAP policy coverage period, before or during harvest, and the disaster must directly affect the eligible crop. For guidance on causes of loss not listed, contact your local FSA county office.

Interested producers must apply for coverage using FSA form [CCC-471](#), "Application for Coverage," and pay the applicable service fee at the FSA office where their farm records are maintained. These must be filed by the application closing date. Closing dates vary by crop, so it is important to contact your local FSA office as soon as possible to ensure you don't miss an application closing date.

At the time of application, each producer will be provided a copy of the [NAP Basic Provisions](#), which describes how NAP works and all the requirements you must follow to maintain NAP coverage. NAP participants must provide accurate annual reports of their production in non-loss years to ensure their NAP coverage is beneficial to their individual operation.

Producers are required to pay service fees which vary depending on the number of crops and number of counties your operation is located in. The NAP service fee is the lesser of \$325 per crop or \$825 per producer per administrative county, not to exceed a total of \$1,950 for a producer with farming interests in multiple counties. Premiums also apply when producers elect higher levels of coverage with a maximum premium of \$15,750 per person or legal entity depending on the maximum payment limitation that may apply to the NAP covered producer. The service fee can be waived for beginning, qualifying veteran, and limited resource farmers and rancher., These farmers and ranchers can also receive a 50 percent reduction in the premium.

For more detailed information on NAP, download the [NAP Fact Sheet](#). To get started with NAP, we recommend you contact your [local USDA service center](#).

USDA Offers New Forest Management Incentive for Conservation Reserve Program

The U.S. Department of Agriculture (USDA) is making available \$12 million for use in making payments to forest landowners with land enrolled in the Conservation Reserve Program (CRP) in exchange for their implementing healthy forest management practices. Existing CRP participants can now sign up for the Forest Management Incentive (FMI), which provides financial incentives to landowners with land in CRP to encourage proper tree thinning and other practices.

Right now, less than 10% of land currently enrolled in CRP is dedicated to forestland. But, these nearly 2 million acres of CRP forestland, if properly managed, can have enormous benefits for natural resources by reducing soil erosion, protecting water quality, increasing water quantity, and diversifying local farm operations and rural economies.

Only landowners and agricultural producers with active CRP contracts involving forest cover can enroll. However, this does not include active CRP contracts that expire within two years. Existing

CRP participants interested in tree thinning and prescribed burning must comply with the standards and specifications established in their CRP contract.

CRP participants will receive the incentive payment once tree thinning and/or other authorized forest management practices are completed.

The incentive payment is the lower of:

- The actual cost of completing the practice; or
- 75% of the payment rate offered by USDA's Natural Resources Conservation Service (NRCS) if

the practice is offered through NRCS conservation programs.

CRP signup is currently open. FSA will announce deadline later this year. Interested producers should contact their [local FSA county office](#).

Applying for FSA Direct Loans

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance, and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is \$600,000 and the maximum loan amount for direct operating loans is \$400,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

February 2021 Interest Rates

Farm Operating Loans

Farm Operating Loans - Direct	1.375 %
Farm Operating Loans - Microloan	1.375 %

Farm Ownership Loans

Direct	2.625 %
--------	---------

Microloan	2.625 %
